

Thoughts About Inner Self

William M. Baum

The Human Thoughts Valentin Matcas, 2015-11-09 Thoughts are a natural result of your cognitive activity, and they may be ideas, knowledge, beliefs, impressions, stereotypes, memories, needs, feelings, information, suggestions, and much more. Thoughts are meant to determine directly your behavior throughout life, while you fulfil your needs. Thoughts make the difference if you are successful or not in life, they determine directly your life, and if you happen to neglect, ignore, confuse, or forget them in any manner, then you fail. But aren't thoughts everywhere, simply popping up in your mind, you use them as they come, and this is how you think and act in life? No, not exactly, since right now, there is this extraordinary idea just about to happen in the world, and it can make you rich beyond your expectations, if you can only generate it yourself, and if you are the first to do so. But can you? Because if you cannot control your reasoning and therefore the generation of your own thoughts at will, then can you actually reason? Or who exactly does the reasoning for you, if you cannot even control it? Can you identify it? Can you model it? Do you know where thoughts come from? No, we do not know it yet, or this is what psychology states, but can you understand your thoughts and entire cognition even without the help of psychology? Do you know what thoughts are and how the human thinking generates them, along with all needs, ideas, feelings, impressions, memories, and decisions? Some thoughts are conscious and some unconscious, and many times, it seems that even the conscious cognitive activity remains uncontrolled, not through human limitations, but through human lack of understanding of the human mind and of the entire human cognitive activity. There is more to know about thoughts, reasoning, intelligence, and behavior, and we will see it throughout the book, along with everything necessary to manage thoughts and thinking, in all circumstances. Because you cannot understand anything in life at a higher cognitive level, if you do not understand the human thoughts, for the simple reason that you use thoughts throughout your reasoning, in order to understand everything in life, including yourself, the world, and your place and meaning in life and in the world. Even more, thoughts in general, and your thoughts in particular, define your reasoning and intelligences, since intelligences count for the world through their reasoning, thoughts, and interconnectivity, just the way living beings count for the world through their acts, behavior, and interconnectivity. Thoughts construct your cognitive system, and they develop you wholly throughout life, through the gradual improvement of your cognitive system. This is why you are who you are, because you think the way you do, because you have the thoughts that you do, and certainly, because you think exactly the thoughts that

you do. Throughout this book, we integrate thoughts within the body, brain, mind, and intelligences, studying them in all details and from all perspectives. We study how thoughts originate, develop, and are controlled at the cognitive and social levels. If you want to know more about thoughts, ideas, feelings, learning, and reasoning in general, this book is for you.

Redesign Your Life in Modern Age Balvinder Kumar, 2020-02-24 All around us, we are witnessing major changes that are transforming our lives because of science and technology. In fact, multiple revolutions including relating to digital technologies are simultaneously taking place across the world. The way we think, work, interact and connect with others, is changing at increasingly fast pace. On the one hand, the world is becoming a better place to live. We are becoming healthier, wealthier, leading a more comfortable life. But sadly, at the same time, we are becoming more and more unhappy and discontented with our life. We are seeing increased incidents of mental illnesses like depression and anxiety, life style diseases like diabetes, obesity, heart and lung diseases. The life style diseases are the biggest killers in India. Increasingly, people are getting addicted to social media. Everyone is now busier on mobile or other digital screens, too many distractions; our attention span is further declining. In a broader sense, we are getting disconnected from each other and their inner self. The whole world is facing a serious challenge as how to cope up with the changing scenario of digital age. With this background in mind, the author has written his 3rd book titled, 'Redesign Your Life in Modern Age'. His earlier 2 books were first, *Man's Spiritual Journey* and second, *Awakening the Thinking Mind* The book attempts to touch the whole gamut of subjects, which are very relevant and significant to contemporary world. The topics of discussion range from 'human destiny' to our own inner journey. From pain, suffering, mental stress, loneliness, fear, anxiety, digital obsession and attention deficit to success, pleasure, happiness and likewise many other subject matters have been included in the book. How each one of us can redesign our life's journey in view of challenges faced in the modern age, is the simple mantra behind writing this book.
