Administrative Subdivisions of Countries Gwillim Law, 2015-05-20 In marked contrast to the United States, with its territorial stability, some countries, such as Bulgaria and Ethiopia, reorganize their regional subdivisions frequently. This large-format reference work simplifies the comparison of decades' worth of data from such countries: With this book in hand, one can answer any administrative subdivision question about any state or province in the world from 1900 through 1998--Abstracts of Public Administration, Development and Environment. For each country there is at least one table, and usually several. Histories of subdivision changes and lists of alternate names for subdivisions in each country add to the work's research value. All relevant national and international standards such as ISO and FIPS codes are listed, as well as time zones, populations, areas and capitals for each subdivision. There is a comprehensive index of names.

The World of Wine and Food Don Philpott, 2016-10-20 Many wine drinkers would like to be more adventurous but are reluctant to experiment by choosing an unknown wine that may disappoint. There are literally tens of thousands of wines and scores of countries around the globe producing them - and shelf after shelf of different Merlots or Pinot Grigio can be a little intimidating. How to choose the right wine is one problem, deciding on what to serve it with is another. Why do some wines taste better with some foods and why do other wines taste dreadful when paired with certain dishes? This comprehensive review of wine and food offers the information needed so that people will feel empowered and ready to experiment with their wine selections and then be able to pair them with the right foods for a memorable taste experience. Every major wine producing country in the world is covered, the wine producing regions within those countries, grapes used, and the styles of wines made. Every major cuisine of the world is covered including many of the most popular dishes. The reader is then shown how to marry the right wine with the right food. Easy and accessible, this reference belongs on the shelves of any true oenophile as well as the novice wine lover.

First World War Remembrance and Battlefield Preservation Alexander J. Potočnik, 2025-12-22 This book examines the remarkably preserved Soča/Isonzo Front battlefield, exploring how its material heritage has shaped World War I (WW1) remembrance across changing political regimes along the Italian-Slovenian border. It introduces the reader to how conflict landscapes function as independent agents of remembrance, transcending political changes and national narratives. The book offers a multidisciplinary approach that combines anthropology, archaeology and memory studies to trace the 'social

life' of this lesser-known WW1 battlefield. By examining material heritage through multiple lenses, it reveals how physical remnants continue to shape collective memory and cultural understanding of the conflict, providing fresh perspectives on war commemoration beyond traditional historical accounts. This book is written for scholars and students in the fields of memory studies, military history, heritage preservation and modern conflict archaeology. It will appeal to researchers interested in WW1, particularly those focusing on the South-Eastern European theatre and the Italian Front. Libraries supporting programs in anthropology, European history, cultural heritage studies and war studies will find this an essential addition to their collections. The book is also suitable for heritage professionals working with battlefield preservation and commemoration.
