City of Bones Cassandra Clare,2009-04-14 Discover this first installment of the internationally bestselling Mortal Instruments series and “prepare to be hooked” (Entertainment Weekly). When fifteen-year-old Clary Fray heads out to the Pandemonium Club in New York City, she hardly expects to witness a murder -- much less a murder committed by three teenagers covered with strange tattoos and brandishing bizarre weapons. Then the body disappears into thin air. It's hard to call the police when the murderers are invisible to everyone else and when there is nothing -- not even a smear of blood -- to show that a boy has died. Or was he a boy? This is Clary's first meeting with the Shadowhunters, warriors dedicated to ridding the earth of demons. It's also her first encounter with Jace, a Shadowhunter who looks a little like an angel and acts a lot like a jerk. Within twenty-four hours Clary is pulled into Jace's world with a vengeance, when her mother disappears and Clary herself is attacked by a demon. But why would demons be interested in ordinary mundanes like Clary and her mother? And how did Clary suddenly get the Sight? The Shadowhunters would like to know... Exotic and gritty, exhilarating and utterly gripping, Cassandra Clare's ferociously entertaining fantasy takes readers on a wild ride that they will never want to end.

The Routledge Handbook of Museums, Heritage, and Death Trish Biers, Katie Stringer Clary, 2023-07-26 This book provides a comprehensive examination of death, dying, and human remains in museums and heritage sites around the world. Presenting a diverse range of contributions from scholars, practitioners, and artists, the book reminds us that death and the dead body are omnipresent in museum and heritage spaces. Chapters appraise collection practices and their historical context, present global perspectives and potential resolutions, and suggest how death and dying should be presented to the public. Acknowledging that professionals in the galleries, libraries, archives, and museums (GLAM) fields are engaging in vital discussions about repatriation and anti-colonialist narratives, the book includes reflections on a variety of deathscapes that are at the forefront of the debate. Taking a multivocal approach, the handbook provides a foundation for debate as well as a reference for how the dead are treated within the public arena. Most important, perhaps, the book highlights best practices and calls for more ethical frameworks and strategies for collaboration, particularly with descendant communities. *The Routledge Handbook of Museums, Heritage, and Death* will be useful to all individuals working with, studying, and interested in curation and exhibition at museums and heritage sites around the world. It will be of particular interest to those working in the fields of heritage, museum studies, death studies, archaeology, anthropology, sociology, and history.

Sustainable Design for the Built Environment Rob Fleming, Saglinda H Roberts, Chitsanzo Isaac, 2024-11-08 *Sustainable Design for the Built Environment* marks the transition of sustainable design from a specialty service to the mainstream

approach for creating a healthy and resilient built environment. This groundbreaking and transformative textbook introduces sustainable design in a clear, concise, easy-to-read format. This new edition includes fully updated exercises and online resources, an increased focus on diversity, equity, and inclusion in design, more international examples, perspectives, and approaches, enhanced full colour visuals, and additional resources for further study. The book takes the reader deep into the foundations of sustainable design, and creates a holistic and integrative approach addressing the social, cultural, ecological, and aesthetic aspects in addition to the typical performance-driven goals. The first section of this book is thematically structured around the origins, principles, and frameworks of sustainable design, aimed at inspiring a deeper, broader, and more inclusive view of sustainability. The second section examines strategies such as biophilia and biomimicry, adaptation and resilience, and health and well-being, including recent developments following the COVID-19 pandemic. The third section examines the application of sustainability principles from the global, urban, district and site, building, and human scales, illustrating how a systems thinking approach allows sustainable design to span varied contexts and multiple scales. This textbook is intended to inspire a new vision for the future that unites human activity with natural processes to form a regenerative, coevolutionary model for sustainable design. Supported by additional resources including additional reading for each chapter and classroom assignments, this book will be essential reading for students of sustainability and sustainable design.

Buried Beneath the City Nan A. Rothschild, Amanda Sutphin, H. Arthur Bankoff, Jessica Striebel MacLean, 2022-09-06 Winner, 2023 SAA Book Award - Popular, Society for American Archaeology Honorable Mention, 2024 Felicia A. Holton Book Award, Archaeological Institute of America Bits and pieces of the lives led long before the age of skyscrapers are scattered throughout New York City, found in backyards, construction sites, street beds, and parks. Indigenous tools used thousands of years ago; wine jugs from a seventeenth-century tavern; a teapot from Seneca Village, the nineteenth-century Black settlement displaced by Central Park; raspberry seeds sown in backyard Brooklyn gardens—these everyday objects are windows into the city’s forgotten history. Buried Beneath the City uses urban archaeology to retell the history of New York, from the deeper layers of the past to the topsoil of recent events. The book explores the ever-evolving city and the day-to-day world of its residents through artifacts, from the first traces of Indigenous societies more than ten thousand years ago to the detritus of Dutch and English colonization and through to the burgeoning city’s transformation into the modern metropolis. It demonstrates how the archaeological record often goes beyond written history by preserving mundane things—details of everyday life that are beneath the notice of the documentary record. These artifacts reveal the density, diversity, and creativity of a city perpetually tearing up its foundations to rebuild itself. Lavishly illustrated with images of objects excavated in the city, Buried Beneath the City is at once an archaeological history of New York City and an introduction to urban archaeology.

Food Consumption in the City Marlyne Sahakian, Czarina Saloma, Suren Erkman, 2016-10-04 Food consumption patterns and practices are rapidly changing in Asia and the Pacific, and nowhere are these changes more striking than in urban areas. This book brings together scholars from anthropology, sociology, environmental studies, tourism, architecture and development studies to provide a comprehensive examination of food consumption trends in the cities of Asia and the Pacific, including household food consumption, eating out and food waste. The chapters cover different scales of analysis, from household research to national data, and combine different methodologies and approaches, from quantifiable data that show how much people consume to qualitative findings that reveal how and why consumption takes place in urban settings. Detailed case studies are included from China, India, Japan, Malaysia, Philippines, South Korea and Vietnam, as well as Hawai'i and Australia. The book makes a timely contribution to current debates on the challenges and opportunities for socially just and environmentally sound food consumption in urbanizing Asia and the Pacific. Chapter 3 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 3.0 license.
