Systematic Theology Thomas P. Rausch, 2016 Systematic theology seeks to understand and render more intelligible the central doctrines of faith and to show how they are related to each other. It tries to demonstrate how these doctrines are rooted in Scripture and develop in the history of the church; most important, it strives to more adequately express and sometimes reinterpret the church's doctrinal tradition, always in the interest of better communicating the mystery of salvation and bringing it into a dialogue with culture. The present text is intended to be concise and accessible, an introduction that explores basic themes in Catholic systematic theology from a biblical, historical, and contemporary perspective, always aware of today's theological pluralism.

A World of Difference (Reasons to Believe) Kenneth Richard Samples, 2007-09-01 Recent Barna research indicates that less than one in ten evangelical Christians hold a biblical worldview. *A World of Difference* seeks to change this disturbing fact by educating readers on how the Christian perspective is uniquely reasonable, verifiable, and liveable. Author Kenneth Richard Samples faced a profound test of his own belief system during a personal life-and-death crisis. In *A World of Difference*, he uses nine distinct tests to compare the Christian worldview with current religious and philosophical competitors, including Islam, postmodernism, naturalism, and pantheistic monism. Samples tackles tough issues through this

in-depth study of Christianity's history, creed, and philosophical basis. An excellent resource for readers who want their view of life and the world to make sense.

Faith and Reason Scott Cherry, 2019-08-17 Faith and Reason are not opposites. They go together. Why does reason work and why do we generally trust in it? What is its relationship to faith? Why do we expect things to make sense, and why does anything make sense at all? Among other qualities, our innate capacities for faith and reasoning are among the defining attributes of humanness. The uniquely human powers of faith and reason are some of the fundamental things that allow us to function as humans instead of as animals. Conversely, it's the absence of these capacities that defines animals and causes them to behave as they do. Is faith involved in reason? Scott Cherry argues yes, and that they are interdependent. Faith fuels reason, and vice-versa. But the emphasis of this book is on reason: Because reason exists, God exists. Thankfully, we can reason about both reason and faith and reflect on their qualities and functions. It's not that through our powers of reason we can be certain of the existence of God, but that the very existence of reason and logic points to a rational God. Reason and faith work together. Contents: Prologue, The Universe and Reason; Preface, In Praise of Reason and Reasonable Faith; (1) A Child's Reason and Logic; (2) The Logos Principle--Active Ingredients; (3) Meta-Cognition: Reasoning about Reason; (4) The Complementary Nature of Reason; (5) Reason, Revelation and Purpose; (6) Reason, Revelation and Validation; (7) The Logic of Reason and Laws of Logic; (8) Objections to the Logos Principle, part 1; (9) Objections to the Logos Principle, part 2; (10) The Reciprocity of Reason and Logic; (11) The Sheer Wonder of Intelligibility; (12) Intelligibility of a Mosque, a Parable; (13) Peony Gardens, Butterflies and Design; (14) Conclusions to the Logos Principle; (15) God, the Logos, and the Trinity. *This book is a retitled version of the author's previously published book, 'The Reason of Reason' and is almost identical. So if the reader has read the latter they need not read this.

A Christian Approach to Education Herbert W. Byrne, 1961

Approaching the World's Religions, Volume 2 Robert Boyd, 2017-06-20 Evangelical theology strives to be evangelical, conservative, and contemporary. In a world in which everyone is Christian, evangelical theology provides a balanced position between fundamentalism and liberalism. While theological debates within the family will occur, to be evangelical is a breath of fresh air for many. However, we do not live in such a world. We do find ourselves living in a secular, global society. It is secular because no religious organization dictates how we live our lives. It is global for at least two reasons. First, our technology brings us immediately in contact with those faraway places. Second, and of more importance, we can simply step outside our front doors and encounter our neighborhoods that reflect a global pluralism. This raises the question, how shall we then live? The intent of *An Evangelical Theology of Religions* is to suggest a direction for evangelicals to think about the secular, global society in which they live in a way that is not only conservative but also evangelical and contemporary. The final essay strives to address the evangelical aspect of our tradition that places an emphasis on the Great Commission and

the law of love.

Faith with Reason Joseph R. Farinaccio,2017-05 Is Christianity Really True? Every religion has its own set of truth-claims. What makes Christianity so different? FAITH WITH REASON is an introduction to the Christian worldview. It explains how the Christian view of reality contrasts with some of the more popular religious notions in our culture today. Topics include: -- Why all religious beliefs are not equal (and how to identify false philosophical notions and inaccurate religious ideas) -- The real relationship between faith and reason (you've probably never heard this before even though St. Augustine taught this historic, scriptural view) -- How we can know the Bible is actually God's Word (with an approach of 100% absolute certainty) -- Why evolution is religion in disguise (and how materialism is an ultimate faith-view) -- How logic opposes non-Christian religions (based upon their own teachings) -- Why the problem of evil actually reflects the existence of an all powerful, loving God (hint: evil is a profound psychological problem, but not a logical one when it comes to biblical faith in God) It's been said that, Everyone does philosophy, but not everyone does it well. This book serves as a basic primer for believers and non-believers alike to better understand why Christianity offers a faith and philosophy of life unlike any other. This material should challenge the thinking Christian to examine his or her worldview via a decisively Biblical bent. Written in a very readable style, Joe has captured many of the key apologetic principles of the faith. This work should enhance the walk of every believer who is committed to a diet of the meat of the Word. - Dr. Charles Betters Senior Minister - Glasgow Reformed Presbyterian Church Joseph Farinaccio (B.A. History) is a Christian writer and public speaker from New Jersey. His previous writings include published articles on theology, history, and politics from a Christian perspective. Further information can be found at: <http://www.FaithWithReason.com>

This edition takes into account feedback from professors and students and reflects current theological conversations, with added material on the atonement, justification, and divine foreknowledge. Erickson's comprehensive introduction is biblical, contemporary, moderate, and fair to various positions, and it applies doctrine to Christian life and ministry.

Living the Truth Klaus Demmer,2010-06-14 How is moral theology related to pastoral theology? In this first English translation of *Living the Truth*, Klaus Demmer answers this question by offering a complete theory of action. Its crucial element is truthfulness, which Demmer claims is a basic attitude that must be translated concretely into our individual decisions. Demmer demonstrates that the demand for truthfulness offers a critical corrective to the usual praxis whereby ethical norms are formulated. This has significant consequences for every area of ethical directives, including questions about celibacy and partnerships. Demmer moves away from the act-centered morality that dominates the neo-Scholastic manuals of moral theology. His concern is to show how our actions embody and carry out a more original anthropological project. Not only does this anthropological project condition our insights into goods and values, it provides the criteria by which our actions are judged morally. This book will be welcomed by all who are looking for ethical norms, and by all whose task it is to formulate such norms.
