

Housing Types In Australia

Richard Tomlinson

Australia's Unintended Cities Richard Tomlinson, 2012-11-23 Australia's Unintended Cities identifies and researches housing and housing-related urban outcomes that are unintended consequences of other policies, the structure of incentives and disincentives for the housing market, and governance arrangements for metropolitan areas and planning and service delivery. It is argued that unintended consequences have a greater impact on the housing market and Australia's cities and their future than policies directly concerned with housing, urban policy and metropolitan strategic planning. The book will inform policy makers, including government officials, consultants and politicians. It will also be used by academics and students in various areas of urban policy, such as housing and urban planning, as well as environment, public policy and economics.

Conflict and Change in Australia's Peri-Urban Landscapes Melissa Kennedy, Andrew Butt, Marco Amati, 2016-03-22 In an era of rapid urbanization, peri-urban areas are emerging as the fastest-growing regions in many countries. Generally considered as the space extending one hundred kilometres from the city fringe, peri-urban areas are contested and subject to a wide range of uses such as residential development, productive farming, water catchments, forestry, mineral and stone extraction and tourism and recreation. Whilst the peri-urban space is valued for offering a unique ambiance and lifestyle, it is often highly vulnerable to bushfire and loss of biodiversity and vegetation along with threats to farming and food security in highly productive areas. Drawing together leading researchers and practitioners, this volume provides an interdisciplinary contribution to our knowledge and understanding of how peri-urban areas are being shaped in Australia through a focus on four overarching themes: Peri-urban Conceptualizations; Governance and Planning; Land Use and Food Production; and Solutions and Representations. Whilst the case studies focus on Australia, they advance a variety of tools useful in discerning processes and impacts of peri-urban change globally. Furthermore, the findings are instructive of the issues and tensions commonly encountered in rapidly urbanizing peri-urban areas throughout the world, from landscape valuation and biosecurity concerns to functional adaptation and social change.

The Routledge Handbook of Housing and Welfare Martin Grander, Mark Stephens, 2023-12-22 This handbook takes on one of the most pressing issues of today's society – the question of housing. It is a cutting-edge edited volume about the disputed interrelationship between housing and the wider welfare state. Although housing scholars generally agree that

housing should be regarded as part of such a wider welfare system, it has proven hard to pinpoint and operationalize its position within it. Moreover, the relationship became considerably more complex as a result of the period of intense globalization and the integration of national housing finance systems into world finance markets. Furthermore, welfare systems reflect economic as well as social models and these, too, have changed as countries have responded to globalization, and traditional ideological frameworks have become less distinct. Thus, there is a need to redefine the connection between housing and welfare in light of changes in both welfare and housing systems. By investigating the current situation and historical development of housing provision and welfare distribution in different contexts worldwide, this book aims to contribute to an expanded understanding of housing and welfare. The book brings together 25 international housing researchers covering 15 countries worldwide. With such a global approach, the book aims to provide an updated empirical picture and analysis of different housing systems and their connection to the welfare regime in different national contexts. The book moves beyond the usual focus on affordable housing provision in the context of well-developed welfare regimes and includes countries from the global south, incorporating regions where it is debatable whether there are welfare systems present at all. Thus, the book aims to provide the reader with an insight into the large differences in housing provision in international contexts with large differences regarding how the welfare state is comprised. From these insights, we reflect on whether regime approaches continue to provide a suitable theoretical framework for understanding the relationship between housing and the wider welfare state. This handbook is essential reading for researchers, students, policymakers, and other professionals in the fields of housing studies, welfare studies, economics, urban studies, social work, social and public policy, and sociology.

Infinite Suburbia MIT Norman B. Leventhal Center for Advanced Urbanism, 2018-03-13 Infinite Suburbia is the culmination of the MIT Norman B. Leventhal Center for Advanced Urbanism's yearlong study of the future of suburban development. Extensive research, an exhibition, and a conference at MIT's Media Lab, this groundbreaking collection presents fifty-two essays by seventy-four authors from twenty different fields, including, but not limited to, design, architecture, landscape, planning, history, demographics, social justice, familial trends, policy, energy, mobility, health, environment, economics, and applied and future technologies. This exhaustive compilation is richly illustrated with a wealth of photography, aerial drone shots, drawings, plans, diagrams, charts, maps, and archival materials, making it the definitive statement on suburbia at the beginning of the twenty-first century.

Australia, State of the Environment, 2001

Year Book, Australia, 2009

International Handbook of Housing Policies and Practices Willem Van Vliet, 1990-10-24 This important new source provides greater insight into and awareness of housing experiences in other societies, allowing for a more informed

assessment of our own national experiences and priorities. This unique compilation points to the value of cross-national work when dealing with these complex issues. Choice Housing issues and policy problems are both universal in scope and, at the same time, inherently specific to a given time and place. All countries are wrestling with their own housing problems and with the everyday mechanics of housing supply and regulation. Specific problems vary immensely from country to country and the policy instruments and institutions chosen to address those problems vary. As the chapters in this volume make clear, definitions of housing problems and approaches to housing policies are firmly embedded in particular national and cultural contexts. A long-awaited signal publication, this book is an important new source of analyses and information necessary to understand these contexts. It also is a major work of reference that provides the raw materials for undertaking comparative studies of housing issues and policy problems. The contributors are renowned authorities in the field who demonstrate how housing is worldwide an integral component of a nation's financial system, its social structure, and its political and policy making apparatus. Because this book provides greater insight in and awareness of experiences in other societies, it allows for a more informed assessment of our own national experiences and priorities. As the contributors make clear, there are no complete or simple solutions to contemporary housing problems. This unique compilation points to the value of cross-national work when dealing with these complex issues. It will be essential reading for scholars and policymakers alike who are concerned with housing issues.

Australia's Resources and Their Development R. Kent Wilson, 1980

Applied Studies in Climate Adaptation Jean P. Palutikof, Sarah L. Boulter, Jon Barnett, David Rissik, 2014-12-31 The book advances knowledge about climate change adaptation practices through a series of case studies. It presents important evidence about adaptation practices in agriculture, businesses, the coastal zone, community services, disaster management, ecosystems, indigenous populations, and settlements and infrastructure. In addition to 38 case studies across these sectors, the book contains horizon-scoping essays from international experts in adaptation research, including Hallie Eakin, Susanne Moser, Jonathon Overpeck, Bill Solecki, and Gary Yohe. Australia's social-ecological systems have a long history of adapting to climate variability and change, and in recent decades has been a world-leader in implementing and researching adaptation, making this book of universal relevance to all those working to adapt our environment and societies to climate change.

Ageing in Place Bruce Judd, Kenichi Tanoue, Edgar Liu, 2020-11-27 This insightful book showcases a range of design, planning and policy responses to ageing populations and the built environment from across the rapidly changing and dynamic Western Asia-Pacific region. Its chapters demonstrate a clear and increasingly convergent preference for and promotion of ageing in place and the need for collaborative efforts to facilitate this at various scales through policy and practice.
