Private Sector Involvement and Investment in Nepal's Forestry Sector: Status, Prospects and Ways Forward

Bhishma P. Subedi,Puspa L. Ghimire,Ann Koontz,Sudarshan C. Khanal ,Prakash Katwal,Kabir R. Sthapit,Shruti Khadka Mishra,2014-03-01 This national level study conducted by Asia Network for Sustainable Agriculture and Bioresources (ANSAB) and its consortium partners on behalf of the Multi Stakeholder Forestry Programme (MSFP) of Nepal, assesses and analyses the current status and future potential of developing economically viable and socially and environmentally responsible forest-based industries leading to sustainable, green and inclusive development model in Nepal. The study has prioritized forest enterprises along four major subsectors, namely, timber, non-timber forest products, ecosystem services (especially ecotourism and carbon) and forest bioenergy and developed a thorough understanding of the current status and future potential of the private sector involvement and investment in these subsectors along with the development of appropriate intervention strategies.

Doing Business 2007 World Bank,2006-01-01 Doing Business 2007 focuses on reforms, identifies top reformers in business regulation, and best practices in how to reform. This volume is the fourth in a series of annual reports investigating global regulations that enhance business activity and those that constrain it. Co-sponsored by the World Bank and the International Finance Corporation - the private sector arm of the World Bank Group - this year's report measures quantitative indicators on business regulations and their enforcement compared across 175 countries - from Afghanistan to Zimbabwe - and over time. Doing Business 2007 updates indicators developed in the three preceding reports. The ten indicators are: starting a business, dealing with licenses, hiring and firing, registering property, getting credit, protecting investors, trading across borders, paying taxes, enforcing contracts, and closing a business. The indicators are used to analyze economic and social outcomes, such as informality, corruption, unemployment, and poverty. This annually published report gives policymakers the ability to measure regulatory performance in comparison to other countries, learn from best practices globally, and prioritize reforms. This year's report covers 20 additional countries.

Business Governance and Society Rajagopal,Ramesh Behl,2018-09-14 This volume critically analyzes the convergence

of technology, business practices, public policies, political ideologies, and societal values for improving business performance at the global-local paradigm. It also enriches knowledge on contemporary business strategies against conventional wisdom of managing companies today. Shifts in the global economic and political order have significantly affected the business patterns within developed, developing, and emerging markets. The reversal of political ideologies from liberal to protectionist business frameworks are disrupting the trade flows that were rooted in the international economy since the mid-twentieth century. The essays contemplate developing new visions and business perspectives to match with the changing political ideologies in emerging markets. This volume will serve as a valuable tool to readers looking for global market management strategies to generate cost-effective business models and create convergence with political and social values to drive better governance of businesses.
