The Effects of Wars Pierre Bocquillon, Suzanne Doyle, Toby S. James, Ra Mason, Soul Park, Matilde Rosina, 2024-12-09 War has been an ever-present feature of human existence. The analysis of wars has tended to focus on either their causes or the military and strategic consequences of a conflict. This book argues that war can have a much wider impact across layers of society that go beyond international boundaries. It presents a heuristic multi-disciplinary framework for analysing the ripple and backwash effects across five connected analytical layers around the world: material; human capabilities; economic; values belief and attitudes; policy and governance; and power. Through this framework, the book introduces a set of empirically rich and theoretically informed studies which examine the first consequences of the war in Ukraine following the invasion of Russia in February 2022. This multi-disciplinary approach shows that the effects of the war were much deeper

and sustained. This volume will be of interest to students and scholars of international humanitarian law, security studies, peace and conflict studies, and European history. The chapters in this book were originally published as a special issue of Policy Studies.

The Next Space Race Richard M. Harrison, Peter A. Garretson, 2023-03-31 If China's space ambitions continue unchallenged, America will be seriously economically and militarily disadvantaged. This book provides a comprehensive strategy to secure U.S. primacy in the space domain. From Moon landings to plans for asteroid mining, China is beginning to exploit space to achieve its great power ambitions. Its strategy could, over time, severely and adversely impact U.S. economic and military security. The United States needs to structure its approach to space to ensure that it can meet or surpass PRC timelines. Authors Richard M. Harrison and Peter A. Garretson, both from the American Foreign Policy Council, review the literature on Chinese space ambitions and assess U.S. space-related initiatives across the government, military, and private sector to understand the maturity of technology available to support space initiatives. Their first-hand research and findings are supplemented by interviews with industry experts, corporate space leaders, and government and military officials. *The Next Space Race* describes and seeks to influence the development of American space policy to ensure the U.S. industrial base is ready to meet or surpass PRC milestones, empower and clarify the mission of the newly minted Space Force, provide guidance to NASA and other federal agencies, and incentivize private sector companies to contribute to ensuring American space primacy.

THE WAR OF THE WORLDS. BY H. G. WELLS. H. G. Wells, 1953

Visions of Invasion Michael Lechuga, 2023-03-02 *Visions of Invasion: Alien Affects, Cinema, and Citizenship in Settler Colonies* explores how the US government mobilizes media and surveillance technologies to operate a highly networked, multidimensional system for controlling migrants. Author Michael Lechuga focuses on three arenas where a citizenship control assemblage manufactures alienhood: Hollywood extraterrestrial invasion film, federal antimigration and border security legislation, and various immigration enforcement protocols implemented along the Mexico-United States border. Building on rhetorical studies, settler colonial studies, and media studies, *Visions of Invasion* offers a glimpse at how the processes of alien-making contribute to an ongoing settler colonial project in the US. Lechuga demonstrates that popular films—*The War of the Worlds*, *Predator*, *Men in Black*, and more—participate in the production of migrants as subjective terrorists, felons, and other noncitizen personae vilified in public discourse. Beyond just tracing how alien invasion narratives circulate in popular media, Lechuga describes how the logics motivating early US colonists materialize in both the US's citizenship control policy and in some of the country's most popular texts. Beneath each of the film franchises and antimigrant political expressions described in *Visions of Invasion* lies an anxious colonial logic in which the settler way of life is seemingly threatened by false narratives of imminent invasion from abroad. The volume offers a deep dive into how the

rhetorical figure of the alien has been manufactured as a political subjectivity, one that plays out the anxieties, guilts, and fears of colonialism in today's science fiction landscape.

The War of the Worlds H. G. Wells,2016-08-31 The War of the Worlds first appeared in print in 1897. It is perhaps the most notorious of all science fiction works, and one of the first to envision a full-scale conflict between humans and extra terrestrials. Orson Welles famously adapted the novel for radio in 1938, presenting the drama as a series of simulated news bulletins—convincingly enough to cause panic among a large portion of the national audience. Many other adaptations have been produced over the years, the most recent of which was the 2005 feature film starring Tom Cruise.
