In this innovative and highly accessible textbook Chris Beckett explains how an understanding of these theoretical issues can improve the knowledge and skills base of professional practice. *Essential Theory for Social Work Practice* is an engaging and readable text, with a distinctively realistic and honest approach to the realities of everyday practice. Framed in a comprehensive and logical structure: - Part 1 establishes what social workers do and the tools they need - Part 2 considers how to assess, handle, and support change in others - Part 3 explores the wide range of roles that social workers must fulfil - Part 4 strengthens these links between theory and practice. Exercises, case examples, chapter summaries, and practice notes are used to great effect in each chapter, enabling students to apply theory to practice as they progress through the book. The book is an invaluable core text for all undergraduate social work students, and offers excellent support for practitioners in their every day practice.

**Experiencing Social Work** Mark Doel, Lesley Best, 2008-02-21 'Experiencing Social Work provides a refreshing change in the expanse of social work education texts. Its focus on learning from people who had received a good service from social workers drew out many of the foundation blocks of practice that can so easily be minimised in favour of 'deeper academic theories'. In short, it reminded me of my own passion for practice and the privilege it is to be part of the social work profession' - Kay Wall, Lecturer in Social Work In this book people tell their stories of positive social work and the difference it has made to their lives. The book was inspired by the belief that we can learn more from what goes right than what goes wrong. Follow the stories in each chapter to read about good practice, to reflect on the lessons learned, and to feel uplifted by social work's potential for positive change and social justice. Other key features include: Case examples from a wide range of service user groups, including people with mental health problems, disabilities, parenting difficulties, those living in care, those experiencing loss and other life transitions. Commentaries that unpack the core themes and issues from each example in order to understand the experience and learn from it. Examples of how social work students have contributed to positive change in the lives of service users. A strong grounding in the ethical guidelines and skills base required of all social work practice. This important book will be valuable reading for all undergraduate social work students and will also be useful for qualified social workers, service users and carers. Mark Doel is based at the Centre for Health and Social Care Research, Sheffield Hallam University. Lesley Best is based at the School of Health, University of Northampton.

Social Work Perspectives on Human Behaviour Margarete Parrish, 2014-08-16 Using a bio-psycho-social framework, this popular textbook explains the wide basis of perspectives on which we build an understanding of people's behaviours and why and how we respond in the way we do. This book accessibly explains key concepts including attachment, trauma, developmental psychology and oppression to highlight and enhance social workers' understanding of practice. Thoroughly updated since its popular first edition, the book now includes: A brand new chapter on Attachment More coverage of neurological concepts and their influence on behaviour Expanded material on older people and resilience, crime and violence against black and minority ethnic groups, and domestic violence issues More coverage of mental health, alcohol and drugs and their impact on behaviour Fully updated to reflect the Munro report and recent social worker task force recommendations, this new edition also includes brand new and additional case studies and pedagogy, making this a practical, insightful and wonderfully comprehensive text suitable for all students of social work. This second edition is a most inclusive, accessible and fully updated text. It provides a thorough overview of the major theories and concepts and brings these to life with case examples. The inclusion of contemporary issues such as domestic abuse is a welcome feature. I would

fully recommend this text to any student studying for a social work qualification. Debbie Thackray, Manchester Metropolitan University, UK This second edition expands on topics that are vital to good social work practice. The chapters on attachment and trauma are particularly well-written, and speak to topics often overlooked in academic texts. The sections on foetal alcohol syndrome (FAS) provide readers with essential knowledge that will enhance practice on many levels. Although this has been written in the context of social work practice, this important book will be compulsory reading for a broad range of students... I consider this an invaluable contribution to any student library. Jill Davey, Framework Lead for Social Work, Sociology, Social Policy and Anthropology, Bournemouth University, UK This is the most useful text I have ever found for teaching social care and youth students the basic explanatory frameworks for human behaviour. It is superbly balanced in that it gives weight to all perspectives and proffers critiques of key theories. It is also very strong in applying theory to practice - a skill which is always difficult to develop in students. Particular areas of strength are the chapters on attachment and mental health/ trauma. The work is an engaging read as it includes some fascinating historical insights and illustrations as well as contemporary case studies. I will certainly recommend it to my students. Gwen Chaney, Course Leader for Social Care & Faculty Lead for Learning and Teaching, University of Gloucestershire, UK

*Best Practice with Children and Families* Barry Cooper,Jean Gordon,Andy Rixon,2014-12-12 Social work practice with children, young people and families is complex, highly skilled - and fascinating. Writing about social work increasingly acknowledges the complexities and uncertainties of practice but rarely features the voice of the social worker themselves. This book takes a different approach, that of Critical Best Practice: a constructive, realistic and strengths-based approach

that takes as its starting point the telling and analysing of in depth stories about 'live' practice. The reader is encouraged to join the social work practitioner or manager as they engage with the everyday dilemmas and uncertainties of 21st century practice. Ten narratives, based round the themes of relationships, risk, and negotiation & problem solving provide varied opportunities for critical reflection and learning about social work in different contexts. Insights are offered into social work with children, from young babies to adolescents, and families with differing needs in different parts of the UK: England, Scotland and Wales.

*Social Work with Latinos* Melvin Delgado, 2017-06-27 The focus on Latinos in the United States has generally overlooked key social-economic-political dimensions that are not only growing in importance, but may ultimately hold an important key to how well this group does in the immediate and distant future in the country. The approximate ten-year period since this text's initial publication has witnessed an increase in scholarship and new social-political-economic developments regarding this population group. *Social Work with Latinos, Second Edition* captures these advances and adds to the existing body of work in this area. In particular, this revised edition provides an up-to-date demographic profile; identifies the rewards and challenges for the development of social work interventions focused on Latinos; includes a conceptual foundation from which to develop social work strategies for outreach, engagement, service-provision, and evaluation; features a series of case illustrations to highlight how cultural competency/humility can unfold to better reach this population group; grounds the Latino experience within a social, economic, cultural, and political context; and provides recommendations for social work education, research and practice.
