1620 Peter W. Wood, 2022-11-08 When and where was America founded? Was it in Virginia in 1619, when a pirate ship landed a group of captive Africans at Jamestown? So asserted the New York Times in August 2019 when it announced its 1619 Project. The Times set out to transform history by tracing American institutions, culture, and prosperity to that pirate ship and the exploitation of African Americans that followed. A controversy erupted, but the Times didn't back down. Instead the authors ballooned their original magazine supplement into a 600-page book. Peter Wood's 1620 was a point-by-point response to the 1619 Project. He argued that the proper starting point for the American story is 1620, with the signing of the Mayflower Compact aboard ship before the Pilgrims set foot in the Massachusetts wilderness. The quintessential ideas of American self-government and ordered liberty grew from the deliberate actions of those Mayflower immigrants. In this new edition of 1620, Wood brings the story up to date, including the glittering prizes for 1619 pseudo-history, the deepening disputes, and the roles played by Presidents Trump and Biden. Much of the controversy involves education. Schools across the country raced to adopt the Times' radical revision of history as part of their curricula. Parents in many districts have rebelled. Should children be taught that America is a four-hundred-year-old system of racist oppression? Or should they learn that what has always made America exceptional is our pursuit of liberty and justice for all?

Why Learn History (When It's Already on Your Phone) Sam Wineburg, 2018-09-17 A look at how to teach history in the age of easily accessible—but not always reliable—information. Let's start with two truths about our era that are so inescapable as to have become clichés: We are surrounded by more readily available information than ever before. And a huge percent of it is inaccurate. Some of the bad info is well-meaning but ignorant. Some of it is deliberately deceptive. All of it is pernicious. With the Internet at our fingertips, what's a teacher of history to do? In *Why Learn History (When It's Already on Your Phone)*, professor Sam Wineburg has the answers, beginning with this: We can't stick to the same old read-the-chapter-answer-the-question snoozefest. If we want to educate citizens who can separate fact from fake, we have to equip them with new tools. Historical thinking, Wineburg shows, has nothing to do with the ability to memorize facts. Instead, it's an orientation to the world that cultivates reasoned skepticism and counters our tendency to confirm our biases. Wineburg lays out a mine-filled landscape, but one that with care, attention, and awareness, we can learn to navigate. The future of the past may rest on our screens. But its fate rests in our hands. Praise for *Why Learn History (When It's Already on Your Phone)*

"If every K-12 teacher of history and social studies read just three chapters of this book—"Crazy for History," "Changing History . . . One Classroom at a Time," and "Why Google Can't Save Us" —the ensuing transformation of our populace would save our democracy." —James W. Lowen, author of *Lies My Teacher Told Me* and *Teaching What Really Happened* "A sobering and urgent report from the leading expert on how American history is taught in the nation's schools. . . . A bracing, edifying, and vital book." —Jill Lepore, New Yorker staff writer and author of *These Truths* "Wineburg is a true innovator who has thought more deeply about the relevance of history to the Internet—and vice versa—than any other scholar I know. Anyone interested in the uses and abuses of history today has a duty to read this book." —Niall Ferguson, senior fellow, Hoover Institution, and author of *The Ascent of Money and Civilization*

Who is a Normative Foreign Policy Actor? Daniel Sheldon Hamilton, 2008 This book investigates Who is a normative foreign policy actor? It forms part of a new project intended to explore fundamental aspects of foreign policy at the global level, against the backdrop of a proliferation of global actors in the 21st century, following half a century with only one undisputed global hegemon: the United States. The European Union is itself a new or emerging foreign policy actor, driven by self-declared normative principles. But Russia, China and India are also increasingly assertive actors on the global stage

and similarly claim to be driven by a normative agenda. The fundamental question explored is how will these various global actors define their foreign policy priorities, and how they will interact, especially if their ideas of normative behaviour differ? -BOOK JACKET.
