From the Subsidized Muse to Creative Industries: Convergences and Compromises Ketil Lelo,2019-11-01 La difficoltà di collocare le attività economiche derivanti dalla cultura e dalla creatività in un contesto di coerenza ed intelligibilità ha impedito agli studiosi e ai responsabili delle politiche economiche di giungere a conclusioni condivise sui criteri di definizione di questo settore economico. La mancanza di chiarezza nella terminologia raggiunse l'apice alla fine degli anni Novanta, quando le industrie creative sostituirono le industrie culturali, termine fino ad allora ampiamente diffuso e utilizzato nelle politiche culturali nazionali e internazionali. Alla luce dell'intenso dibattito accademico sviluppato attorno alle industrie culturali e creative, la prima parte di questo libro analizza tensioni, dibattiti e divergenze nelle definizioni, nonché le peculiari caratteristiche di queste industrie. Vengono inoltre illustrati gli effetti dell'applicazione di diversi schemi di classificazione del settore culturale e creativo sul suo peso economico, e discusse le difficoltà che esso incontra nella competizione con altri settori per accedere ai programmi di finanziamento europeo. La seconda parte del libro indaga le molteplici relazioni che le industrie creative installano tra di loro e con il contesto urbano. I modelli di localizzazione delle imprese creative vengono analizzati in un caso di studio nella Città metropolitana di Roma. Le distribuzioni spaziali dei diversi settori creativi sono studiate utilizzando punti georiferiti come input per un modello statistico basato sulla funzione K

di Ripley. Un'ipotesi nulla di distribuzione casuale viene verificata per le seguenti condizioni: analizzando la distribuzione spaziale di ogni singolo settore creativo rispetto al resto delle attività creative; confrontando a coppie i settori creativi per identificare quelli che rivelano attrazione reciproca; confrontando, per ciascun settore creativo, i modelli di localizzazione delle attività core-creative rispetto alla localizzazione delle rispettive funzioni di servizio. L'analisi empirica ha mostrato che, nella maggior parte dei casi, i settori core-creativi hanno la tendenza di raggrupparsi nello spazio a piccole distanze mentre i rispettivi settori di servizio sono dispersi internamente e disposti attorno al cuore. I confronti reciproci hanno rivelato l'esistenza di cluster creativi urbani caratterizzati dalla coesistenza di diverse attività creative. DOI: 10.13134/978-88-32136-80-7

Multimodal Communication in Political Speech Shaping Minds and Social Action Isabella Poggi, Francesca D'Errico, Laura Vincze, Alessandro Vinciarelli, 2013-11-08 This book constitutes the thoroughly refereed post-conference proceedings of the International Workshop on Multimodal Communication in Political Speech: Shaping Minds and Social Actions, held in Rome, Italy, during November 10-12, 2010. The 16 regular papers were carefully reviewed and selected from 33 submissions and presented with three key-notes. The purpose of the Political Speech workshops is to provide a forum for discussing research areas of persuasive agents and social signal processing. This book covers topics on multimodal aspects of political communication, including persuasion, fallacies, racist discourse, as well as music, autobiographic memories, metonymies, dominant postures, rhetorical strategies, interruptions, intonation, and voice appeal.

Pseudomonas aeruginosa Giovanni Bertoni, Silvia Ferrara, 2023-10-11 This book aims to provide methods, protocols, and discussion topics for those who wish to examine in depth the molecular mechanisms of adaptation and versatility of bacteria and would like to envisage their evolution responses in the fast changing Anthropocene. Written in the highly successful Methods in Molecular Biology series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and key tips on troubleshooting and avoiding known pitfalls. Authoritative and cutting-edge, *Pseudomonas aeruginosa: Methods and Protocols* aims to be a useful and practical guide to new researchers and experts looking to expand their knowledge.

Gesture-Based Communication in Human-Computer Interaction Antonio Camurri, Gualtiero Volpe, 2011-04-02 Research on the multifaceted aspects of modeling, analysis, and synthesis of - man gesture is receiving growing interest from both the academic and industrial communities. On one hand, recent scientific developments on cognition, on - fect/emotion, on multimodal interfaces, and on multimedia have opened new perspectives on the integration of more sophisticated models of gesture in c- putersystems. On the other hand, the consolidation of new technologies enabling "disappearing" computers and (multimodal) interfaces to be integrated into the natural environments of users are making it realistic to consider tackling the complex meaning and subtleties of human gesture in multimedia systems, - abling a deeper, user-centered, enhanced

physical participation and experience in the human-machine interaction process. The research programs supported by the European Commission and several national institutions and governments individuated in recent years strategic fields strictly concerned with gesture research. For example, the DG Information Society of the European Commission (www.cordis.lu/ist) supports several initiatives, such as the “Disappearing Computer” and “Presence” EU-IST FET (Future and Emerging Technologies), the IST program “Interfaces & Enhanced Audio-Visual Services” (see for example the project MEGA, Multisensory - pressive Gesture Applications, www.megaproject.org), and the IST strategic - jective “Multimodal Interfaces.” Several EC projects and other funded research are represented in the chapters of this book.

A wider range of applications can benefit from advances in research on gesture, from consolidated areas such as surveillance to new or emerging fields such as therapy and rehabilitation, home consumer goods, entertainment, and audio-visual, cultural and artistic applications, just to mention only a few of them.

The IT Revolution and its Impact on State, Constitutionalism and Public Law Martin Belov, 2021-02-25 What is the future of constitutionalism, state and law in the new technological age? This edited collection explores the different aspects of the impact of information and technology revolution on state, constitutionalism and public law. Leading European scholars in the fields of constitutional, administrative, financial and EU law provide answers to fascinating conceptual questions including: - What are the challenges of information and technological revolution to sovereignty? - How will information and technology revolution impact democracy and the public sphere? - What are the disruptive effects of social media platforms on democratic will-formation processes and how can we regulate the democratic process in the digital age? - What are the main challenges to courts and administrations in the algorithmic society? - What is the impact of artificial intelligence on administrative law and social and health services? - What is the impact of information and technology revolution on data protection, privacy and human rights?

Semantic Search over the Web Roberto De Virgilio, Francesco Guerra, Yannis Velegrakis, 2012-08-04 The Web has become the world’s largest database, with search being the main tool that allows organizations and individuals to exploit its huge amount of information. Search on the Web has been traditionally based on textual and structural similarities, ignoring to a large degree the semantic dimension, i.e., understanding the meaning of the query and of the document content. Combining search and semantics gives birth to the idea of semantic search. Traditional search engines have already advertised some semantic dimensions. Some of them, for instance, can enhance their generated result sets with documents that are semantically related to the query terms even though they may not include these terms. Nevertheless, the exploitation of the semantic search has not yet reached its full potential. In this book, Roberto De Virgilio, Francesco Guerra and Yannis Velegrakis present an extensive overview of the work done in Semantic Search and other related areas. They explore different technologies and solutions in depth, making their collection a valuable and stimulating reading for both academic

and industrial researchers. The book is divided into three parts. The first introduces the readers to the basic notions of the Web of Data. It describes the different kinds of data that exist, their topology, and their storing and indexing techniques. The second part is dedicated to Web Search. It presents different types of search, like the exploratory or the path-oriented, alongside methods for their efficient and effective implementation. Other related topics included in this part are the use of uncertainty in query answering, the exploitation of ontologies, and the use of semantics in mashup design and operation. The focus of the third part is on linked data, and more specifically, on applying ideas originating in recommender systems on linked data management, and on techniques for the efficiently querying answering on linkeddata.

Italy Now? Alberto Alessi, 2007 Does Italian architecture exist? What characterizes it? What values and objectives do you refer to when designing your architecture and why? These are the questions recently put to twenty cutting-edge architectural firms working in Italy today. The answers come together in *Italy Now? Country Positions in Architecture*, which presents the architects' written responses in parallel with their design work. Edited by Alberto Alessi, the book also contains critical essays by Pier Vittorio Aureli and Gabriele Mastrigili. Noted Italian photographers Gabriele Basilico, Francesco Jodice, Armin Linke, and Alberto Muciaccia have contributed their visions of Italy--the land and people as well as the architecture--to deepen the context of this book. Based on an exhibit held at Cornell University as well as on two related conferences, one in Ithaca and the other in New York City, *Italy Now?* offers an intriguing look at contemporary Italian architecture--its physical expression and the thinking behind it.
