*The Modern Bestiary* Joanna Bagniewska, 2022-09-27 A quirky collection of Earth's most compelling animals who give mythical creatures a run for their money *The Modern Bestiary: A Curated Collection of Wondrous Wildlife* mirrors the medieval tradition of an encyclopedia of incredible beasts, only this charming book with ornamental illustrations features 100 real animals who are stranger than fiction. Organized by the elements Earth, Water, and Air, the book introduces both unfamiliar creatures, like deep-sea harp sponges who catch prey in their barbs and digest them whole, as well as ones that have made headlines, such as cicadas who emerge from the ground in noisy broods every thirteen or seventeen years. Step right up and meet these delightful, unbelievable, and deliciously horrific animals, including: The endearing: same-sex albatross mothers who raise chicks together tarantulas who keep frogs as pets zebra finches who sing to their eggs to warn them of hot weather The ruthless: flukes who manipulate their host into getting eaten by a final host horned lizards who squirt blood through their eyes to distract predators southern grasshopper mice who harness scorpion venom as a painkiller And the just plain weird: antechinus who mate themselves to death pearlfish who live, fight, and mate in sea cucumber butts immortal jellyfish who reverse their aging process when stressed Funny, entertaining, and illuminating, *The Modern Bestiary* is a book for anyone who wants to become more familiar with the natural world and all its astounding creatures.

Ecological Parasitology Gerald W. Esch, 2015-10-06 Professor Gerald Esch has already published two books in what is becoming an informal series of essays exploring the way that discoveries about the biology of parasites have influenced ecological and evolutionary theories over a career that has spanned nearly 50 years. This book will be the third set of essays and will focus on key moments of discovery and explore how these achievements were due to collaboration, mentoring, and

community building within the field of ecological parasitology. The book will not only describe case studies, pure science and biology but also act as a career guide for early-career ecologists emphasizing the importance of collaboration in the advancement of science.

*The Maryland Amphibian and Reptile Atlas* Heather R. Cunningham, Nathan H. Nazdrowicz, 2018-11-26 The definitive resource for finding, identifying, and conserving Maryland's amphibians and reptiles. Naturalists, herpetologists, and ecologists alike agree that tracking herpetofauna is a challenging undertaking. Scientists are concerned about the decline of once-familiar species, but evidence has often been too anecdotal to support firm conclusions. To better understand the distribution of amphibians and reptiles in Maryland and forecast species' futures in a time of accelerated environmental threats, conducting a comprehensive statewide survey updating 1970s-era distribution maps seemed ideal. However, this endeavor was of an impossibly ambitious scope for scientists alone to tackle. Enter the Maryland Amphibian and Reptile Atlas project, comprising nearly a thousand dedicated citizen scientists who discovered and recorded the locations of herpetofauna throughout every corner of Maryland. In *The Maryland Amphibian and Reptile Atlas*, Heather R. Cunningham and Nathan H. Nazdrowicz present the findings of this massive undertaking. This definitive guide combines nearly 160 comprehensive new herpetological maps with historical distribution maps and in-depth species accounts. Color photos illustrate the natural history of the 89 species of frogs, salamanders, turtles, snakes, and lizards that call the state home. Essays discuss historical studies, the effects of Maryland's current climate, geology, and habitat diversity—and the myriad conservation issues these animals face. This richly detailed book represents a triumph of citizen science and the culmination of an intensive research partnership. It will appeal to both amateurs and professionals interested in herpetology, natural history, or ecology, as well as those with a special interest in Maryland's biodiversity.
