The Hardest Thing I'll Ever Do Linda Guebert, 2013-05 In *The Hardest Thing I'll Ever Do*, Linda Guebert shares her personal grief journey following the sudden death of her husband only nine months after they were married. At times heartrending, occasionally funny, her compelling account moves us through sorrow, anger and despair to renewed hope and commitment to life. A powerful story of healing and personal growth, *The Hardest Thing I'll Ever Do* is a valuable resource for those who have suffered the loss of someone they love - and for those who strive to understand grief and offer support to others.

Archaeological Chemistry A. M. Pollard, Carl Heron, 2008 The application of chemistry within archaeology is an important and fascinating area. It allows the archaeologist to answer such questions as what is this artefact made of?, where did it come from? and how has it been changed through burial in the ground?, providing pointers to the earliest history of mankind. *Archaeological Chemistry* begins with a brief description of the goals and history of archaeological science, and the place of chemistry within it. It sets out the most widely used analytical techniques in archaeology and compares them in the light of relevant applications. The book includes an analysis of several specific archaeological investigations in which chemistry has been employed in tracing the origins of or in preserving artefacts. The choice of these investigations conforms to themes based on analytical techniques, and includes chapters on obsidian, ceramics, glass, metals and resins. Finally, it suggests a future role for chemical and biochemical applications in archaeology. *Archaeological Chemistry* enables scientists to tackle the fundamental issues of chemical change in the archaeological materials, in order to advance the study of the past. It will prove an essential companion to students in archaeological science and chemistry, field and museum archaeologists, and all those involved in conserving human artefacts.

Sonic Boom Peter Ames Carlin, 2025-10-16 From journalist Peter Ames Carlin, *Sonic Boom* captures the rollicking story of the most successful record label in the history of popular music, Warner Bros. Records, and the remarkable secret to its meteoric rise. The roster of Warner Brothers Records and its subsidiary labels reads like the roster of the Rock & Roll Hall of Fame: Jimi Hendrix, the Grateful Dead, Joni Mitchell, Neil Young, James Taylor, Fleetwood Mac, the Eagles, Prince, Van Halen, Madonna, Tom Petty, R.E.M., Red Hot Chili Peppers, and dozens of others. But the most compelling figures in the Warner Bros. story are the sagacious Mo Ostin and the unlikely crew of hippies, eccentrics, and enlightened execs. Ostin and his staff transformed an out-of-touch company, revolutionized the industry, and, within just a few years, created the most successful record label in the history of the American music industry. How did they do it? One day in 1967, the newly tapped label president Mo Ostin called his team together to share his grand strategy: he told them to stop trying to make hit records/ Let's just make good records and turn those into hits. With that, Ostin ushered in a counterintuitive model that matched the counterculture. His offbeat crew recruited outsider artists and gave them free rein, while rejecting out-of-date methods of advertising, promotion, and distribution. And even as they set new standards for in-house weirdness, the upstarts' experiments and innovations paid off, to the tune of hundreds of legendary hit albums. Warner Bros Records conquered the music business by focusing on the music rather than the business. Their story is as raucous as it is inspiring—pure entertainment that also maps a route to that holy grail: love and money. Includes black-and-white photographs
