Judaism, Philosophy, and Psychoanalysis in Heidegger's Ontology Federico Dal Bo, 2023-11-17 In this book, Federico Dal Bo analyzes the question of Heidegger's anti-Semitism from a deconstructive point of view, appealing not only to philosophy but also to psychoanalysis, gender studies, and critical studies. Deconstruction famously discourages simplistic oppositions whilst encouraging a more careful analysis of cultural and philosophical complexities of a semantic field. In the present case, a deconstructive analysis of Heidegger's anti-Semitism rejects both a stern condemnation of his oeuvre and a simplistic acquittal from this infamous accusation. It rather suggests that the question of his anti-Semitism shall be examined from the broader perspective—from the end of metaphysics.

Paroimia: Brusantino, Florio, Sarnelli, and Italian Proverbs From the Sixteenth and Seventeenth Centuries Daniela D'Eugenio, 2021-11-15 Proverbs constitute a rich archive of historical, cultural, and linguistic significance that affect genres and linguistics codes. They circulate through writers, texts, and communities in a process that ultimately results in modifications in their structure and meanings. Hence, context plays a crucial role in defining proverbs as well as in determining their interpretation. Vincenzo Brusantino's *Le cento novella* (1554), John Florio's *Firste Fruits* (1578) and *Second Fruits* (1591), and Pompeo Sarnelli's *Posilecheata* (1684) offer clear representations of how traditional wisdom and communal knowledge reflect the authors' personal perspectives on society, culture, and literature. The analysis of the three authors' proverbs through comparisons with classical, medieval, and early modern collections of maxims and sententiae provides insights on the fluidity of such expressions, and illustrates the tight relationship between proverbs and sociocultural factors. Brusantino's proverbs introduce ethical interpretations to the one hundred novellas of Boccaccio's *The Decameron*, which he rewrites in octaves of hendecasyllables. His text appeals to Counter-Reformation society and its demand for a comprehensible and immediately applicable morality. In Florio's two bilingual manuals, proverbs fulfill a need for language education in Elizabethan England through authentic and communicative instruction. Florio manipulates the proverbs' vocabulary and syntax to fit the context of his dialogues, best demonstrating the value of learning Italian in a foreign country. Sarnelli's proverbs exemplify the inherent creative and expressive potentialities of the Neapolitan dialect vis-à-vis languages with a more robust literary tradition. As moral maxims, ironic assessments, or witty insertions, these proverbs characterize the Neapolitan community in which the fables take place.

Private Bankers in the Italian 19th Century Luciano Maffi, 2020-12-14 The book analyses the role of private bankers who were pivotal in modernizing the economic and financial system of Italy in the XIX century. To achieve this they needed to interact with the international haute banque to organize and place the public loans and the large investments associated with the joint-stock companies. The theme of reputation, which is currently at the centre of the historiographical debate, is fundamental for the study of the private banker figures, whose professional success is linked to the limitless trust accorded to them by their circle of personal contacts. Historiography has studied the role of Italian bankers in the trade, credit and international finance during the modern age (XVI-XVIII centuries), but it has not analysed the banking system in the XIX century and its national and international relations. The case study of Banca Parodi of Genova fills the historiographical gap concerning the role of private bankers and banking institutions in Italy, highlighting the network between the Parodi family and the international haute banque; one of the most emblematic cases is the Rothschild family. The book presents a re-elaborates series of unpublished data, placing them at the disposal of the scientific community and analyses the role of private bankers in the development of Italian banking institutions in the XIX century to launch a scientific debate.

Print, Power, and Cultural Hegemony Federico Dal Bo, 2024-09-23 Federico Dal Bo examines the design of early Hebrew books from the late fifteenth and sixteenth centuries, focusing not only on the words in these early books but also on how they were arranged on the page. He follows in the tradition of scholars such as Christopher de Hamel, Marvin J. Heller, and David Stern, who have explored the importance of these Hebrew books in influencing Jewish learning and attracting the interest of Christians. The author discusses important prints, such as the first Talmud and rabbinical bibles, which marked a shift from being for Jewish readers only to being for both Jews and Christians. The collaboration between Jewish editors and Christian printers changed the way these books looked and the audience for whom they were intended. At first, these early prints copied the style of handwritten Hebrew manuscripts. The simple layout could be difficult to read, especially for long books like the Bible or Talmud. But over time, influenced by the humanism of the Italian Renaissance, the layout became more complex. The book also looks at how the layout changed from full-page commentaries to a more complicated design in which the main text and commentaries shared the same page. This shift challenged the idea of who was the primary author and emphasized the role of editors. The layout, with the main text in the center and the commentaries on the sides, created a kind of unwritten rule for how to read religious texts. Dal Bo's study also includes new information about a 1553 trial in which the Talmud was burned. Overall, it explores how the layout of these early Hebrew books shaped cultural power and influenced how people read.
