

Picking Up Robin Nagle

Andrea Veltman

Picking Up Robin Nagle, 2013-03-19 A “gripping” behind-the-scenes look at New York’s sanitation workers by an anthropologist who joined the force (Robert Sullivan, author of *Rats*). America’s largest city generates garbage in torrents—11,000 tons from households each day on average. But New Yorkers don’t give it much attention. They leave their trash on the curb or drop it in a litter basket, and promptly forget about it. And why not? On a schedule so regular you could almost set your watch by it, someone always comes to take it away. But who, exactly, is that someone? And why is he—or she—so unknown? In *Picking Up*, the anthropologist Robin Nagle introduces us to the men and women of New York City’s Department of Sanitation and makes clear why this small army of uniformed workers is the most important labor force on the streets. Seeking to understand every aspect of the Department’s mission, Nagle accompanied crews on their routes, questioned supervisors and commissioners, and listened to story after story about blizzards, hazardous wastes, and the insults of everyday New Yorkers. But the more time she spent with the DSNY, the more Nagle realized that observing wasn’t quite enough—so she joined the force herself. Driving the hulking trucks, she obtained an insider’s perspective on the complex kinships, arcane rules, and obscure lingo unique to the realm of sanitation workers. Nagle chronicles New York City’s four-hundred-year struggle with trash, and traces the city’s waste-management efforts from a time when filth overwhelmed the streets to the far more rigorous practices of today, when the Big Apple is as clean as it’s ever been. “An intimate look at the mostly male work force as they risk injury and endure insult while doing the city’s dirty work [and] a fascinating capsule history of the department.” —Publishers Weekly “[Nagle’s] passion for the subject really comes to life.” —The New York Times “Evokes the physical and psychological toll of this dangerous, filthy, necessary work.” —Nature “Nagle joins the likes of Jane Jacobs and Jacob Riis, writers with the chutzpah to dig deep into the Rube Goldberg machine we call the Big Apple and emerge with a lyrical, clear-eyed look at how it works.” —Mother Jones

Meaningful Work Andrea Veltman, 2016-09-15 This book examines the importance of work in human well-being, addressing several related philosophical questions about work and arguing on the whole that meaningful work is central in human flourishing. Work impacts flourishing not only in developing and exercising human capabilities but also in instilling and reflecting virtues such as honor, pride, dignity, self-discipline and self-respect. Work also attaches to a sense of purposefulness and personal identity, and meaningful work can promote both personal autonomy and a sense of personal

satisfaction that issues from making oneself useful. Further still, work bears a formative influence on character and intelligence and provides a primary avenue for exercising complex skills and garnering esteem and recognition from others. The author defends a pluralistic account of meaningful work, arguing that work can be meaningful in virtue of developing capabilities, supporting virtues, providing a purpose, or integrating elements of a worker's life. In light of the impact of meaningful work on living well, the author argues that well-ordered societies provide opportunities for meaningful work, that individuals would be well advised to pursue these opportunities, and that the philosophical view of value pluralism, which casts work as having no special significance in an individual's life, is false. The book also addresses oppressive work that undermines human flourishing, examining potential solutions to mitigate the impact of bad work on those who perform it. Finally, a guiding argument of the book is that promoting meaningful work is a matter of ethics, more so than a matter of politics. Prioritizing people over profit, treating workers with respect, respecting the intelligence of working people, and creating opportunities for people to contribute developed skills are basic ethical principles for employing organizations and for communities at large.

Every Job a Parable John Van Sloten, 2017-06-20 A Walmart greeter, a nurse, and an astronaut walk into a church. . . . They each bring with them their own exhaustions and exasperations, their own uncertainty about whether and how their work matters to God. Good news: All work matters to God, because all work reflects some aspect of the character of God. God created the world so that it runs best when it mirrors Him, and we ourselves find the most fulfillment when we recognize God behind our labor. John Van Sloten offers a fascinating and innovative reflection on vocation: Our work is a parable of God; as we work, we are icons of grace.

The Other Journal: Environment The Other Journal, 2018-09-27 The Other Journal is a space for Christian interdisciplinary reflection at the intersection of theology and culture. TOJ tackles the cultural crises of our time with verve and slant, advancing a progressive, provocative, and charitable response in sync with the peacefully contrarian Christ. In this issue, we address the theme of environment by visiting the barren moonscapes of Appalachia, the tobacco fields of Kentucky, an air-conditioned office in the Bronx, and urban Midwestern streets that are blighted with trash. We read the foreign language of animal footprints in the sandy soil at the base of Mount Hood. And in all this, we seek to envision a kingdom of God that encompasses each fruit, flower, and herb. Our environment issue features writing by Karen Brummund, Daniel Castillo, Samuel F. Chamelin, Ruthanne SooHee Crapo, Mary DeJong, Michael J. Iafrate, Glen A. Mazis, Brett McCracken, Kris Pint, Dave Pritchett, Meaghan Ritchey, Remco Roes, Leah D. Schade, Paul J. Schutz, and Catherine Wright; interviews by Jonathan Hiskes and Jessina Leonard with Norman Wirzba and Aaron Canipe, respectively; poetry by Maryann Corbett, Kris Pint, Daniel Tobin, and Jeanne Murray Walker; an art installation by Sara Bomans, Tom Lambeens, and Remco Roes; and photography by Karen Brummund, Aaron Canipe, Mary DeJong, Rob Jefferson, Remco Roes, and Kristof Vrancken.

Cities and Nature Lisa Benton-Short, John Rennie Short, 2013-05-29 Cities and Nature connects environmental processes with social and political actions. The book reconnects science and social science to demonstrate how the city is part of the environment and how it is subject to environmental constraints and opportunities. This second edition has been extensively revised and updated with in-depth examination of theory and critical themes. Greater discussion is given to urbanization trends and megacities; the post-industrial city and global economic changes; developing cities and slums; urban political ecology; the role of the city in climate change; and sustainability. The book explores the historical relationship between cities and nature, contemporary challenges to this relationship, and attempts taken to create more sustainable cities. The historical context situates urban development and its impact on the environment, and in turn the environmental impact on people in cities. This provides a foundation from which to understand contemporary issues, such as urban political ecology, hazards and disasters, water quality and supply, air pollution and climate change. The book then considers sustainability and how it has been informed by different theoretical approaches. Issues of environmental justice and the role of gender and race are explored. The final chapter examines the ways in which cities are practicing sustainability, from light greening efforts such as planting trees, to more comprehensive sustainability plans that integrate the multiple dimensions of sustainability. The text contains case studies from around the globe, with many drawn from cities in the developing world, as well as reviews of recent research, updated and expanded further reading to highlight relevant films, websites and journal articles. This book is an asset to students and researchers in geography, environmental studies, urban studies and planning and sustainability.
