*Agroecology in China* Luo Shiming, Stephen R. Gliessman, 2017-03-27 Key features: Reviews the development of agroecology in China, including research, practice, management, and education regarding challenges for rural and agricultural progress Presents information from sources not readily available in the West about agricultural development in China during the last several decades Provides models and indicates starting points for future research and practice Addresses how to meet future challenges of agroecosystems from the field to the table in China from scientific, technological, and management perspectives During the past 30 years, industrialization has fundamentally changed traditional rural life and agricultural practices in China. While the incomes of farmers have increased, serious issues have been raised concerning the environment, resource depletion, and food safety. In response, the Chinese government and Chinese scientists encouraged eco-agriculture, the practice of agroecology principles and philosophy, as a way to reduce the negative consequences of large-scale industrialized systems of farming. Agroecology in China: Science, Practice, and Sustainable Management represents the work of experts and leaders who have taught, researched, and expanded Chinese agroecology and eco-agriculture for more than 30 years. It reviews decades of agricultural change to provide an integrated analysis of the progress of research and development in agroecological farming practices. The book contains research on traditional and

newly developed agricultural systems in China, including intercropping systems, rainfall harvest systems, and rice-duck, rice-fish, and rice-frog co-culture systems. It covers current eco-agriculture practices in the major regions of China according to climate conditions. The book closes with a discussion of the major technical approaches, necessary policy support, and possible major development stages that must occur to allow broader agroecological implementations toward the sustainability of future food systems in China. Presenting eco-agriculture systems that are somewhat unique in comparison to those of the United States, Latin America, and Europe, Agroecology in China gives insight on how Chinese agroecologists, under the political and cultural systems specific to China, have created a strong foundation for ecologically sound agroecosystem design and management that can be applied and adapted to food systems elsewhere in the world. By using selected regional examinations of agroecological efforts in China as examples, this book provides models of how to conduct research on a broad range of agroecosystems found worldwide.

**You Were Never Meant to Lead Alone** E. K. Strawser, 2025-09-23 Build a Collaborative and Sustainable Ministry Structure The work of the church is more than any one person can handle, and God never intended for one pastor to do all a church's ministry alone. Discover a communal and biblical model of missional leadership in *You Were Never Meant to Lead Alone*. In this book, E. K. Strawser seeks to recover the shared leadership model of the early church, offering a practical and inclusive alternative to hierarchical and patriarchal church leadership structures. This book invites pastors, church planters, and ministry leaders to rethink how leadership can empower the entire body of Christ. By identifying the gifts of apostles, prophets, evangelists, shepherds, and teachers, this book provides a vision for leadership that fosters collaboration, inclusivity, and spiritual flourishing. In this book, Strawser Explores how shared leadership can be integrated into the structure of a church; Expands on the fivefold diversity of leadership: apostles, prophets, evangelists, shepherds, and teachers; Highlights how different gifts and leadership styles suit various aspects of ministry; Expands ministry beyond paid staff, promoting inclusivity regardless of gender, race, or culture; Addresses real-life power dynamics and temptations leaders face; and Offers practical, sustainable structures to multiply leaders for the benefit of the entire community. This book argues that for the church to truly reflect the fullness of Christ, it must embrace the sharing of power. If you're ready to reimagine ministry and build mature leadership in your church, start with *You Were Never Meant to Lead Alone*.
