**Mathematical Conversations** Robin Wilson,Jeremy Gray,2001 Approximately fifty articles that were published in The Mathematical Intelligencer during its first eighteen years. The selection demonstrates the wide variety of attractive articles that have appeared over the years, ranging from general interest articles of a historical nature to lucid expositions of important current discoveries. Each article is introduced by the editors. ...The Mathematical Intelligencer publishes stylish, well-illustrated articles, rich in ideas and usually short on proofs. ...Many, but not all articles fall within the reach of the advanced undergraduate mathematics major. ... This book makes a nice addition to any undergraduate mathematics collection that does not already sport back issues of The Mathematical Intelligencer. D.V. Feldman, University of New Hampshire, CHOICE Reviews, June 2001.

*Verity Fibbs* Cathy Brett,2011-10-13 Reality can never quite compare with the online world of Demon Streets for Verity. There she gets to learn new demon fighting skills and have fun. In reality she goes to school to learn useless skills and her fashion designer mother, Saffron Fibbs, is operating punishment by chores (for a small boy related misdemeanor).

**Assessment and Control at Parkview School** Hilary A. Radnor,1996 Schools are a prominent part of contemporary society's formal organisation of education. The overriding expectation on education is to provide the young person with the tools to be successful in a dynamically ever changing world. As society changes so, too, does society's expectations of schools. State-maintained institutions, dependent on the state for their survival, are subject to the prevailing beliefs and values that drive the economic, political and educational systems through which society is organised. This interpretive study investigates the process of implementation of externally imposed educational change. It's central core is a finely detailed empirical case study that offers insights into the meaning of educational change by coming to an understanding of the ideologies, values and attitudes of key participants - a group of teachers who reveal why they act the way they do when faced

with management directives to make changes to their professional working practices. The theme of the book is articulated by the question that weaves through the study: how do individuals manage to retain a sense of freedom with constraints imposed on them? The approach adopted shares the perspective known as policy ethnography which stresses the problematic nature of implementation, viewing it as an active process whereby individuals engaged in the act of implementation interpret, reinterpret, reform and reconstruct the policy ideas when actively putting them into practice or into use.

**Mrs Weber's Omnibus** Posy Simmonds,2020-05-21 In May 1977 Posy Simmonds, an unknown young illustrator, started drawing a weekly comic strip for the Guardian. It began as a silly parody of girls' adventure stories, making satirical comments about contemporary life. The strip soon focused on three 1950s school friends in their later middle-class and nearly middle-aged lives: Wendy Weber, a former nurse married to polytechnic sociology lecturer George with a large brood of children; Jo Heep, married to whisky salesman Edmund with two rebellious teenagers; and Trish Wright, married to philandering advertising executive Stanhope and with a young baby. The strip, which was latterly untitled and usually known just as 'Posy', ran until the late 1980s. Collected here for the first time are the complete strips. Although celebrated for pinpointing the concerns of Guardian readers in the 1980s and their constant struggle to remain true to the ideals of the 1960s, they are in fact remarkably undated. They show one of Britain's favourite cartoonists, celebrated for Literary Life and Tamara Drewe, maturing into genius.

**Management** Kerr Inkson,2001-11 This book is designed to introduce the foundations of organisation and management by de-mystifying what may seem to be a vague or distant topic, defining terminology in clear language and offering case studies that inspire interest in management as an important process in day-to-day life, both within and outside organisations.
