A History of the Mind Nicholas Humphrey, 1999-06-18 This book is a tour-de-force on how human consciousness may have evolved. From the phantom pain experienced by people who have lost their limbs to the uncanny faculty of blindsight, Humphrey argues that raw sensations are central to all conscious states and that consciousness must have evolved, just like all other mental faculties, over time from our ancestors' bodily responses to pain and pleasure. Humphrey is one of that growing band of scientists who beat literary folk at their own game-RICHARD DAWKINS A wonderful book brilliant, unsettling, and beautifully written. Humphrey cuts bravely through the currents of contemporary thinking, opening up new vistas on old problems offering a feast of provocative ideas. -DANIEL DENNETT

Excavating the Mind Helle Juel Jensen, Mads D. Jessen, Niels Johannsen, 2012-05-07 Excavating the Mind deals with the relationship between the material culture of humans, i.e. our technologies, arts and environments, and our mental worlds. Emphasizing the close interdependence of mind and matter, the volume resonates with current developments within

sociology, psychology and the cognitive sciences, yet it aims to supplement the focus on modern, predominantly Western societies and individuals with studies of different cultural contexts and processes in the evolutionary and historical past as well as the ethnographic present. With contributions from cognitive and social archaeology as well as anthropology, semiotics and the history of religion, the book combines well-illustrated case studies covering a wide chronological and geographic span - from Neolithic Europe to the present-day South Pacific - with incisive discussion of particular theoretical issues in the study of mind and material culture. Excavating the Mind is an original contribution to the multidisciplinary debate on the uniquely human entanglement of complex material cultures and mental worlds.
