Kathleen W. Peters, John McClain

Sacri monti del Piemonte e della Lombardia ,2007

Sacred Species and Sites Gloria Pungetti, Gonzalo Oviedo, Della Hooke, 2012-07-19 It is being increasingly recognised that cultural and biological diversity are deeply linked and that conservation programmes should take into account the ethical, cultural and spiritual values of nature. With contributions from a range of scholars, practitioners and spiritual leaders from around the world, this book provides new insights into biocultural diversity conservation. It explores sacred landscapes, sites, plants and animals from around the world to demonstrate the links between nature conservation and spiritual beliefs and traditions. Key conceptual topics are connected to case studies, as well as modern and ancient spiritual insights, guiding the reader through the various issues from fundamental theory and beliefs to practical applications. It looks forward to the biocultural agenda, providing guidelines for future research and practice and offering suggestions for improved integration of these values into policy, planning and management.

Sacred Views of Saint Francis Kathleen W. Peters, John McClain, 2020 Overlooking Lago di Orta in the foothills of the Northern Italian Alps, the Renaissance-era Sacro Monte di Orta (a UNESCO World Heritage site) is spectacle and hagiography, theme park and treatise. Sacro Monte di Orta is a sacred mountain complex that extolls the life of St. Francis of Assisi through fresco, statuary, and built environment. Descending from the vision of the 16th-century Archbishop Carlo Borromeo, the design and execution of the chapels express the Catholic Church's desire to define, or, perhaps redefine itself for a transforming Christian diaspora. And in the struggle to provide a spiritual and geographical front against the spread of Protestantism into the Italian peninsula, the Catholic Church mustered the most powerful weapon it had: the widely popular native Italian saint, Francis of Assisi. *Sacred Views of Saint Francis: The Sacro Monte di Orta* examines this important pilgrimage site where Francis is embraced as a ne plus ultra saint. The book delves into a pivotal moment in the life of the Catholic Church as revealed through the artistic program of the Sacro Monte's twenty-one chapels, providing a nuanced understanding of the role the site played in the Counter-Reformation. The Sacro Monte di Orta was, in its way, a new hagiographical text vital to post-Tridentine Italy. *Sacred Views* provides research and analysis of this popular, yet critically neglected Franciscan devotional site. *Sacred Views* is the first significant scholarly work on the Sacro Monte di Orta in

English and one of the very few full-length treatments in any language. It includes a catalogue of artists, over one hundred photographs, maps, short essays on each chapel, and longer essays that examine some of the most significant chapels in greater detail.

Graphical Heritage Luis Agustín-Hernández,Aurelio Vallespín Muniesa,Angélica Fernández-Morales,2020-05-11 This book presents the proceedings of the 18th International Conference on Graphic Design in Architecture, EGA 2020, focusing on heritage – including architectural and graphic heritage as well as the graphics of heritage. This first volume gathers selected contributions covering theories, and new technologies and findings to help shed light on current questions related to heritage. It features original documentation studies on historical archives, 3D and solid representation of architectural objects, as well as virtual graphic representation and applications of augmented reality, all documenting and/or reconstructing the present, past and future of architectural objects. As such, this book offers extensive and timely information to architectural and graphic designers, urban designers and engineers, and industrial designers and historians.

The Pillars of the Italian Economy Marco Fortis,2016-10-27 This book offers a detailed analysis of the key sectors in the Italian economy, with the focus especially on areas in which the economy excels, such as the automatic packaging machinery sector, pharmaceutical production, the food and wine industry, and tourism. The book explains how, contrary to widespread opinion, Italy is one of the world's most competitive countries in foreign trade, as confirmed by a new index compiled by Fondazione Edison that highlights its strengths and top traded products. The main characteristics of the Italian productive system, which is primarily composed of SMEs, are documented, and a map illustrating the importance of the various industrial districts is proposed, identifying their sectors of specialization, historical roots, and development. The principal steps in Italy's industrialization over the past 150 years are then outlined, in particular for the manufacturing system – the main driver of Italian exports. In-depth analyses of the mechanical industry and the machinery sector follow. In combining meticulous analysis of statistical data with a historical perspective, this book will appeal to all with an interest in the Italian economy.
