*Hay un mouse en mi jardín* Juank Asinsten, 2003

*Competencia social y salud escolar* Luis Flórez Alarcón, Helena Vélez Botero, 2022-08-17 Competencia social y salud escolar: Un modelo de trabajo basado en el proceso motivacional humano recoge una experiencia de trabajo investigativo y aplicado realizado en colegios públicos distritales de Bogotá a lo largo de diecisiete años, en desarrollo de los programas de competencia social denominados TIPICAS (habilidades básicas y habilidades para la vida) y ARCOS (acciones de reforzamiento de la competencia social), bajo la dirección de los autores, con la participación de varias decenas de estudiantes de últimos semestres de psicología de la Universidad Nacional de Colombia y de la Universidad de San Buenaventura (sede Bogotá). La competencia social puede conceptualizarse como la aptitud de la persona para adaptarse a su medio social, construyendo y planificando el logro de un sentido de vida, valiéndose del fomento de sus propias habilidades y del uso adecuado de las fuentes de soporte que el sistema social le brinda. El modelo motivacional de trabajo se refiere a una metodología de aplicación basada en el análisis del proceso motivacional humano y a un conjunto de procedimientos de evaluación y de intervención derivados de este análisis. La salud escolar se aborda en términos de educación socio-emocional para la promoción de la salud mental y para la prevención universal y selectiva de sus problemas. Estas tres temáticas son tratadas con amplitud y expuestas en sus fundamentos teóricos, metodológicos y prácticos, a lo largo de los diez capítulos del libro.
