Hypnosis in Academia Maurício S. Neubern,Antoine Bioy,2023-02-08 This book analyzes the growing presence of hypnosis in academic settings around the world and its implications for research, healthcare and education. The increasing volume of scientific research on hypnosis and its clinical applications to treat health conditions such as pain, anxiety, trauma and depression has renewed the interest for this kind of practice in different disciplines, such as medicine, psychology, dentistry and nursing. As a result of this growing interest, there is an increasing number of spaces occupied by hypnosis in universities of different countries compared to what occurred in recent decades. Nevertheless, what this means, at various levels, is still far from being deciphered, due to the absence of more detailed research and surveys involving a larger number of institutions, students, faculty and research groups. This volume intends to shed a new light into the discussions about the growing presence of hypnosis in academia by bringing together contributions of practitioners and researchers working with hypnosis in academic settings in ten countries from different parts of the world: Belgium, Brazil, Canada, Cuba, France, Hungary, Israel, Portugal, Russia and Switzerland. The discussions presented in these contributions revolve around four axes of analysis: the historical trajectory of hypnosis within academic institutions; the epistemological nature of hypnosis and its relationships with other fields of knowledge; the importance of scientific research for the current development of hypnosis and its clinical applications; and how teaching and training in hypnosis is organized in universities today, with its ethical and legal implications in different cultural contexts. *Hypnosis in Academia: Contemporary Challenges in Research, Healthcare and Education* will be a great resource for both researchers and practitioners working with hypnosis, and a valuable source of information for human and social scientists in general interested in understanding how a once discredited practice regained respect from the academic community and is now a growing topic of interest for scholars and clinicians all around the world.

Harnessing the Power of Technology to Improve Lives Luc de Witte,2017-09-15 The lives of people with disabilities are complex and various, and there are many situations where technology – particularly assistive technology – already makes a real difference. It is clear that smart phone and tablet computer based solutions continue to enhance the independence of many users, but it is also important that more traditional assistive technologies and services are not forgotten or neglected. This book presents the proceedings of the 14th conference of the Association for the Advancement of Assistive Technology in Europe (AAATE 2017) entitled: 'Harnessing the power of technology to improve lives', held in Sheffield, UK, in September 2017. This 4-day event about assistive technologies (AT) highlights the association's interest in innovating not only technology, but also services, and addresses the global challenge of meeting the needs of the increasing number of people who could benefit from assistive technology. The 200+ papers in the book are grouped under 30 subject headings, and include contributions on a wide range of topical subjects, including aging well and dementia; care robotics; eHealth and apps; innovations; universal design; sport; and disordered speech. The breadth of the AAATE conference reflects people's life needs and so the book is sure to contain something of interest to all those whose work involves the design, development and use of assistive technology, whatever the situation. The photo on the front cover illustrates the breadth of assistive technologies that can improve lives. Photographer: Simon Butler.

Assistive Technology C. Sik-Lányi,E.-J. Hoogerwerf,K. Miesenberger,2015-08-27 Assistive Technology (AT) is the term used to describe products or technology-based services which support those with disabilities or other limitations to their daily activities, enabling them to enjoy a better quality of life. This book presents the proceedings of the 13th European Conference on the Advancement of Assistive Technology (AAATE 2015), held in Budapest, Hungary in September 2015. This biennial conference has established itself as a leading forum in the transdisciplinary area of Assistive Technology, providing a unique platform for the gathering of experts from around the world to review progress and challenges in the interdisciplinary fields which contribute to AT, such as research, development, manufacturing, supply, provision and policy. The theme of the 2015 conference is 'Attracting new areas and building bridges', and this book contains 138 reviewed papers and 28 poster presentations delivered at the conference, covering AT themes as diverse as aging, blindness, mobility, assisted living and accessibility for people with dementia and cognitive impairment. Offering a current overview of many aspects of AT, this book will be of interest to all those – from researchers and manufacturers to healthcare professionals and end-users – whose work or daily life involves the relationship between technology and disability.

World Directory of Crystallographers Yves Epelboin,2013-11-11 The 9th edition of the World Directory of Crystallographers and of Other Scientists Employing Crystallographic Methods, which contains 7907 entries embracing 72 countries, differs considerably from the 8th edition, published in 1990. The content has been updated, and the methods used

to acquire the information presented and to produce this new edition of the Directory have involved the latest advances in technology. The Directory is now also available as a regularly updated electronic database, accessible via e-mail, Telnet, Gopher, World-Wide Web, and Mosaic. Full details are given in an Appendix to the printed edition.

World Directory of Crystallographers Allan L. Bednowitz, Armin P. Segmüller, 2013-04-17 A brief historical account of the background leading to the publication of the first four editions of the World Directory of Crystallographers was presented by G. Boom in his preface to the Fourth Edition, published late in 1971. That edition was produced by traditional typesetting methods from compilations of biographical data prepared by national Sub-Editors. The major effort required to produce a directory by manual methods provided the impetus to use computer techniques for the Fifth Edition. The account of the production of the first computer assisted Directory was described by S.C. Abrahams in the preface of the Fifth Edition. Computer composition, which required a machine readable data base, offered several major advantages. The choice of typeface and range of characters was flexible. Corrections and additions to the data base were rapid and, once established, it was hoped updating for future editions would be simple and inexpensive. The data base was put to other Union uses, such as preparation of mailing labels and formulation of lists of crystallographers with specified common fields of interest. The Fifth Edition of the World Directory of Crystallographers was published in June of 1977, the Sixth in May of 1981. The Subject Indexes for the Fifth and Sixth Editions were printed in 1978 and 1981 respectively, both having a limited distribution.
