Eating Disorders Paul Robinson, Tracey Wade, Beate Herpertz-Dahlmann, Fernando Fernandez-Aranda, Janet Treasure, Stephen Wonderlich, 2024-12-20 This Handbook covers all eating disorders in every part of the world. Eating disorders in Western countries are described but also in different parts of Asia, Africa, the Middle East, amongst indigenous peoples, and peoples of cultural and linguistic diversity, Latin America and Eastern Europe and we will describe the impact of pandemics. The sections are organised with an introduction followed by definitions and classifications, then epidemiology, then psychosocial aetiology, clinical features, neurobiology, family peers and carers, and finally conclusions. The latest DSM and ICD classifications are covered and eating disorders not yet classified. The authors cover the clinical features of eating

disorders complicating diabetes type 1, the neurobiology of eating disorders including immunology, neurotransmitters and appetite. The treatment section will include emergency treatment, evidence-based psychological approaches, intensive interventions and emerging areas, and the family section will include voluntary bodies, family and carers and pregnant mothers with eating disorders. Outcome covers prognosis in all the major eating disorders and describe the severe and enduring type of eating disorder. The work is the primary source of information about eating disorders for students, doctors, psychologists and other professionals. The fact that it is regularly updated makes it second only to primary sources such as journals for retrieving information on the subject. In contrast to journals the manual will provide accessibility unavailable elsewhere.

**New to Eating Disorders** Jane Morris, Caz Nahman, 2020-07-09 Developed by the Faculty of Eating Disorders Executive Committee of the Royal College of Psychiatrists, this book addresses the need for materials to teach healthcare professionals working in mental health about eating disorders. Currently, there are many clinicians working in general adult or child and adolescent specialties that will have patients with eating disorders, without an awareness of how to work with them. Designed as a workbook for trainees and professionals, New to Eating Disorders features clinical vignettes, Q&A's and key learning objectives to help consolidate theoretical knowledge with what is seen in clinical practice. The information is easy to digest and the workbook can be completed within a four-month rotation for trainees in a busy clinical post. This workbook will give professionals new to the field of eating disorders the clinical knowledge, confidence and skills to be able to safely look after patients with these conditions.

Age of Onset of Mental Disorders Giovanni de Girolamo, Patrick D. McGorry, Norman Sartorius, 2018-11-11 This book presents a thorough and critical review of current knowledge about the age of onset of mental disorders. The opening chapters offer information about the impact of the age of onset on the clinical picture, course, and outcome of physical illnesses, and about the neurobiological implications and correlates of different ages of onset. The impact and correlates of the ages of onset of all the most important mental disorders are then discussed in detail by internationally renowned scientists. The background to the book is the recognition that a better understanding of age of onset makes it possible to estimate the lifetime risk of disorders, helps to elucidate pathogenesis, and facilitates efficient, targeted clinical management. The book will be of value for clinicians, mental health professionals, mental health researchers, epidemiologists, and different stakeholders in the mental health field.

Each chapter is accompanied by case stories drawn from real-life examples, taking the reader through from initial presentation to treatment, and the key need-to-know facts and current evidence-based treatments.
