Ball Lightning Sneak Peek Cixin Liu, 2018-06-05 Download a FREE sneak peek of Ball Lightning! Wildly imaginative. —Barack Obama on The Three-Body Problem trilogy A new science fiction adventure from the New York Times bestselling and award-winning author of the Three-Body Trilogy. When Chen's parents are incinerated before his eyes by a blast of ball lightning, he devotes his life to cracking the secret of this mysterious natural phenomenon. His search takes him to stormy mountaintops, an experimental military weapons lab, and an old Soviet science station. The more he learns, the more he comes to realize that ball lightning is just the tip of an entirely new frontier. While Chen's quest for answers gives purpose to his lonely life, it also pits him against soldiers and scientists with motives of their own: a beautiful army major with an obsession with dangerous weaponry, and a physicist who has no place for ethical considerations in his single-minded pursuit of knowledge. Ball Lightning, by award-winning Chinese science fiction author Cixin Liu, is a fast-paced story of what happens when the beauty of scientific inquiry runs up against the drive to harness new discoveries with no consideration of their possible consequences. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Spinning Field Theory Carlyn Drier, 2021-03-23 Scientists are extremely familiar with the ball lightning phenomenon. But it is not just a concern of the scientific domain, people could be able to acquire knowledge about the lightning ball, especially with this new theory. To everyone interested in ball lightning, just reading this book and you will find ideas to do a practical experiment that would create ball lightning similar to the natural thing. The theory is all completely new. A main idea is that radio waves can be Polarized a step that goes beyond plane polarization. Where the wave is polarized beyond plane polarization, it is possible to form ball lightning from it.

Out of This World Rachel S. Cordasco, 2021-12-28 The twenty-first century has witnessed an explosion of speculative fiction in translation (SFT). Rachel Cordasco examines speculative fiction published in English translation since 1960,

ranging from Soviet-era fiction to the Arabic-language dystopias that emerged following the Iraq War. Individual chapters on SFT from Korean, Czech, Finnish, and eleven other source languages feature an introduction by an expert in the language's speculative fiction tradition and its present-day output. Cordasco then breaks down each chapter by subgenre—including science fiction, fantasy, and horror—to guide readers toward the kinds of works that most interest them. Her discussion of available SFT stands alongside an analysis of how various subgenres emerged and developed in a given language. She also examines the reasons a given subgenre has been translated into English. An informative and one-of-a-kind guide, *Out of This World* offers readers and scholars alike a tour of speculative fiction's new globalized era.

The Making of The Wandering Earth Jiaren Wang, Regina Kanyu Wang (Storycom), 2022-03-15 This handbook takes us through the making of *The Wandering Earth*, one of the highest-grossing non-English films of all time. It is a rare, in-depth, behind-the-scenes study of the making of a masterpiece, taking the reader through the entire production process of a landmark Chinese science fiction film. The book brings to life how *The Wandering Earth* was created, from words to images, by a young and innovative professional team assembled by director Frant Gwo. It discusses specialized details of the filmmaking process and the collaborative work of the crew and the cast involved to present an intuitive feeling of the film's production. A step-by-step guide on the making of a radical large-scale film, this handbook critically examines its various stages such as its development and production stages – the planning, preparing, recruiting, setting up departments and processes; writing the screenplay; creating a visual style and the production design; and the principal photography; its challenging post-production stages – the editing, visual effects production, color mixing; dubbing, sound editing; publicity, etc. Further, the chapters in volume also explore how Chinese science fiction films disrupt the Western narrative context and provide the larger discourse on Chinese science fiction. Richly illustrated with exclusive first-hand visuals from the making of the film, this handbook, part of the *Studies in Global Genre Fiction* series, will be an essential read for professionals, scholars, researchers, and students of film and media production, film studies, popular culture, cultural studies, Chinese studies, world literature, and science fiction. It will also be of interest to the general reader interested in filmmaking.

Fear of Seeing Mingwei Song, 2023-10-03 Winner, 2023 SFRA Book Award, Science Fiction Research Association A new wave of cutting-edge, risk-taking science fiction has energized twenty-first-century Chinese literature. These works capture the anticipation and anxieties of China's new era, speaking to a future filled with uncertainties. Deeply entangled with the politics and culture of a changing China, contemporary science fiction has also attracted a growing global readership. *Fear of Seeing* traces the new wave's origin and development over the past three decades, exploring the core concerns and literary strategies that make it so distinctive and vital. Mingwei Song argues that recent Chinese science fiction is united by a capacity to illuminate what had been invisible—what society had chosen not to see; what conventional literature had failed to represent. Its poetics of the invisible opens up new literary possibilities and inspires new ways of telling stories about China

and the world. Reading the works of major writers such as Liu Cixin and Han Song as well as lesser-known figures, Song explores how science fiction has spurred larger changes in contemporary literature and culture. He analyzes key topics: variations of utopia and dystopia, cyborgs and the posthuman, and nonbinary perspectives on gender and genre, among many more. A compelling and authoritative account of the politics and poetics of contemporary Chinese science fiction, *Fear of Seeing* is an important book for all readers interested in the genre's significance for twenty-first-century literature.

Theorising Future Conflict Mark Lacy, 2023-12-15 This book explores the changing tactics, technologies and terrains of twenty-first century war. It argues that the world in 2049 is unlikely to look like the climate change/artificial intelligence (AI) dystopia depicted in *Blade Runner 2049*, but nor will it be a world where conflict and war has been transformed by a 'civilising process' that eradicates violence and conflict from the human condition. 2049 is also the year that the US Department of Defense has suggested China will become a world-shaping military power. All states will be engaged in 'arms races' across a variety of new tools and technologies—from drones, robotics, AI and quantum computing—that will transform politics, economy, society and war. Drawing on thinkers such as Zygmunt Bauman and Paul Virilio, the book suggests that future war will be shaped by three broad tendencies that include a broad range of tactics, technologies and trends; the impure, the granular and the machinic. Through discussions of cybersecurity, urban war, robotics, AI, climate change, science fiction and new strategic concepts, it examines how these tendencies might evolve in the different geopolitical futures and types of war ahead of us. The book provides a thought-provoking and distinctive framework through which to think about the changing character of war. It concludes that for all the novel and dangerous challenges ahead, the futuristic possibilities of warfare will likely continue to be shaped by problems familiar to students of international relations and the history of war—albeit problems that will play out in geopolitical and technological contexts that we have never encountered before. This book will be of much interest to students of critical war studies, security studies, science and technology studies, and International Relations in general.

Global Science Fiction Gary Westfahl, 2025-06-09 Science fiction represents a diverse community of writers and readers that spans the entire world. This collection provides a global tour of the genre, with essays about Latin American, European, African, Arabic, Indian, Japanese, and Chinese science fiction providing insights about how writers around the world have explored and reinvigorated the genre. Essays by prominent critics from five continents inform about particular cultures and analyze representative texts by authors such as Tobias S. Buckell, Lourenco Mutarelli, Stanislaw Lem, Masande Ntshanga, Tawfiq Al-Hakim, Anil Menon, and Cixin Liu. The contributing scholars examine how national experiences have shaped these narratives, which often differ strikingly from Anglo-American science fiction. An introductory survey of foreign-language science fiction in the United States endeavors to explain why so many of these texts have remained unknown to Anglophone readers. An extensive bibliography lists numerous resources for further study of science fiction from various

parts of the world.

Citizen Science Fiction Jerome Winter, 2021-03-19 Citizen Science Fiction draws on an interdisciplinary swath of literature and media to make the case that the science fiction genre can help rethink the pedagogical use of citizen science as a tool to interrogate our collective civic engagement with science and the incorporation of science into a rigorous, exciting writing-based curriculum. The book revolves around recent developments in specific scientific disciplines, including biology, ecology, computer science, astronomy, and cognitive science. Winter closely studies a range of science-fiction texts and tropes -- such as aliens, robots, clones, mind uploads, galactic empires -- for what they have to contribute to the ongoing scholarly discussion on psychological mindset and mindful argument, reading for probing inquiry and productive uncertainty in the age of the Anthropocene, reading for voice with a view to our digitally dominated future, and reading for threshold concepts in a scientifically driven society.

series from China's most beloved science fiction author, Cixin Liu. Half a century after the Doomsday Battle, the uneasy balance of Dark Forest Deterrence keeps the Trisolaran invaders at bay. Earth enjoys unprecedented prosperity due to the infusion of Trisolaran knowledge. With human science advancing daily and the Trisolarans adopting Earth culture, it seems that the two civilizations will soon be able to co-exist peacefully as equals without the terrible threat of mutually assured annihilation. But the peace has also made humanity complacent. Cheng Xin, an aerospace engineer from the early twenty-first century, awakens from hibernation in this new age. She brings with her knowledge of a long-forgotten program dating from the beginning of the Trisolar Crisis, and her very presence may upset the delicate balance between two worlds. Will humanity reach for the stars or die in its cradle? In The Dark Forest, Earth is reeling from the revelation of a

coming alien invasion-in just four centuries' time. The aliens' human collaborators may have been defeated, but the presence of the sophons, the subatomic particles that allow Trisolaris instant access to all human information, means that Earth's defense plans are totally exposed to the enemy. Only the human mind remains a secret. This is the motivation for the Wallfacer Project, a daring plan that grants four men enormous resources to design secret strategies, hidden through deceit and misdirection from Earth and Trisolaris alike. Three of the Wallfacers are influential statesmen and scientists, but the fourth is a total unknown. Luo Ji, an unambitious Chinese astronomer and sociologist, is baffled by his new status. All he knows is that he's the one Wallfacer that Trisolaris wants dead. La esfera luminosa Cixin Liu, 2019-03-21 La nueva novela del autor chino que arrasa en todo el mundo con El problema de los tres cuerpos: 5.000.000 de lectores. El día en que cumple catorce años, Chen presencia cómo una esfera luminosa entra en su casa y calcina a sus padres. Con el propósito de encontrar algún sentido a esta extraña desgracia, decide dedicarse a descifrar el secreto del misterioso fenómeno a causa del cual quedó huérfano. La búsqueda de la esfera luminosa lo llevará lejos de casa, a perseguir tormentas en las cimas de montañas y a adentrarse en laboratorios subterráneos secretos para, poco a poco, ir descubriendo nuevos límites en la física de partículas. Aunque la obsesión de Chen es la razón de que la suya sea una vida solitaria, esta no podrá protegerle de los intereses globales que hay detrás de sus descubrimientos. Así pues, tendrá que enfrentarse a un físico que no entiende de límites morales en lo que al conocimiento se refiere; una atractiva militar obsesionada con nuevas técnicas bélicas; a una nación entera, en suma, desesperada por hacer frente a una derrota militar inevitable... Invocando nuevos mundos cosmológicos y filosóficos a partir de una minuciosa especulación científica, La esfera luminosa tiene todo aquello que hizo que los lectores de Cixin Liu disfrutaran tanto con El problema de los tres cuerpos. La crítica ha dicho: «Los lectores interesados en la ciencia más avanzada y ligeramente especulativa y en la filosofía de la ética científica querrán leer esta magnífica novela.» Publishers Weekly « La esfera luminosa muestra los peligros inherentes al desarrollo experimental de armas y, en última instancia, tiene todos los elementos que hicieron que, con El problema de los tres cuerpos, Liu Cixin irrumpiera con fuerza en la escena mundial de la ciencia ficción.» The Verge «Sorprendente y fascinante por igual (aunque no por los motivos habituales).» Kirkus Reviews

Kugelblitz Cixin Liu, 2020-05-11 An seinem vierzehnten Geburtstag muss der junge Chen miterleben, wie seine Eltern vor seinen Augen getötet werden. Ein mehrere Tausend Grad heißer Feuerball fährt in das alte Haus und verwandelt alles in Asche – ein Kugelblitz. Fortan hat Chen nur noch ein Ziel im Leben: Er will diesem rätselhaften Naturphänomen auf den Grund gehen und es erforschen. Der Weg dorthin führt ihn weit weg von seiner Heimat in der Provinz, über sturmgepeitschte Gebirge bis tief hinab in die Geheimlabore des Verteidigungsministeriums. Dort macht Chen schließlich eine atemberaubende Entdeckung, die ihn an die Grenzen der Physik führt und ihn vor eine Entscheidung stellt: Wem gilt seine Loyalität – seiner Obsession mit Kugelblitzen, seinen Auftraggebern im Ministerium oder allein der Wissenschaft?

Boule de foudre Cixin Liu, 2019-09-04T00:00:00+02:00 Lorsque les parents de Chen sont incinérés devant ses yeux, le soir de son quatorzième anniversaire, par l'explosion d'une foudre en boule, il jure de consacrer sa vie à l'élucidation de ce phénomène naturel resté mystérieux pour la science. Sa quête le mènera au sommet de montagnes battues par la tempête, dans des laboratoires militaires d'armes expérimentales et dans une station scientifique soviétique désaffectée en pleine

Sibérie. Il comprend bientôt que la foudre en boule constitue la manifestation d'un plan de réalité encore inconnu jusqu'ici. Cette découverte sera peut-être la clé permettant de comprendre l'une des caractéristiques les plus singulières de la foudre en boule : sa sélectivité. Elle est en effet capable d'incinérer une personne à l'intérieur de ses vêtements en laissant ceux-ci intacts. Si l'homme apprend à diriger cette sélectivité, il détiendra l'arme ultime. Comme dans la trilogie du Problème à trois corps, Liu Cixin excelle à donner une forme romanesque aux concepts les plus abscons de la physique. Foudre en boule est un page-turner d'exception.
