Globalisation and Human Rights for Democracy and Social Justice Joseph Zajda, Yvonne Vissing, 2025-04-29 This book analyses major discourses of human rights for democracy and social justice. The chapters contained in the book examine critically major issues confronting human rights for democracy and social justice both locally and globally. The chapters analyze the challenges that different societies are confronted with, as they attempt to implement, protect and defend democracy, cultural diversity and human rights in an ever-changing world, and culturally diverse environment. Topics covered include dimensional concerns for social justice and human rights and what to do about them, human rights for democracy and social justice, and celebrating cultural diversity in sport. The book will help readers to explore their own views and consider more broadly what may be in the best interests of a fair and just society, as envisioned in human rights treaties, human rights education in schools, and cultural diversity.

EBOOK: International and Comparative Human Resource Management Graham Hollinshead, 2009-11-16 International and Comparative Human Resource Management offers students a clear and contemporary introduction to issues in managing the human aspects of international organisations. International Human Resource Management (IHRM) has grown in significance as a field of study over the past decade, due to the internationalisation of business, freedom of movement of labour and capital, and international regulation of employment matters. This new book takes a fresh and distinctive approach, combining analysis of international HR policy and practice with detailed exposition of contexts and systems of HR in a selection of developed and developing countries.

Globalisation and Inclusive Schooling Joseph Zajda, 2023-04-25 This book analyses discourses of inclusive schooling and engaging motivational environments globally. It focuses on the student's identity, belonging, performance in the classroom, and the significance of cognitive, cultural, emotional and social capital to student's academic achievement. The book discusses and evaluates the shifts in methodological approaches to inclusive and engaging learning environments. It analyses topics such as the students' cultural identity and achievement, motivational strategies for creating engaging learning environment, the use of constructivist pedagogy for critical thinking, social constructivism, and values education in the classroom. The book also analyses and evaluates the shifts in methodological approaches to globalisation and inclusive schooling globally, and their impact on performing schools. It contributes in a very scholarly way, to a more holistic understanding of the nexus among globalisation, comparative education research, inclusive schooling and engaging learning environments.

Neoliberal Economic Policy and the Rise of Right-Wing Populism John Komlos, 2024-12-28 This edited volume explores and makes explicit the links between neoliberal economic policies and right-wing ideology. The book focuses on the case of

the US while situating these trends in the global political economy. The book brings together contributions from an interdisciplinary perspective, integrating economics, political science and sociology to examine the connections between the economic precarity generated by neoliberalism and the rise of the far right. The book argues that the creation of a flawed capitalist system has left a vacuum in policymakers' ability to understand the impact of economic policies on human welfare and mental health, and can be directly linked to a right-wing populist movement driven by the frustrations associated with the transition from an industrial to a post-industrial economy. Chapters consider the history of neoliberalism and comparative studies of socio-economic conditions, before tackling specific issues associated with neoliberal policy, such as the demise of unions, the decline in manufacturing jobs, the gig economy, trickle-down economics, income inequality and the rise of elites in America. This book will be of interest to a broad range of readers, including those in politics, economics, sociology, industrial organization and labour studies.

Internationalisation and Marketisation of Higher Education in the UK Zahra Kemiche, 2024-09-23 This timely volume sets out the author's novel concept of the Organic model of internationalisation, developed using participants' perceptions, lived experiences, and recommendations for a better sustainable future of HE, and explores its broader application in the context of higher education. Using the qualitative IPA (Interpretative Phenomenological Analysis) approach, chapters showcase the lived experiences and subjective perspectives of individuals around the paradox that internationalisation presents, the distorting effects of institutional power, and the market- and ethics-based concerns of internationalisation in higher education. Drawing on an in-depth empirical study conducted using participant observation and interviews with participants from three UK universities, the book proposes a framework for redefining the global discourse of HE through the Organic model and urges the need for a compromise between profit and ethics to the benefit of both organisations and individuals. The book thoroughly discusses racist practices and introduces the concepts of "xeno-racism" and "angelism", ensuring that the proposed approach is authentic and responsive to the diverse experiences of the student body. Showcasing a model with international potential and ramifications, this book will appeal to researchers, academics, and postgraduate students in higher education, internationalisation, and international study mobility. Practitioners and policymakers may also benefit from the volume.

Globalization: A Very Short Introduction Manfred Steger, 2013-04-04 'Globalization' has become one of the defining buzzwords of our time - a term that describes a variety of accelerating economic, political, cultural, ideological, and environmental processes that are rapidly altering our experience of the world. It is by its nature a dynamic topic - and this Very Short Introduction has been fully updated for a third edition, to include recent developments in global politics, the global economy, and environmental issues. Presenting globalization in accessible language as a multifaceted process encompassing global, regional, and local aspects of social life, Manfred B. Steger looks at its causes and effects, examines

whether it is a new phenomenon, and explores the question of whether, ultimately, globalization is a good or a bad thing. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

The Unlawful Society Paul Battersby,2014-08-05 Exploring the dynamics of law-making in a world where the pace of technological change is outstripping our capacity to capture new forms of transnational crime, this book uses the innovative concept of unlawfulness to examine the crimes of the global underworld, forming a unique analysis of global order in the twenty-first century.

Green Web-II Medani P. Bhandari,2022-09-01 In dealing with the IUCN, one must bear in mind that there never has been, and undoubtedly never will be, any other organization even remotely resembling it. Its peculiarities, subtleties and complexities are sometimes mind-boggling (Nicholson 1990 in Holdgate 1999: ix). Green Web-II investigates IUCN's role in global biodiversity conservation policy as well as in national program development in India, Pakistan, Nepal and Bangladesh. It explores how nature protection priorities and approaches are promoted or addressed by IUCN, an international organization, and how environment conservation policies are created and maintained in states with different capacities of South Asia. It also evaluates IUCN's competency in bio-diversity, climate change, nature conservation and environmental policy formulation at global, regional and country level. This study is the first detailed scholarly study on the IUCN as an organization as well as on its efforts in biodiversity conservation. This book adds to our knowledge, firstly by contributing to a small but growing body of work on the sociology of international organizations. IOs, especially International Governmental Organizations (IGOs), have long been the subject of mostly political science. Secondly, it applies a fuller sociological imagination to the study of IOs by critically exploring one of the largest and most active nature conservation organizations in the world. Thirdly, it also explores how the IUCN actually goes about building protectoral programs with individual member nations. Additionally, the book explores the recent development of the green economy (GE) concepts into IUCN's program planning today. The green economy initiative applies a people-first approach. Although the concept is relatively new, this research explores the theoretical development of a green economy and illustrates how this theory is applied in IUCN's program planning to program implementation.

Globalization Prof. Manfred B. Steger, 2023-12-04 A free ebook version of this title is available through Luminos, University of California Press's Open Access publishing program. Visit www.luminosoa.org to learn more. Since the end of the Cold War, globalization—the process and the idea—has been reshaping the world. Global studies scholarship has emerged to make sense of the transnational manifestations of globalization: economic, social, cultural, ideological, technological, environmental, and postcolonial. But a series of crises in the first two decades of the twenty-first century has put the neoliberal globalization system of the 1990s under severe strain. Are we witnessing a turn toward “deglobalization,” intensified by the COVID-19 pandemic and the war in Ukraine or a moment of “reglobalization,” spearheaded by digital technology? The contributors to this book employ transdisciplinary research to assess past developments, the current state, and future trajectories of globalization in light of today's dynamics of insecurity, volatility, and geopolitical tensions.

Rethinking Globalism Manfred B. Steger, 2004-10-26 What is the hottest American export since 9/11? The contributors to this provocative volume contend that it is Western style globalism—the dominant free market ideology that determines everything from most-favored-nation status to the declaration of war. In this much-needed post-September 11 analysis, an interdisciplinary team of authors shows how central concepts like globalization, liberty, free markets, and free trade are increasingly being subordinated to and lumped together with the war on terrorism led by the U.S. and its allies. The authors here—hailing from all five continents—contend that globalism is being adapted to particular social and political contexts in various parts of the world. Nonetheless, the impact of globalization with an ideological twist can be devastating as military operations and propaganda supplant transnational trade initiatives as the focal point of global exchange. And ironically, the post-9/11 framework contains a major ideological contradiction: Social forces otherwise profiting from expanded global mobility and interchange must come to grips with necessary limitations on certain aspects of globalization. This volume was handcrafted to outline the major lines of inquiry proposed for the new Globalization series, edited by Manfred B. Steger and Terrell Carver. Writing in accessible, engaging prose, the contributors to this anchor volume consider themselves critical globalization theorists who seek to provide readers with a better understanding of how dominant beliefs about globalization fashion their realities and how these ideas can be changed to bring about more equitable social arrangements. Books in the series will share the same perspective and goals.
