**De fábrica a barrio** Monika Therrien,2007 This book is aimed at explaining how a series of ideologies formulated by certain elites in the 19th and 20th centuries were introduced as specific social, residential and labor practices and were considered then suitable for the development of the city. The author reconstructs the architectural and manufacturing history of the 19th century former porcelain factory Fábrica de Loza Bogotana and its urban transformation and integration into the small neighborhood of Antigua Fábrica de Loza. An important contribution to the protection of the industrial patrimony of the city against its imminent destruction.

*Neutrosophic Sets and Systems, Vol. 37, 2020. Special issue: Impact of neutrosophy in solving the Latin American's social problems* Florentin Smarandache, Mohamed Abdel-Basset, Maikel Leyva Vazquez, Said Broumi, The main objective of this special issue is to divulge the applicability of the Neutrosophic Theory and to explore the possibilities and advantages of neutrosophic tools, through both the presentation of thorough research and case studies in solving social problems in Latin America. The best presentations discussed at the III International Congress of Educational Research and University Innovation, turned into papers, show us the capacity for socialization of neutrosophic knowledge and its link with this science of validation and consolidation of scientific knowledge. This publication with authors from 11 countries that we place in the hands of the international scientific community, constitutes an example of how in Latin America the Neutrosophy is contributing to complex solutions based on the results of scientific research carried out by teachers and students committed to the social responsibility of continuing to progress for the benefit of humanity.

*Neutrosophic Sets and Systems, vol. 52/2022* Florentin Smarandache, Mohamed Abdel-Basset, Maikel Leyva Vazquez, Said Broumi, 2022-11-01 “Neutrosophic Sets and Systems” has been created for publications on advanced studies in neutrosophy, neutrosophic set, neutrosophic logic, neutrosophic probability, neutrosophic statistics that started in 1995 and their applications in any field, such as the neutrosophic structures developed in algebra, geometry, topology, etc. Neutrosophy is a new branch of philosophy that studies the origin, nature, and scope of neutralities, as well as their interactions with different ideational spectra. This theory considers every notion or idea together with its opposite or negation and with their spectrum

of neutralities in between them (i.e. notions or ideas supporting neither nor ). The and ideas together are referred to as . Neutrosophy is a generalization of Hegel's dialectics (the last one is based on and only). According to this theory every idea tends to be neutralized and balanced by and ideas - as a state of equilibrium. In a classical way , , are disjoint two by two. But, since in many cases the borders between notions are vague, imprecise, Sorites, it is possible that , , (and of course) have common parts two by two, or even all three of them as well. Neutrosophic Set and Neutrosophic Logic are generalizations of the fuzzy set and respectively fuzzy logic (especially of intuitionistic fuzzy set and respectively intuitionistic fuzzy logic).

**Adimu** Miguel Willie Ramos,2003 This book is bi-lingual, listing and describing the offerings given by Lukumi (Yoruba) orishas in the Diaspora to the orishas and ancestors. The book also contains recipes for preparing many of the food offerings detailed in the book.

**Neutrosophic Computing and Machine Learning, Vol. 35** Florentin Smarandache, Maikel Leyva-Vázquez, 2024-12-10 En esta edición especial, conmemoramos dos hitos significativos que han impactado profundamente el pensamiento contemporáneo y su influencia en América Latina: 70 Años de Florentin Smarandache y 30 Años de la Teoría Neutrosófica: Ambos eventos no solo constituyen aportes esenciales a la filosofía, las matemáticas y las ciencias sociales, sino que también han establecido nuevas fronteras en el análisis de problemáticas complejas que afectan a nuestra región.
