The Dynamics of Political Communication Richard M. Perloff, 2021-07-27 The third edition of *The Dynamics of Political Communication* continues its comprehensive coverage of communication and politics, focusing on problematic issues that bear on the functioning of democracy in an age of partisanship, social media, and political leadership that questions media's legitimacy. The book covers the intersections between politics and communication, calling on related social science disciplines as well as normative political philosophy. This new edition is thoroughly updated and includes a survey of the contemporary political communication environment, unpacking fake news, presidential communication, hostile media bias, concerns about the waning of democracy, partisan polarization, political advertising and marketing, the relationship between social media and the news media, and the 2020 election, all the while drawing on leading new scholarship in these areas. It's ideally suited for upper-level undergraduate and graduate political communication courses in communication, journalism, and political science programs. This edition again features online resources with links to examples of political communication in action, such as videos, news articles, tweets, and press releases. For instructors, an instructor's manual, lecture slides, and test questions are also provided. Access the support material at www.routledge.com/9780367279417

Hitler and the Germans Eric Voegelin, 1999 Annotation Between 1933 & 1938, Eric Voegelin published four books that expressly stated his opposition to the increasingly powerful Hitler regime. As a result, he was forced to leave his homeland in 1938. Twenty years later, he returned to Germany as a professor of political science at Ludwig-Maximilian University. Voegelin's homecoming allowed him the opportunity to voice once again his opinions on the Nazi regime & its aftermath. In 1964 at the University of Munich, Voegelin gave a series of memorable lectures on what he considered the central German experiential problem of his time: Adolf Hitler's rise to power, the reasons for it, & its consequences for post-Nazi Germany. For Voegelin, these questions demanded a scrutiny of the mentality of individual Germans & of the order of German society during & after the Nazi period. *Hitler & the Germans*, published here for the first time, offers Voegelin's most extensive & detailed critique of the Hitler era. Voegelin interprets this era in terms of the basic diagnostic tools provided by the philosophy of Plato & Aristotle, Judeo-Christian culture, & contemporary German-language writers like Heimito von Doderer, Karl Kraus, Thomas Mann, & Robert Musil. His inquiry uncovers a historiography that was substantially unhistoric: a German Evangelical Church that misinterpreted the Gospel, a German Catholic Church that denied universal humanity, & a legal

process enmeshed in criminal homicide. Hitler & the Germans provides a profound alternative approach to the topic of the individual German's entanglement in the Hitler regime & its continuing implications. This comprehensive reading of the Nazi period has yet to be matched.

The Critical Thinking Toolkit Galen A. Foresman, Peter S. Fosl, Jamie C. Watson, 2016-08-29 The Critical Thinking Toolkit is a comprehensive compendium that equips readers with the essential knowledge and methods for clear, analytical, logical thinking and critique in a range of scholarly contexts and everyday situations. Takes an expansive approach to critical thinking by exploring concepts from other disciplines, including evidence and justification from philosophy, cognitive biases and errors from psychology, race and gender from sociology and political science, and tropes and symbols from rhetoric. Follows the proven format of The Philosopher's Toolkit and The Ethics Toolkit with concise, easily digestible entries, "see also" recommendations that connect topics, and recommended reading lists. Allows readers to apply new critical thinking and reasoning skills with exercises and real life examples at the end of each chapter. Written in an accessible way, it leads readers through terrain too often cluttered with jargon. Ideal for beginning to advanced students, as well as general readers, looking for a sophisticated yet accessible introduction to critical thinking.

Interpreting Straw Man Argumentation Fabrizio Macagno, Douglas Walton, 2017-09-06 This book shows how research in linguistic pragmatics, philosophy of language, and rhetoric can be connected through argumentation to analyze a recognizably common strategy used in political and everyday conversation, namely the distortion of another's words in an argumentative exchange. Straw man argumentation refers to the modification of a position by misquoting, misreporting or wrenching the original speaker's statements from their context in order to attack them more easily or more effectively. Through 63 examples taken from different contexts (including political and forensic discourses and dialogs) and 20 legal cases, the book analyzes the explicit and implicit types of straw man, shows how to assess the correctness of a quote or a report, and illustrates the arguments that can be used for supporting an interpretation and defending against a distortion. The tools of argumentation theory, a discipline aimed at investigating the uses of arguments by combining insights from pragmatics, logic, and communication, are applied to provide an original account of interpretation and reporting, and to describe and illustrate tactics and procedures that can be used and implemented for practical purposes.. This book will appeal to scholars in the fields of political communication, communication in general, argumentation theory, rhetoric and pragmatics, as well as to people working in public speech, speech writing, and discourse analysis.

Engagement in Teaching History Frederick D. Drake, Lynn R. Nelson, 2009 How can history be taught effectively? Does knowing about the past give meaning to the present and hints to what will happen in the future? This book responds to these questions as it explores the key elements of history instruction-the use of primary sources and narratives, involving students in the historical inquiry through classroom discussions, teaching toward chronological thinking, and the use of historical documents to develop in students a detective approach to solving historical problems. Taking a systematic approach to improve students' historical thinking, this book emphasizes certain strategies that will help students know more about the past in ways that will help them in their lives today. The second edition is organized in three parts-Part One describes the theoretical background to teaching history. Part Two, Planning and Assessment, emphasizes the importance of good organization and lesson planning as well as how to assess students' knowledge, reasoning power, and effective use of communication in the history classroom. Part Three, Instruction, focuses on the use of primary sources, class discussions,

incorporating photographs and paintings, and writing in teaching history. Both the study of history and the teaching of history are multifaceted. The author's hope in writing this book is to engage new and experienced teachers in thoughtful discourse regarding the teaching and learning of history and to develop lifelong learners of history in the 21st century.

Stability in the Persian Gulf Thomas Weihe, 2006 The interventions in Afghanistan and Iraq have fundamentally altered the balance of power in the Middle East. Meanwhile, the social, political, and economic challenges facing the region have continued to increase. The conflict over Iran's nuclear program and the escalating violence in Iraq have lent a new urgency to the search for regional stability. Actors from within the Persian Gulf region hold a key to finding it. The 132nd Bergedorf Round Table in Dubai therefore placed its greatest emphasis on regional approaches. Politicians and analysts from the Gulf region, the United States, and Europe analyzed possible paths toward political stability in the Persian Gulf, with the roles of economic growth and political reforms, as well as the connection between democratization and stabilization placed at the center of the discussions. Participants explored the relationships between modernization and identity, secularism and religion, traditional and Western ideas, and reform and external assistance. One focus of the conference was on security policy challenges. Participants forcefully debated the U. S.-led intervention in Iraq and the role of regional and external actors such as the United States, Europe, India, and China. The Iranian government's policies under President Mahmud Ahmadinejad and the Iranian nuclear program were highlighted in particular detail.
