Rachel Sandford

The Next Big Thing Barbara Gottfried Hollander, 2012-07-15 Many of the richest young entrepreneurs in the world have earned their money by developing digital products. Digital products are goods and services that can be stored, used, and delivered in an electronic format. Today, they include a wide variety of products, such as apps, Web sites, blogs, games, and online social networks. Technological advancements—including the continual release of new platforms—provide a growing number of opportunities for young digital entrepreneurs. The author explains how to develop a concept for a digital product that users will love. In addition, chapters cover practical matters involved in creating a start-up, including evaluating the market, writing a business plan, and protecting one's intellectual property. Stories of real-life teen entrepreneurs enliven the text and inspire the reader.

Better, Stronger, Faster Daniel Gross, 2012-05-08 Financial meltdown, a deep recession, and political polarization—combined with strong growth outside the United States—have led to a global bubble of pessimism surrounding America's economic prospects. Bloated with debt, and outpaced by China and other emerging markets, the United States has been left for dead as an economic force. But in this time of grim predictions, Daniel Gross, Yahoo! financial columnist and author of *Dumb Money*, offers a refreshingly optimistic take on our nation's economic prospects, examining the positive trends that point to a better, stronger future. Widely respected for his Newsweek and Slate coverage of the crash and the recovery, Daniel Gross shows that much of the talk about decline is misplaced. In the wake of the crash, rather than accept the inevitability of a Japan-style lost decade, America's businesses and institutions tapped into the very strengths that built the nation's economy into a global powerhouse in the first place: speed, ingenuity, adaptability, pragmatism, entrepreneurship, and, most significant, an ability to engage with the world. As the United States wallowed in self-pity, the world continued to see promise in what America has to offer—buying exports, investing in the United States, and adopting American companies and business models as their own. Global growth, it turns out, is not a zero-sum game. *Better, Stronger, Faster* is an account of the remarkable reconstruction and reorientation that started in March 2009, a period that Gross compares to March 1933—as both marked the start of unexpected recoveries. As the U.S. public sector undertook aggressive fiscal and monetary actions, the private sector sprang into action. Companies large and small restructured, tapped into long-dormant internal resources, and invested for growth, at home and abroad. Between 2009 and 2011, as Europe struggled with

a cascade of crises, the U.S. got back on its feet—and began to run. Through stories of innovative solutions devised by policy makers, businesses, investors, and consumers, Gross explains how America has the potential to emerge from this period, not as the unrivaled ruler of the global economy but as a healthier leader and an enabler of sustainable growth.

Digital Mental Health Research: Understanding Participant Engagement and Need for User-centered Assessment and Interventional Digital Tools Abhishek Pratap, Patricia A. Arean, Benjamin Nelson, Brenna Renn, Abigail Ortiz, 2023-08-15 Mental health researchers are increasingly looking towards digital health tools to gather day-to-day lived experiences of people living with mental health conditions, by using apps and wearable devices complementing episodic clinical assessments. One of the key goals of collecting longitudinal real-world multimodal data (RWD) is to help build personalized computational models that may help explain the heterogeneity in clinical outcomes, mechanisms of action, and pathophysiology of mental health disorders across individuals.

Retail Market Study 2013 Marc-Christian Riebe, 2013-02-01 The last year's Retail Market Study reached 20'000 readers. This year we covered 145 Shopping Cities, 500 Shopping Malls, 750 High Streets, 1'000 Retailers & 2'000 Store Openings on 976 pages.

Intangible assets and value capture in global value chains: the smartphone industry World Intellectual Property Organization, Jason Dedrick, Kenneth L. Kraemer, 2017 This report uses data on individual smart phones as well as industry data to identify which smartphone firms capture the most value. It finds that Apple captures most of the industry profits, thanks to its high prices, large profit margins and the volume of iPhone sales worldwide. Apple's success is explained as a result of its ability to develop its own intellectual property (IP) and take advantage of IP created by suppliers through a strategy of selling only a few models at high prices compared to competitors.
