Ecocritical Geopolitics Elena dell'Agnese, 2021-05-26 What is the role of popular culture in shaping our discourse about the multifaceted system of material things, subjects and causal agents that we call environment? Ecocritical Geopolitics offers a new theoretical perspective and approach to the analysis of environmental discourse in popular culture. It combines ecocritical and critical geopolitical approaches to explore three main themes: dystopian visions, the relationship between the human, post-human, and nature and speciesism and carnism. The importance of popular culture in the construction of geopolitical discourse is widely recognized. From ecocriticism, we also appreciate that literature, cinema, or theatre can offer a mirror of what the individual author wants to communicate about the relationship between the human being and what can be defined as non-human. This book provides an analysis of environmental discourses with the theoretical tools of critical geopolitics and the analytical methodology of ecocriticism. It develops and disseminates a new scientific approach, defined as ecocritical geopolitics, to offer an idea of the power of popular culture in the realization of environmental discourse. Referencing sources as diverse as *The Road*, *The Shape of Water*, *Lady and the Tramp*, and TV cooking shows, this book will be of great interest to students and scholars of geography, environmental studies, film studies, and environmental humanities.

The Intellectual Fraud of Meat-Eaters Thomas Lepeltier, 2023-07-04 To be a vegetarian when you can eat meat is to deny the animal in you. To slaughter an animal, you have to love animals! When living beings start to eat stones, the problem [of meat] will no longer be an issue. These are some quotes from philosophers and intellectuals that defy logic and encourage cruelty. Instead of recognizing that we should not cause suffering and kill sentient beings just for our pleasure, these intellectuals justify the consumption of animal products. They support a society that slaughters millions of animals daily because it does not want to change its eating habits. This book enumerates and denounces all the arguments developed by carnivores so that this great massacre can stop and a constructive debate on the place of animals in society can finally begin. Through books, articles and television appearances, experts and journalists criticize, denounce and mock the defenders of animals. This is not without consequences. Nowadays, few people remain insensitive to the fate of livestock. When a film is shot inside a slaughterhouse and broadcast in the media, most people are shocked. Then, confronted with the arguments of vegans and vegetarians, they look for answers. What to think? What to do? What to eat? And then these intellectuals come

along and tell them that vegans and vegetarians are wrong. Each time, the basic ethical principle that we should not cause suffering and kill a sentient being just for our own pleasure is forgotten or misinterpreted. Instead, these intellectuals advance arguments that defy logic, have no rational basis, and encourage cruelty. But in so doing, they reinforce a society that unnecessarily kills a staggering number of animals because it does not want to change its eating habits. This book takes the position of denouncing them loud and clear; not for the pleasure of criticizing, but in the hope that this clarification will contribute to stopping the great massacre of livestock and serve to launch a constructive debate on their place in society. Thomas Lepeltier is a historian and philosopher of science. He is the author of several books on this theme, including *Darwin hérétique* (2007, Seuil), *Univers parallèles* (2010, Seuil), *La Face cachée de l'univers* (2014, Seuil). In 2013, he also published a book on animal ethics, *La Révolution végétarienne* (Éditions Sciences Humaines).

The Myth of Human Supremacy Derrick Jensen, 2016-08-30 In this impassioned polemic, radical environmental philosopher Derrick Jensen debunks the near-universal belief in a hierarchy of nature and the superiority of humans. Vast and underappreciated complexities of nonhuman life are explored in detail—from the cultures of pigs and prairie dogs, to the creative use of tools by elephants and fish, to the acumen of caterpillars and fungi. The paralysis of the scientific establishment on moral and ethical issues is confronted and a radical new framework for assessing the intelligence and sentience of nonhuman life is put forth. Jensen attacks mainstream environmental journalism, which too often limits discussions to how ecological changes affect humans or the economy—with little or no regard for nonhuman life. With his signature compassionate logic, he argues that when we separate ourselves from the rest of nature, we in fact orient ourselves against nature, taking an unjust and, in the long run, impossible position. Jensen expresses profound disdain for the human industrial complex and its ecological excesses, contending that it is based on the systematic exploitation of the earth. Page by page, Jensen, who has been called the philosopher-poet of the environmental movement, demonstrates his deep appreciation of the natural world in all its intimacy, and sounds an urgent call for its liberation from human domination.

Beyond Beliefs Melanie Joy, 2018-03-15 Vegans, vegetarians, and meat eaters can feel like they're living in different worlds. Many vegans and vegetarians struggle to feel understood and respected in a meat-eating culture, where some of their most pressing concerns and cherished beliefs are invisible, and where they are often met with defensiveness when they try to talk about the issue. They can become frustrated and struggle to feel connected with meat eaters. And meat eaters can feel disconnected from vegans and vegetarians whose beliefs they don't fully understand and whose frustration may spill over into their interactions. The good news is that relationship and communication breakdown among vegans, vegetarians, and meat eaters is not inevitable, and it is reversible. With the right tools, healthy connections can be cultivated, repaired, and even strengthened. In *Beyond Beliefs*, internationally recognized food psychology expert and longtime relationship coach Dr. Melanie Joy provides easy-to-understand, actionable advice so you can:

- Learn the principles and tools for creating healthy relationships
- Understand how to communicate about even the most challenging topics effectively
- Recognize how the psychology of being vegan/vegetarian or of being a meat eater affects your relationships with others, and with yourself

Living Among Meat Eaters Carol J. Adams, 2008-11-01 If you are one of the over twenty million Americans who have adopted vegetarianism, you know that living with and eating with meat eaters can present a myriad of difficult issues. Summer barbecues, Thanksgiving dinner, or even a simple business lunch can be cause for discussions questioning vegetarianism as a lifestyle choice—leading at best to awkward situations and at worst to anger and defensiveness. Beyond these often-tense encounters, simple day-to-day tasks such as grocery shopping and preparing the evening meal can be tough, especially when your husband, wife, partner, or child doesn't share your commitment to living as a vegetarian. In this bold and original book, Carol J. Adams offers real-life advice that vegetarians can use to defuse any situation in which their dietary choices may be under attack. She suggests viewing meat eaters as blocked vegetarians. Always insightful, this practical guide is full of self-tests, strategies, meditations on vegetarianism, and tips for dining out and entertaining at home when meat eaters are on the invite list. Offering more than fifty of Carol Adams's favorite vegetarian recipes, *Living Among Meat Eaters* is sure to become every vegetarian's most trusted source of support and information.

Vegan Diet Melissa Young, 2017-08-08 For thousands of years, there have been civilizations which have disregarded the flesh of animals as food. This has brought them into conflict with those who eat meat; often in good humor, but occasionally boiling over and becoming heated. With veganism came a new way of thinking which also excluded animal by-products, such as eggs, cheese, and honey from the diet, but controversy and resistance to this way of life has never been far away. Now, with *How Vegans and Carnivores Can Live in Harmony*, comes a book which looks at how we can be so ideologically different, just from the things we eat, and still learn to live side by side and get along. Filled with practical methods for interpersonal mediation and perspectives that help understanding and overcoming these conflicts, the mission is to gain an understanding of the points that each side of the argument has and thereby bring about greater harmony between the opposing groups. There is no judgement passed on either way of life and the book is written with empathy and in a rational and balanced way, aimed at mediation rather than confrontation.

Food for Thought Steve F. Sapontzis, 2004-05 For anyone who has ever wondered about the ethics of killing animals for food, this is the definitive collection of essays on the ethical debate. Written by internationally recognized scholars on both sides of the debate, the provocative articles here compiled will give vegetarians and meat-eaters a thorough grounding in all aspects of this controversial issue. After an introduction to the nature of the debate by editor Steve F. Sapontzis, Daniel Dombrowski reviews the history of vegetarianism. There follows a discussion of health issues and what anthropology has to tell us about human diet. Also included are the classic cases for vegetarianism from philosophers Peter Singer and Tom Regan, and new essays rebutting those classic positions from humanists Roger Scruton and Carl Cohen, among others. Various scholars then examine religious teachings about eating animals, which are drawn from Judaism, Christianity, and Islam, as well as Native American and Eastern traditions. Finally, Carol J. Adams, Deanne Curtin, and Val Plumwood, among

other outstanding advocates, debate the ethics of eating meat in connection with feminism, environmentalism, and multiculturalism. Containing virtually a Who's Who of philosophers, social critics, environmentalists, feminists, and religious scholars who have participated in the vegetarianism debate over the past quarter century, this outstanding anthology of expert articles, most of them new, provides the latest thinking on a subject of increasing public interest.

Vegans Are Tastier Joe DeMarco, 2011-04 Take an evolutionary journey through time and space in an unexpected vegan book that includes branding, hunting, spanking, torture, death and cannibalism. 21st Century Historian (Gentile Rainn): On occasion, before dying out and destroying themselves, the meat-eaters were seen hanging around back alleys of pubs drinking and fighting, sometimes sodomizing each other. 21st Century Historian (Herb Dean): If you look at things with hindsight, the meat-eaters never really had a chance. I mean, they were so hypocritical to the point where they would have one animal, whom they loved and cared for, living with them (Some of these animals were referred to as dogs. Note the dyslexic reference to God), and in the same moment would bleed and suffer another animal so they could devour its charred flesh for supper. Local Vegan (Said Huster): The idea that vegetarians and meat-eaters were both Homo sapiens is a post-mortem thought gone the way of the moo-cow. Homo sapiens were by nature very self-gratifying. In other words, they didn't care what they murdered or whom they hurt in crimes of hunger and passion. They acted very cruelly towards one another. Religions were developed to try to right these instinctual behaviors, but these religions did little to deter most Homo sapiens hell-bent on self-delusions of pride. Sometime around the turn of the twenty-fourth century, the first true Homo nexus was born. (See also Homo vegetare.) 21st Century Historian (Herb Dean): Moo-cows became extinct, though it is unknown whether this happened before or after the demise of the human (meat-eater) omnivore. A strain of CuuD Disease (almost always spelled capital C, lower case u, lower case u, capital D), a mutation of mad cow disease, killed roughly 99 percent of the cows, roughly two-thirds of the carnivores on the land, and most human omnivores. It is believed the other human omnivores destroyed themselves through wars, terrorist acts and unhealthy diets, or starved to death rather than eat vegetables. 21st Century Historian (Willow Whittier): It is said the last meat-eater died sometime around the turn of the 23rd century. His name was said to have been Ronald McDonald.
