Mujer, violencia y derecho María Dolores Cervilla Garzón,2006 La obra que se nos presenta recoge las distintas ponencias que se presentaron en el curso “Mujer, violencia y derecho”, celebrado en Septiembre de 2005 en Jerez y que tuvo como destinatario un auditorio amplio y diverso que demostró interés por la nueva normativa, publicada en el BOE en Diciembre de 2004 contra la violencia de género.

Análisis laboral ,2002

La trampa neoliberal Agustín Salvia,2018-01-19 El deterioro social que sufrió la Argentina entre 1989 y 2001 -verificable por el avance de la pobreza y una inequitativa distribución del ingreso- requiere de una explicación teórica que eluda el atajo del sentido común académico. Durante ese período se ejecutaron las llamadas “reformas estructurales” que sólo pueden ser pensadas e interpretadas en el contexto de un cambio de régimen social de acumulación a escala nacional y el simultáneo advenimiento de una renovada expansión capitalista internacional. En este marco y retomando la tradición estructuralista latinoamericana, esta investigación sostiene que el crecimiento económico, la dinámica de reproducción social y los efectos en materia de pobreza y distribución del ingreso constituyen fenómenos estrechamente relacionados con el modo subordinado en que la formación social se inserta en la división internacional de trabajo, con el carácter dual y combinado del proceso de acumulación nacional, y con el poder asimétrico de los agentes económicos y sociales que participan de los procesos de acumulación, reproducción social y liderazgo político.

Una mirada joven a la juventud Fernanda Ferrari Pagola,Sol Scavino Solari,Jimena Curbelo,Emiliano Santa Cruz,Alejandro Sosa Sánchez,Elisa Failache Mirza,Sharon Katzkowicz Junio,Martina Querejeta Rabosto,Florencia Racioppi Rüsç,Emilio Aguirre,Federico Veneri,2018-11-15 En Uruguay, hay dos temas en el campo de las políticas sociales que ponen a adolescentes y jóvenes en el centro de un activo y complejo debate. El primero remite a la necesidad de consolidar el Sistema Nacional Integrado de Cuidados, una iniciativa pionera en América Latina. La vigencia histórica de una visión que delegó las tareas de cuidado al mundo privado, y dentro de él a las mujeres, se tradujo en uno más de los múltiples mecanismos de discriminación de género vigentes en la actualidad, privando a un gran número de mujeres jóvenes de la posibilidad de imaginar un futuro o estructurar un proyecto de vida distinto al de la permanencia en el hogar. El segundo

tema que es motivo de debate es la dificultad que evidencia el sistema educativo uruguayo para garantizar a las nuevas generaciones la permanencia en el nivel medio, así como su graduación. El objetivo de esta publicación es abordar estos problemas con una mirada joven, desde la perspectiva de los propios jóvenes uruguayos. Para ello, en 2016, el Banco Interamericano de Desarrollo (BID) realizó una convocatoria en Uruguay a través de la Red de Conocimiento Local en Juventud, en la que se invitó a jóvenes investigadores a presentar proyectos de investigación sobre estos dos campos temáticos: i) la mujer joven y la realización de cuidados, y ii) la finalización del nivel medio de educación. En esta publicación se exponen algunos de estos trabajos, con el fin de sumar voces y enriquecer este intenso y complejo debate.

Perspectivas de la economía mundial, abril de 2016 International Monetary Fund. Research Dept., 2016-06-17 Los principales reajustes macroeconómicos están afectando de manera distinta a las perspectivas económicas de los diferentes países y regiones. En la edición de abril de 2016 del informe WEO se examinan las causas e implicaciones de estos reajustes —que incluyen la desaceleración y el reequilibramiento en China, un nuevo descenso de los precios de las materias primas, la consiguiente desaceleración de la inversión y el comercio y la disminución de los flujos de capital a las economías de mercados emergentes y en desarrollo— que están generando mucha incertidumbre y están afectando las perspectivas para la economía mundial. Además, en los capítulos analíticos se estudia la desaceleración de los flujos de capital a las economías de mercados emergentes después de que alcanzaran cotas máximas en 2010 —las características principales, el contraste con otras desaceleraciones, las causas y la posibilidad de que la flexibilidad cambiaria haya alterado la dinámica del ciclo de entradas de capital— y se evalúa si las reformas en los mercados laboral y de productos pueden mejorar las perspectivas económicas en las economías avanzadas, para lo cual se analizan la evolución reciente y el margen para introducir más reformas, los canales por los cuales las reformas inciden en la actividad económica ya sea en entornos económicos sólidos o débiles, los efectos macroeconómicos de las reformas a corto y mediano plazo y la sincronización y coordinación de las reformas con otras políticas a fin de aprovechar al máximo sus potenciales ventajas económicas cuantitativas. En una sección especial se analiza a fondo la transición energética en una era de precios bajos de los combustibles fósiles.
