Pediatric and Adolescent Gynecology Sarah M. Creighton, Adam Balen, Lesley Breech, Lih-Mei Liao, 2018-02-08

Pediatric and adolescent gynecology (PAG) is recognized as a specialist area and clinicians working in PAG need specific expertise. A wide spectrum of conditions needs to be addressed, ranging from simple disorders which respond to basic treatment to complex congenital anomalies with a genetic origin and life-long health consequences. Investigations must be appropriate and treatment should reduce symptoms and distress whilst optimizing gynecological and reproductive potential. Centered upon a series of common clinical presentations, this book includes stepwise guidance on the initial investigations, management, and treatment options. Guidance is supported by the most up-to-date evidence-base, written by clinicians with dedicated clinical and research experience in PAG. New techniques - such as laparoscopic surgery - are included and the importance of the psychological assessment of children with specific PAG disorders is highlighted. The book also includes an authoritative chapter on safeguarding - recognizing the unique opportunity for gynecologists in child protection.

Female Genital Tract Congenital Malformations Grigoris F. Grimbizis, Rudi Campo, Basil C. Tarlatzis, Stephan

Gordts, 2015-01-23 Female genital malformations represent miscellaneous deviations from normal anatomy. With a prevalence of approximately 6% in the general population, they might be associated with health problems, potentially dangerous complications or poor reproductive outcome depending on the type and the degree of the anatomical abnormality. During the last two decades the better understanding of their pathogenesis, the availability of new non-invasive techniques for their diagnosis and the increased experience from their treatment have radically changed their management. A new, clinically oriented classification system has now been developed facilitating their evidence-based appraisal. It is a reality that the management of female genital malformations has changed rapidly during the last few years from an experience based and mainly descriptive field to a scientific evidence-based one. This book presents all uterine, cervical and vaginal anomalies in a systematic way and the new ESHRE/ESGE classification system utilised for their categorization. In addition, their

embryogenesis and etiology are summarized. The diagnostic work-up of women with female genital malformations is reviewed in an evidence-based fashion and taking into account the availability of new non-invasive diagnostic methods. The treatment strategy and the therapeutic alternatives to restore health and reproductive problems associated with their presence are critically reviewed.

The Health Experiences of Mid-life Women with Mayer-Rokitansky-Küster-Hauser (MRKH) Syndrome Anna Marie Schmidt,2007 This qualitative study explored the health experiences of mid-life women with Mayer-Rokitansky-Küster-Hauser syndrome (MRKH) throughout their lifespan ... Semi-structured interviews of ten women with MRKH, ages 34 to 58, were conducted via e-mail. Fourteen themes were identified in the physiological, psychological, sociocultural, developmental, and spiritual domains; among these are mystery, shock, isolation, feeling like a freak, disrupted relationships, and anger with God. Four themes emerged regarding experiences with health care providers: insensitivity, caring, control and lack of knowledge. Various coping methods were reported, including the realization in mid-life that MRKH has been a gift, in some ways. Providers tend to focus on the physiological aspects of MRKH, while women identify other aspects as most distressing. This study also addresses the role of nursing in the management of MRKH and includes a discussion of evidence-based implications for practice.--leaf v.

the emergency care of women. Short chapters emphasize key points of diagnosis and management. Coverage is divided into three parts: general information, obstetrical care, and gynecologic issues.

Online Intersex Communities Brian Still, 2008 Brian Still's rhetorical analysis of a select number of key intersex web sites, supplemented with interviews of leading intersex activists and scholars, allows us to take a previously unexplored critical approach to comprehending the medicalization of intersexuality as well as the online communities that have, in the ongoing production of themselves, shaped productive resistance to it. Drawing on the ideas of Arjun Appadurai, Michel Foucault, Judith Butler, and also Stuart Hall and Paul du Gay, Still points out that because society values (perhaps now more than before) the words of wounded storytellers, or those who do not treat but have been treated (and in many cases traumatized), then intersex activists can speak with a measure of newfound authority, taking advantage of a media capable of disseminating the meanings they create so that they are more accessible and, consequently, more influential in re-shaping what it means to be normal.--BOOK JACKET.
