A Dictionary of Medical Terms in Galen Richard Durling, 2018-07-17 Galen (2nd century A.D.), after Hippocrates the most distinguished physician of antiquity, has left us numerous medical works to which no complete Greek-English dictionary or concordance was available until now. This is a dictionary of ancient Greek medical terms as culled from Galen's voluminous works, covering all medical fields: diet, drugs and surgery. It contains approximately 3,000 Greek words and 119,000 citations. Particularly rich is the vocabulary of plant names, which sometimes defy identification. Dealing with terms from the fields of anatomy, physiology, pathology, pharmacy and surgery this book is essential for the study of medical Greek and will be of interest to both historians of ancient medicine and to classical philologists.

Dictionary of Medical Derivations W.G. Casselman, 1998-04-15 This dictionary explains the original meanings and correct use of the 500 Greek and Latin words and word parts that make up 98% of all medical terms used today. It stimulates

better, quicker comprehension of medical terminology with less grinding memory work and is the ideal way for students to learn how medical words are formed from Latin and Greek roots and how to construct a medical vocabulary for both old and new medical words. It shows how to break long medical words into their simple Greek and Latin roots and helps solve the mystery of medical jargon by supplying a logical system for understanding terminology. Also, it is the first work of its kind to open up access for doctors to understanding the whole of medical terminology, regardless of specialty. And because it is a totally new dictionary readers can be assured of learning true etymologies and accurate meanings instead of the notoriously inaccurate and misleading derivations copied from one so-called standard dictionary to the other over the years. Example: cholecystectomy: chole = gall + cyst = bladder + ec = out + tomy = cutting; so cholecystectomy is the surgical excision, or cutting out, of the gallbladder!
