The AOPA Pilot ,2004

The Standard Aircraft Flight Log Asa,2009-08 Spiral-bound and perfectly sized to fit in an aircraft glove box or chart pocket, this logbook is a quick reference to the recent history of the airplane so pilots have immediate access to the airplane's records, without having to dig through logbooks usually kept in the maintenance hangar. The Aircraft Flight Log fills a gap in aircraft records for pilots, and instantly allows them to know the status of the aircraft they are about to fly. This new version now contains an entry for tracking GPS database updates. Formatted for ease of use, the Aircraft Flight Log features space for the pilot-in-command to log: out/in operating time destination and purpose of flight squawks if oil was added inspections performed (VOR, pitot-static, ELT) when an oil change, 100-hour, annual inspection, and GPS database update is due This allows pilots in the following flights to quickly familiarize themselves with the airplane and be warned of potential problems. It is a way for the previous pilot to speak to the following pilot of details about the operating characteristics; something not always possible as pilots don't typically have the opportunity to personally hand the keys to the next pilot. The log is also useful for recording operations for tax purposes, as well as monitoring oil consumption. The inside of the Aircraft Flight Log can be personalized for each aircraft, with places to note N-number, type of aircraft, serial numbers of the airframe and engine(s), and the date of purchase. Contact information is prominently displayed for owner information should the log be misplaced, and there is a section detailing the date the log begins and ends, along with engine tach information. The Standard(TM) logbooks have been supporting the aviation industry for over 60 years and comply with the FAA's recordkeeping requirements.
