San Carlo Alle Quattro Fontane Leo Steinberg, 1960

Borromini (Revised) Anthony Blunt, 1979 At first glance, Borromini's architecture is a flight of Baroque fantasy, the product of limitless imagination. A closer look reveals an almost ruthlessly logical geometry underlying his creation. Blunt shows how the combination of revolutionary inventiveness and intellectual control gives Borromini's work its great appeal.

San Carlino alle Quattro Fontane Paola Degni, 1996

Historical Dictionary of Francesco Borromini Lilian H. Zirpolo, 2025-07-10 Francesco Borromini was one of the most notable architects of the 17th century, and though he fell into disfavor by the end of the following century, today he is classified as one of the most innovative architects in history. Although Borromini enjoyed a highly successful career, he was already subjected to intense criticism during his lifetime. Criticism continued well after Borromini's death, when the most often used word to assess his work was bizarre. Critics begrudged the fact that, in their view, Borromini ignored the traditional rules of architecture that had been established by the ancients and revived during the Renaissance era. They did not recognize that Borromini was indeed an avid student of both ancient and Renaissance architecture, and that he often borrowed elements from these two eras but then applied them to his structures in new and inventive ways. It was not until art historians began assessing Borromini's architecture in a sober and nonjudgmental manner in the late 19th century that he was finally given his proper place in the history of architecture. This book assesses Borromini's individual commissions following the proper scholarly methodology, as well as his biographical details, artistic development, relationship with his protectors and patrons, and external circumstances that might have determined his artistic output. This book emphasizes the innovations Borromini introduced to the field of architecture and how these influenced later artists.

Finding San Carlino Adil Mansure, Skender Luarasi, 2019-12-06 The church of San Carlo alle Quattro Fontane, also called San Carlino, is an architectural artefact that continues to attract numerous hypotheses and geometric analyses attempting to explain its form and meaning. Numerous investigations have attempted to reveal its underlying geometrical principles, without, however, reaching a consensus. Finding San Carlino presents an edited collection of perspectives on

Borromini's famous Baroque church from a range of established and emerging scholars in architectural history and theory, including Werner Oechslin, Karsten Harries, Michael Hill and Lauren Jacobi amongst others. This book offers the reader different means of engaging with, enjoying and articulating San Carlino's complexity, non-consensus and ambiguity. It is precisely such a unique disposition that motivates this book to explore multiple modes of architectural enquiry and delve into a series of theoretical and historiographical questions such as: why was Borromini not able to post-rationalize his architecture with his drawings? What is San Carlino's exemplary value, and why does it continually engender exegetical and hermeneutic desire? What is the role of geometry in architecture, in history and today? Written for researchers, scholars and postgraduate students in architectural history and theory, the book uses San Carlino as an enigmatic centering point for a set of significant contemporary voices to explore new modes of confrontation and comparison.

S. Carlino alle Quattro Fontane Nicolò Mario Gammino, 1993 A progress report on the restoration of the façade of S. Carlino following the plans of Francesco Borromini.

All Sides to an Oval Angelo Alessandro Mazzotti, 2017-02-28 This is the only book dedicated to the Geometry of Polycentric Ovals. It includes problem solving constructions and mathematical formulas. For anyone interested in drawing or recognizing an oval, this book gives all the necessary construction and calculation tools. More than 30 basic construction problems are solved, with references to Geogebra animation videos, plus the solution to the Frame Problem and solutions to the Stadium Problem. A chapter (co-written with Margherita Caputo) is dedicated to totally new hypotheses on the project of Borromini's oval dome of the church of San Carlo alle Quattro Fontane in Rome. Another one presents the case study of the Colosseum as an example of ovals with eight centres. The book is unique and new in its kind: original contributions add up to about 60% of the whole book, the rest being taken from published literature (and mostly from other work by the same author). The primary audience is: architects, graphic designers, industrial designers, architecture historians, civil engineers; moreover, the systematic way in which the book is organised could make it a companion to a textbook on descriptive geometry or on CAD.

Science and Digital Technology for Cultural Heritage - Interdisciplinary Approach to Diagnosis, Vulnerability, Risk Assessment and Graphic Information Models Pilar Ortiz Calderón, Francisco Pinto Puerto, Philip Verhagen, Andrés Prieto, 2019-11-28 The scientific and technological advances that influence the protection of cultural heritage are developing at an ever-increasing pace. Systems to explore, research and analyse their materiality, to control the different scopes, or to represent and model them have reached an unprecedented dimension in recent decades. The Network of Science and Technology for the Conservation of Cultural Heritage aims to promote collaboration between the agents of these systems, in

order to facilitate the sharing of experiences and to foster technology transfer, with the common goal of contributing to the conservation of Cultural Heritage. In the context of the TechnoHeritage Network, the fourth edition of the International Congress on Science and Technology for the Conservation of Cultural Heritage was held March 26-30, 2019, in Seville, Spain. This Congress was an international meeting of researchers and specialists from multiple areas, whose line of work is the knowledge and conservation of Cultural Heritage. Among all the topics discussed, the role and impact of digital technologies for the knowledge, maintenance, management and dissemination of cultural heritage should be highlighted. Digital media modify the way of understanding this heritage, of perceiving it and transmitting it, and offer a new horizon of strategies to make decision-making more sustainable over time.
