Health and Architecture Mohammad Gharipour,2021-05-06 Health and Architecture offers a uniquely global overview of the healthcare facility in the pre-modern era, engaging in a cross-cultural analysis of the architectural response to medical developments and the formation of specialized hospitals as an independent building typology. Whether constructed as part of Chinese palaces in the 15th century or the religious complexes in 16th century Ottoman Istanbul, the healthcare facility throughout history is a built environment intended to promote healing and caring. The essays in this volume address how the relationships between architectural forms associated with healthcare and other buildings in the pre-modern era, such as bathhouses, almshouses, schools and places of worship, reflect changing attitudes towards healing. They explore the impact of medical advances on the design of hospitals across various times and geographies, and examine the historic construction processes and the stylistic connections between places of care and other building types, and their development in urban context. Deploying new methodological, interdisciplinary and comparative approaches to the analysis of healthcare facilities, Health and Architecture demonstrates how the spaces of healthcare themselves offer some of the most powerful and practical articulations of therapy.

Madrid's Forgotten Avant-Garde Silvina Schammah Gesser,2016-04-01 This book explores the role played by artists and intellectuals who constructed and disseminated various competing images of national identity which polarized Spanish society prior to the Civil War. The convergence of modern and essentialist discourses and practices, especially in literature and poetry, in what is conventionally called in Spanish letters The Generation of '27, created fissures between competing views of aesthetics and ideology that cut across political affiliation. Silvina Schammah exposes the paradoxes facing Madrid's cultural vanguards, as they were torn by their ambition for universality, cosmopolitanism and transcendence on the one hand

and by the centripetal forces of nationalistic ideologies on the other. Taking upon themselves roles to become the disseminators and populizers of radical positions and world-views first elaborated and conducted by the young urban intelligentsia, their proposed aim of incorporating diverse identities embedded in different cultural constructions and discourse was to have very real and tragic consequences as political and intellectual lines polarized in the years prior to the Spanish Civil War.
