

Best S On Influence

Anthony S. Fauci

Oscar Buzz and the Influence of Word of Mouth on Movie Success Owen Eagan, 2020-03-27 This book explores why word of mouth is the most important determinant of a movie's success. Beginning with a discussion of the enduring appeal of movies, and why the box office has survived the disruption of television and will likely survive the disruption of streaming services, Owen Eagan goes on to discuss the unpredictable nature of movies and ways to mitigate their risk. His astute analysis sheds light on the role of film festivals, film critics, Oscar campaigns, and word of mouth in influencing a film's success. Eagan concludes with a summary of why word of mouth is the most influential among all the variables that affect a film's outcome. Expertly synthesizing quantitative analyses of box office data with illuminating insights from industry experts, this concise and engaging book presents findings with important implications for scholars, industry insiders and marketing professionals alike.

Social Influence Joseph P. Forgas, Kipling D. Williams, 2016-12-05 Social influence processes play a key role in human behavior. Arguably our extraordinary evolutionary success has much to do with our subtle and highly developed ability to interact with and influence each other. In this volume, leading international researchers review and integrate contemporary theory and research on the many ways people influence each other, considering both explicit, direct, and implicit, indirect influence strategies. Three sections examine fundamental processes and theory in social influence research, the role of cognitive processes and strategies in social influence phenomena, and the operation of social influence mechanisms in group settings. By applying the latest research to a wide range of interpersonal phenomena, this volume greatly advances our understanding of social influence mechanisms in strategic social interaction, and should be of interest to all students, researchers and practitioners interested in the dynamics of everyday interpersonal behavior.

Flexible Ureteroscopy Guohua Zeng, Kandarp Parikh, Kemal Sarica, 2022-09-15 This book describes basic information and current applications of flexible ureteroscopy in diagnosis and treatment of renal stones, covering topics on history, anatomy, preoperative preparation, clinical operation, and training for beginners. Basic as well as advanced techniques of flexible

ureteroscopy for large renal stones, pediatric patients, and in special situations are presented in details with representative cases and high-resolution illustrations. In addition, disposable, wireless, and robotic flexible ureteroscopy are introduced in details to help readers to learn advanced techniques. It will be a useful reference for urologists, especially for those who are interested in improving their flexible ureteroscopy skills in clinical practice.

Optimization Problems in Self-Organizing Networks Steffen Wolf, 2010 Modern computer networks or wireless ad-hoc networks offer a wide range of interesting optimization problems. Usual optimization goals are the minimization of the message delay in a Peer-to-Peer system or the minimization of the energy consumption of a wireless network. This thesis presents different kinds of algorithms to solve such optimization problems. Starting from the mathematical formulations for these problems, various global view optimization algorithms are presented. These algorithms are based on evolutionary algorithms and local search or similar heuristics. They can be used to quickly find near-optimal solutions, if a global view of the network is possible. As the participants in a computer network or a wireless ad-hoc network are autonomous nodes, distributed algorithms can be designed that enable these nodes to collectively solve the optimization problem. Four distributed algorithms are formulated and evaluated in this thesis, thus laying grounds for distributed optimization of networks. Using these algorithms, the network can be modelled as a self-optimizing network and the optimization problem can be approached without global view.

Computational Intelligence Kurosh Madani, António Dourado, Agostinho Rosa, Joaquim Filipe, Janusz Kacprzyk, 2015-11-19 The present book includes a set of selected extended papers from the fifth International Joint Conference on Computational Intelligence (IJCCI 2013), held in Vilamoura, Algarve, Portugal, from 20 to 22 September 2013. The conference was composed by three co-located conferences: The International Conference on Evolutionary Computation

Theory and Applications (ECTA), the International Conference on Fuzzy Computation Theory and Applications (FCTA), and the International Conference on Neural Computation Theory and Applications (NCTA). Recent progresses in scientific developments and applications in these three areas are reported in this book. IJCCI received 111 submissions, from 30 countries, in all continents. After a double blind paper review performed by the Program Committee, only 24 submissions were accepted as full papers and thus selected for oral presentation, leading to a full paper acceptance ratio of 22%. Additional papers were accepted as short papers and posters. A furtherselection was made after the Conference, based also on the assessment of presentation quality and audience interest, so that this book includes the extended and revised versions of the very best papers of IJCCI 2013. Commitment to high quality standards is a major concern of IJCCI that will be maintained in the next editions, considering not only the stringent paper acceptance ratios but also the quality of the program committee, keynote lectures, participation level and logistics.
