It offers examples of the new trends and the most recent technologies and approaches in the industry of alcoholic drinks. - Includes a variety of trending ingredients for novel beverage production - Provides different approaches for the identification of adulterations and contaminants in alcoholic beverages - Includes research examples and applications of different products, such as beer, wine, and spirits

Novel Approaches of Nanotechnology in Food Alexandru Grumezescu, 2016-05-13 *Novel Approaches of Nanotechnology in Food*, a volume in the Nanotechnology in the Agri-Food Industry series, represents a summary of the most recent advances made in the field of nanostructured materials that have significant impact on the agri-food industry. Because the current food market needs innovation, nanotechnology coupled with novel interdisciplinary approaches and processing methods has enabled important advances that have the potential to revolutionize agri-food sector. Nanotechnology can serve to resolve challenges faced by the food and bioprocessing industries for developing and implementing systems that can produce qualitative and quantitative foods that are safe, sustainable, and ecofriendly. This book is a valuable resource for scientists, researchers, and engineers in food science and biotechnology fields, as well as students who want information on cutting-edge technologies. - Provides worldwide research applications of nanomaterials and nanotechnology useful in food research - Presents analytical methods for enzyme immobilization onto magnetic nanoparticles - Includes strategies of behavior and structure function to increase application enhancement and control - Discusses nanomaterial regulations and for consumer protection awareness

Safety evaluation of certain food additives : Prepared by the ninety-second meeting of the Joint FAO/WHO Expert Committee on Food Additives (JECFA) World Health Organization, Food and Agriculture Organization of the United Nations, 2023-06-23 The monographs contained in this volume were prepared at the ninety-second meeting of the Joint Food and Agriculture Organization of the United Nations (FAO)/World Health Organization (WHO) Expert Committee on Food

Additives (JECFA), which met virtually from 7–18 June 2021. These monographs summarize the data on specific food additives reviewed by the Committee.

Reports on Food Safety 2005 Peter Brandt, 2007-10-28 Food monitoring is a tool to recognize and avoid potential risks to consumers. While the states enforce food law primarily through suspicion and risk-based investigations, food monitoring is a system of repeated representative measurements and evaluations of undesirable substances and contaminants in foods. The food monitoring programme is a joint investigative programme by the German Federal Government and the federal states which is complementary to official food control as carried out by the states. This report provides the results of the analysis in 2005 of more than 5000 samples of 50 foods or food groups of domestic and foreign origin.
