Exploring Supervisor and Supervisee Experiences of Triadic Supervision Emily C. Derrick, 2010 This dissertation research focused on supervisor and supervisee experiences within the triadic supervision triad. Triadic supervision is an emerging method of supervision within counselor education. It is fast becoming the preferred mode of supervision in counselor education programs. Unfortunately, there is very little research to support the efficacy of this approach. This project focused on an area that has been under-studied in counselor education literature. I examined the perceptions and experiences of the supervisor and both supervisees within a specific triad. Current literature has examined supervisors' experiences in triadic supervision. Likewise, there is emerging research on experiences of supervisees within triadic supervision, but no study to date has examined the simultaneous experiences of an intact triad. This research was qualitative in nature and was conducted through in-depth face to face interviews. The data was analyzed using basic interpretive qualitative techniques. These findings will contribute to the limited but growing body of knowledge that exists concerning triadic supervision. Additionally, these findings will have the potential to improve understanding within counselor education about the experiences of those participating in triadic supervision. This research also has the potential to impact the way in which this form of supervision is delivered and the quality of supervision that future counselors-in-training receive.

Handbook of Group Counseling and Psychotherapy Janice L. DeLucia-Waack, 2004 The Handbook of Group Counseling and Psychotherapy is a comprehensive reference guide for group practitioners and researchers alike. Each chapter reviews the literature and current research as well as suggestions for practice in the psycho educational arena, counselling, and therapy groups. The Handbook encourages the notion that the field is improved through increased collaboration between researchers and practitioners. Through a review of cutting-edge research and practice, the Handbook includes } 48 articles by renowned experts in group work } the history and theory of group work } topics across the lifespan } an entire section on multicultural issues } a variety of clinical problems and settings } appendices include the Association for Specialists in Group Work Training Standards, Best Practice Standards, and Principles for Diversity-Competent Group Workers The Handbook is divided into seven sections: Current and Historical Perspectives on the Field of Group Counselling and Psychotherapy, reviews and analyzes the many contributions and contributors that have made group counselling and psychotherapy a vital and potent treatment method. The chapter outlines review articles spanning four decades, and outlines

the evolution of group themes over the last 100 years. *Best Practices in Group Counselling and Psychotherapy* uses research, theory, and group counseling experience to provide group leaders and researchers with the most current and best practices in conducting group counseling and psychotherapy. *Multicultural Groups* follows the ASGW Principles for Diversity-Competent Group Workers and is intended to provide group leaders with essential information about different cultural groups and their world views, perceptions of groups, naturalistic healing methods, suggested group interventions, and implications for groups. Chapters cover Native-Americans, Latinos, Asians, and African-Americans, disabled persons, and gender and sexuality. *Groups Across Settings* includes examples of psycho-educational, counseling, and psychotherapy groups in a variety of settings. This section presents readers with theoretical and empirical support for group work in such settings as the Veterans Administration system, university counselling centers, and more. *Groups Across the Lifespan* consist of chapters across many age groups. For children and adolescents, cognitive and developmental issues are addressed. For adults, socialization and interpersonal issues are addressed, including separate chapters for male and female groups. Finally, a chapter on the elderly deals with cognitive, health, and life review issues. *Special Topics Groups* presents a continuum of different types of groups used to treat people with interpersonal and developmental issues, such as grief, substance abuse, depression, and others. Each chapter in this section provides definitions and descriptions of the issues along with theoretical and empirical support. Finally, *Critical Issues and Emerging Topics* attempts to reflect the zeitgeist and provide a glimpse into group interventions for the future. Emerging issues, such as online groups, prevention groups, and peer-led mutual help groups receive careful attention and analysis. *The Handbook of Group Counseling and Psychotherapy*, the first reference devoted to this emerging and rapidly growing field, is essential for academics, researchers, professionals, and librarians serving the group therapy community. There is no similar reference available, and it will prove a landmark volume for years to come.

A Comparison of Individual Supervision and Triadic Supervision ,2003

The Supervisory Working Alliance Alan Scott Bakes,2005 Through inclusion in the 2001 standards of The Council for Accreditation of Counseling and Related Educational Programs (CACREP), triadic supervision is recognized as equivalent to individual supervision. This study used the Supervisory Working Alliance Inventory (SWAI) to measure differences in the working alliance between 76 supervisees receiving individual or triadic supervision and 47 supervisors who conducted supervision using individual or triadic supervision models. Results revealed that supervisees receiving triadic supervision perceived the working alliance slightly higher than those receiving dyadic supervision on the SWAI Client Focus Subscale. Supervisors using dyadic supervision scored significantly higher on the SWAI Identification Subscale. Implications for the field of supervision and recommendations for counselor educators are discussed.

Cognitive Behaviour Therapy in Sport and Performance Paul McCarthy, Sahen Gupta, Lindsey Burns, 2023-04-17 Many sport and performance psychologists worldwide practise cognitive behaviour therapy (CBT) as a therapeutic and applied practice approach. But no textbook currently offers a blueprint to understand and use CBT in sport and performance settings. *Cognitive Behaviour Therapy in Sport and Performance: An Applied Practice Guide* builds upon a tangible foundation for the practice of CBT and related techniques in sport and performance contexts. This new book presents key points to help students and practitioners bring CBT into the sport and performance context. We focus on the 'what is' and the 'how to'. Drawing upon the latest research and a wealth of applied practice experience, this easy-to-use guide takes the reader through each step of the CBT process with case examples, plain instructions, and worksheets to maximise the quality and depth necessary for effective CBT practice. As an applied guide, this book educates undergraduates and postgraduates in sport and performance psychology (and all its variants). This book is an instrumental guidance material for sport and exercise psychology students but also invaluable as a practice guide for performance psychology trainees in applied practice placements and as a refresher primer for established professionals.

Triadic Supervision in Counselor Training Robert Mark Sturdivant, 2005

Experience of Role Discernment and Disclosure in Triadic Supervision Marlise R. Lonn, 2015 This study focused on student counselors engaged in triadic supervision during practicum. The purpose was to understand participants' role discernment and disclosure experiences. This research study used transcendental phenomenological inquiry and analysis methodology. Ten ethnically diverse female participants were interviewed for this project. Interviews allowed participants to explore their experiences and understanding of role discernment and disclosure as a new supervisee in the triadic supervision setting. Results yielded three subsequent themes related to role discernment: the experience of newness (subthemes: new counselor, new supervisee, lacking preparation), dependence on supervisor (subthemes: supervisor expectations, supervision activities, meaning of supervision), and impact of supervision (subthemes: self-awareness, self-care, and consultation). The essence of participant's role discernment experience was changed perception of self and other. Inquiry into disclosure experiences yielded the following themes: relationships (subthemes: supervisor, triad), presence of peer (subthemes: aided disclosure, impeded disclosure), and sharing time. The essence of participants' disclosure

experiences was identified as heightened awareness. Results of this study extend triadic supervision research to include the experiences of ethnically diverse participants. Implications of this study include understanding the role discernment experiences of practicum supervisees in the context of triadic supervision. Additionally, implications for supervisor and counselor educators are explored and the need for advanced preparation for supervision is emphasized.

Counselor Education and Supervision ,1987

State of the Art in Clinical Supervision John R. Culbreth,Lori L. Brown,2009-10-19 There have been many recent developments in the research, theory, and practice of supervision in counseling, but few reliable resources are available for practitioners seeking to expand their knowledge in these areas. Culbreth and Brown have assembled a group of leading researchers, scholars, and professionals in the field to present a collection of chapters on the state of the art in clinical supervision. These chapters provide the reader with fresh approaches to core topics, such as multicultural competence, religion and spirituality, and the training of supervisors, as well as discussions of new areas of study. Alternative methods to

conducting supervision are explored with expressive art techniques and the uses of narrative therapy and concepts of emotional intelligence. Triadic supervision and the use of the newest developments in technology are also considered. Current and future supervisors will no doubt find the innovative and informative strategies described in this book invaluable in their work with supervisees.

Each chapter contains activities, case studies, hypothetical situations, and worksheets designed to facilitate your understanding of and role in the profession. All material presented is consistent with both the CACREP accreditation standards and the American School Counseling Association's National Model (R).
