Hoodwinked John K. Amanchukwu,2024-05-28 Ten lies dominate American public life. It's time for some explosive truth-telling. Millions of Americans have fallen for ten big lies about God, man, and our country. These false dogmas, ferociously enforced, are bringing our country to its knees. John Amanchukwu, a pastor and truth-teller, is determined to smash these lies. His compelling stand against gender ideology and race-baiting at school board meetings across the country has attracted a huge online audience and made him a leading voice for biblical justice. In this powerful new book, Amanchukwu names the ten lies that have beguiled our country and takes them apart piece by piece: 1 America is a racist nation 2 Being against abortion is a white Evangelical worldview 3 Capitalism should be blamed for poverty 4 Christianity is the white man's religion 5 Debt can be canceled 6 Disagreement equals hate 7 Transgenders are under attack 8 If you're anti-pornography, you're a book banner. 9 The Bible isn't political 10 The Church is non-essential Lies are no match for the Truth, but they won't go away by themselves. Let John Amanchukwu give you the training and ammunition you need to become a leader in the fight for our country.

An Artificial Revolution Ivana Bartoletti,2020-05-20 AI has unparalleled transformative potential to reshape society, our economies and our working lives, but without legal scrutiny, international oversight and public debate, we are sleepwalking into a future written by algorithms which encode racist, sexist and classist biases into our daily lives &- an issue that requires systemic political and cultural change to productively address. Leading privacy expert Ivana Bartoletti exposes the reality of the AI revolution, from the low-paid workers who toil to train algorithms to recognise cancerous polyps, to the rise of techno-racism and techno-chauvinism and the symbiotic relationship between AI and right wing populism. An Artificial Revolution is an essential primer to understand the intersection of technology and geopolitical forces shaping the future of civilisation. Endorsements confirmed from leading UK political figures including David Lammy MP, Yvette Cooper MP, Paul Mason, Frances O'Grady and Ayesha Hazarika A primer for anyone who is interested to learn more about the relation between AI and ethics, data and privacy, corporate power, politics and tech Ivana is a sought-after commentator who has appeared on flagship news programmes on the BBC, Sky and other major broadcasters as a privacy and AI ethics expert, who also speaks at conferences around the world on AI and privacy

The Feminist and The Sex Offender Erica R. Meiners, Judith Levine, 2020-04-28 With analytical clarity and narrative

force, The Feminist and the Sex Offender contends with two problems that, despite their inextricable linkages, are typically siloed in the era of #MeToo and mass incarceration: sexual and gender violence, on the one hand, and the state's unjust, ineffective, and soul-destroying response to it. Levine and Meiners ask if it's possible to confront the culture of abuse, to hold harm-doers accountable, without recourse to a criminal justice system that redoubles injuries, fails survivors, and retrenches the conditions that made such abuse possible. Drawing on personal experience, reportage, and history, The Feminist and the Sex Offender develops an intersectional feminist approach to ending sexual violence. It maps with considerable detail the unjust sex offender regime while highlighting the alternatives we urgently need.

The Routledge Handbook of Smart Technologies Heinz D. Kurz, Marlies Schütz, Rita Strohmaier, Stella S. Zilian, 2022-02-27 This Handbook provides a thorough discussion of the most recent wave of technological (and organisational) innovations, frequently called "smart" and based on the digitisation of information. The acronym stands for Self-Monitoring, Analysis and Reporting Technology. This new wave is one in a row of waves that have shaken up and transformed the economy, society and culture since the first Industrial Revolution and have left a huge impact on how we live, think, communicate and work: they have deeply affected the socioeconomic metabolism from within and humankind's footprint on our planet. The Handbook analyses the origins of the current wave, its roots in earlier ones and its path-dependent nature; its current forms and actual manifestations; its multifarious impact on economy and society; and it puts forward some guesstimates regarding the probable directions of its further development. In short, the Handbook studies the past, the present and the future of smart technologies and digitalisation. This cutting-edge reference will appeal to a broad audience, including but not limited to, researchers from various disciplines with a focus on technological innovation and their impact on the socioeconomic system; students across different fields but especially from economics, social sciences and law studying questions related to radical technological change and its consequences, as well as professionals around the globe interested in the debate of smart technologies and socioeconomic transformation, from a multi- and interdisciplinary perspective.

Fake Science Austin Ruse, 2017-07-17 If you listen to any political argument, you're eventually bound to hear something like: The science is settled on this. Or: Just look at the statistics! Or: There have been studies that say... You'd think we were living in the golden age of science and reason. But the truth is far more sinister, says Austin Ruse. We're actually living in the age of the low information voter, easily mislead by all-too-convincing false statistics and studies. In Fake Science, Ruse debunks so-called facts used to advance political causes one after the other, revealing how poorly they stand up to actual science.

Hide Your Children Liz Wheeler, 2023-09-26 Having conquered all the major institutions of our culture, the left is closing in on its final frontier—your children. In this new book, Liz Wheeler exposes where the forces of wokeness are at

work and explains how parents can fight back for a change. Everythingis on the line. Despite the occasional victory, conservatives are on the defensive on every front of the culture wars, especially America's schools. Planned Parenthood is funding gender theory indoctrination, groomer teachers are introducing youngsters to pornography, Disney executives are bragging about their "queerness agenda," and teacher's unions are poisoning young minds with racism. If someone doesn't stand up and fight, these ideas will be the norm for a new generation. A distressing number of parents refuse to see how depraved our schools have become. The next generation will determine the fate of the American experiment in ordered liberty. Will they pass it on to their children, or will we lose our nation forever? Parents and their allies must go on the offensive in this existential fight. Fortunately, they have the truth on their side. It is not too late.

Success on the Tenure Track Cathy Ann Trower,2012-08-15 Satisfaction ratings from tenure-track faculty at 200 institutions across the country reveal best practices and the key elements of workplace success. Landing a tenure-track position is no easy task. Achieving tenure is even more difficult. Under what policies and practices do faculty find greater clarity about tenure and experience higher levels of job satisfaction? And what makes an institution a great place to work? In 2005–2006, the Collaborative on Academic Careers in Higher Education (COACHE) at the Harvard Graduate School of Education surveyed more than 15,000 tenure-track faculty at 200 participating institutions to assess their job satisfaction. The survey was designed around five key themes for faculty satisfaction: tenure clarity, work-life balance, support for research, collegiality, and leadership. Success on the Tenure Track positions the survey data in the context of actual colleges and universities and real faculty and administrators who talk about what works and why. Best practices at the highest-rated institutions in the survey—Auburn, Ohio State, North Carolina State, Illinois at Urbana-Champaign, Iowa, Kansas, and North Carolina at Pembroke—give administrators practical, proven advice on how to increase their employee satisfaction. Additional chapters discuss faculty demographics, trends in employment practices, what leaders can do to create and sustain a great workplace for faculty, and what the future might hold for tenure. An actively engaged faculty is crucial for American higher education to retain its global competitiveness. Cathy Ann Trower's analysis provides colleges and universities a considerable inside advantage to get on the right track toward a happy, productive workforce.

Transforming Science and Engineering Abigail J. Stewart, Janet E. Malley, Danielle LaVaque-Manty, 2007 In 2001, the National Science Foundation's ADVANCE Institutional Transformation program began awarding five-year grants to colleges and universities to address a common problem: how to improve the work environment for women faculty in science and engineering. Drawing on the expertise of scientists, engineers, social scientists, specialists in organizational behavior, and university administrators, this collection is the first to describe the variety of innovative efforts academic institutions around the country have undertaken. Focusing on a wide range of topics, from how to foster women's academic success in small teaching institutions, to how to use interactive theater to promote faculty reflection about departmental culture, to how a

particular department created and maintained a healthy climate for women's scientific success, the contributors discuss both the theoretical and empirical aspects of the initiatives, with emphasis on the practical issues involved in creating these approaches. The resulting evidence shows that these initiatives have the desired effects. The cases represented in this collection depict the many issues women faculty in science and engineering face, and the solutions that are presented can be widely accepted at academic institutions around the United States. The essays in Transforming Science and Engineeringillustrate that creating work environments that sustain and advance women scientists and engineers benefits women, men, and underrepresented minorities. Abigail J. Stewart is Sandra Schwartz Tangri Distinguished University Professor of Psychology and Women's Studies at the University of Michigan and author or editor of several books, including Theorizing Feminism: Parallel Trends in the Humanities and Social Sciences and Feminisms in the Academy, Janet E. Malley is a psychologist and Associate Director of the Institute for Research on Women and Gender at the University of Michigan. Danielle LaVaque-Manty is Research Associate at the Institute for Research on Women and Gender at the University of Michigan. Cover photo: Joanne Leonard With a foreword by Mary Sue Coleman, President of the University of Michigan If you have thrown up your hands in despair after trying to retain women science and engineering in the academy, read this book. It offers detailed descriptions of a wide array of tried-and-true programs that have been tested out by the NSF ADVANCE program. --- Joan C. Williams, 1066 Foundation Chair & Distinguished Professor of Law Director, Center for WorkLife Law University of California Solid and practical, this volume details the first years of NSF funded institutional change to remake gender dynamics inside U.S. science. What works? What doesn't? And why? ---Londa Schiebinger, John L. Hinds Professor of History of Science and Barbara D. Finberg Director, Michelle R. Clayman Institute for Gender Research at Stanford University, and author of Has Feminism Changed Science? This book's time has come. Transforming Science and Engineeringis important, and lots of people can learn from what has happened in the ADVANCE universities. ---Lotte Bailyn, Professor of Management, Behavioral and Policy Sciences Department, Sloan School of Management, MIT; author of Breaking the Mold: Redesigning Work for Productive and Satisfying Lives; and coauthor of Beyond Work-Family Balance: Advancing Gender Equity and Workplace Performance This collection profiles 16 NSF ADVANCE grant successes, sandwiched between an interview with Dr. Alice Hogan and Dr. Lee Harle's summary of cost-effective practices from ADVANCE programs, giving so many 'biggest bang for the buck' examples in so few pages that it will easily justify both the cost of the book and the reading time. Women and Inequality in a Changing World Hoda Mahmoudi, Jane L. Parpart, Kate Seaman, 2023-10-24 Women and Inequality in a Changing World explores the obstacles women continue to face to their equal participation in all areas of daily life—political, social, and economic—which persist despite the growth in the education of girls, large-scale social movements, and political waves. The volume widens and deepens understanding of women in relation to the inequalities they face, based

not only on gender, but also on race, class, religion, and more. It also highlights the progress that women have made, and how this progress contributes to the creation of more peaceful and prosperous societies. This interdisciplinary book brings together leading scholars and practitioners from across the globe to provide a wide range of perspectives and experiences, examine crucial questions, and offer new ideas and innovative solutions to increasing the role of women moving forward. This book will be of great interest to students and scholars of gender studies, women's studies, and political science, as well as practitioners working at the intersection of women and global issues.
