Architectural Energetics in Archaeology Leah McCurdy, Elliot M. Abrams, 2019-01-25 Archaeologists and the public at large have long been fascinated by monumental architecture built by past societies. Whether considering the earthworks in the Ohio Valley or the grandest pyramids in Egypt and Mexico, people have been curious as to how pre-modern societies with limited technology were capable of constructing monuments of such outstanding scale and quality. Architectural energetics is a methodology within archaeology that generates estimates of the amount of labor and time allocated to construct these past monuments. This methodology allows for detailed analyses of architecture and especially the analysis of the social power underlying such projects. *Architectural Energetics in Archaeology* assembles an international array of scholars who have analyzed architecture from archaeological and historic societies using architectural energetics. It is the first such volume of its kind. In addition to applying architectural energetics to a global range of architectural works, it outlines in detail the estimates of costs that can be used in future architectural analyses. This volume will serve archaeology and classics researchers, and lecturers teaching undergraduate and graduate courses related to social power and architecture. It also will interest architects examining past construction and engineering projects.

The Monuments of Ancient Egypt Jeremy Stafford-Deitsch, 2001 Millions of tourists visit the ancient Egyptian sites annually and are inspired by the ruins. Yet it is impossible for them to photograph the ruins adequately: the sites are overrun with tourists, photography is forbidden in various locations and amateur cameras cannot correct the perspectives of the monuments. Meanwhile no book currently exists of professional-quality photographs specifically portraying the monuments.

The Danteum Thomas L. Schumacher, 1993 In 1938, Mussolini's Fascist government commissioned the team of Giuseppe Terragni and Pietro Lingeri to design the Danteum, a temple to the greatest of Italian poets. In this acclaimed book, Thomas Schumacher traces Terragni's fanatical, often mystical, pursuit of the poet and explains how this unbuilt project succeeds as an architectural translation of the Divine Comedy -- one that mirrors the poem in structure, theme, and rhythm. Original sketches and renderings complement Schumacher's analysis and provide a complete record of the Danteum. The Danteum [is a] beautifully presented book [that] invites us to study the Danteum in its entirety....The book demonstrates that architecture can transcend the realm of the physical; Schumacher's Danteum brings together different moments of history into one timeless and universal whole. -Progressive Architecture The most penetrating study of Terragni's architecture to appear in English to date....The fact that the Danteum was conceived as both a monument to the Divine Comedy and a transformation of a literary work into architectural form makes it a particularly appropriate vehicle for investigating structural parallels in different media...and excellent presentation of a provocative project. The Synchronisation of Civilisations in the Eastern Mediterranean in the Second Millennium B.C. SCIEM 2000. EuroConference, 2007 M. Wiener's key-lecture entitled Times change: The current state of the Debate in Old World Chronology provides the volume's introduction, followed by the section Science and Chronology, which includes, among others, several controversial studies on the results of carbon-14 dating. An important point for the ongoing discussion on Aegean chronology is made by Pearce et al., who demonstrate that certain traces in Greenland ice-core layers, previously taken to be stemming from the Minoan eruption of Thera, in fact originate from eruptions of the Aniakchak volcano in Alaska. The volume next includes articles that deal with historical chronology and archaeological evidence, arranged in the sections Egypt, The Levant and Syria and The Aegean, Cyprus and adjacent regions. In addition to reports and analyses dealing with many aspects of the chronology and archaeology of these regions, this part also contains M. Bietak's study on all wall-paintings from Egypt, Israel, Syria and the Levant considered to be Minoan.

Egypt of the Pharaohs Brian M. Fagan, 2001 The Egyptians gave us the great pyramids, the Sphinx, magnificent treasures, and some of the most beautiful art and architecture in history. Brian Fagan, a renowned lecturer and professor of archaeology, makes this ancient civilization come alive, taking the reader on an unforgettable journey, spanning 6,000 years, into the world of Seti, Ramses II, Tutankhamun, and other pharaohs who left evidence of their mighty achievements. Egypt of

the Pharaohs weaves together fascinating details of daily life and dynastic intrigue and also delves into the generations of explorers, treasure hunters, and archaeologists who--not always with honorable objectives--searched, studied, and plundered Egypt's past glories. The search goes on, and Brian Fagan relates the latest findings of modern-day archaeologists who continue to unearth fresh evidence of how ancient Egyptians lived and died. Stunning photographs--many never before seen--enrich this comprehensive and engrossing work. Egypt of the Pharaohs will be irresistible to armchair Egyptologists and all those eager to learn more about a civilization that still exerts a powerful hold on the imagination. Zahi Hawass, director general of the Pyramids and author of Valley of the Golden Mummies, discusses the scope of the book in his foreword.
