Cultural Linguistics and the Social World Judit Baranyiné Kóczy,Diana Prodanović Stankić,Olga Panić Kavgić,2024-10-24
This book approaches cultural conceptualizations of our modern world from cultural, linguistic and cognitive perspectives. It explores broader topics such as contemporary society, media and entertainment, migration and identity, political discourse, educational contexts and creative linguistic innovation, all of which are seen as interwoven and mutually complementary segments of our present-day social world. This publication brings a fresh multi-cultural approach reflected in applying the principles of cultural linguistics to the analysis of different aspects of language use across four continents - Europe, Asia, Africa and Australia. The issue of shared cultural conceptualizations being their common denominator, the chapters of this book shed light on how various cultural groups use language to communicate their ideas and beliefs both within and outside their own culture, bearing in mind the often contradictory nature of the present-day social world that, at the same time, unites and disintegrates social groups. Benefiting scholars from fields within the broad spectrum of the humanities and social sciences who are interested in culture, discourse, linguistics, sociology, migration and politics, the book uncovers challenging new trends, inviting its readers to further explore the vast interconnected fields of language, culture and cognition in the turbulent 21st Century. Dislocated Screen Memory Dijana Jelaca, 2016-01-26 The links between cinema and war machines have long been established. This book explores the range, form, and valences of trauma narratives that permeate the most notable narrative films about the breakup of Yugoslavia.

A Cultural History of Serbia David A. Norris, 2024-03-05 This volume focuses on Serbia's need to manage change while preserving community identities, a narrative that avoids the common depiction of Serbian culture as a hostile struggle between modernizers supporting foreign models and traditionalists advocating forms of national cultural patrimony. Traditions only function if they are allowed to bend to the necessary modifications demanded by a community's changing historical circumstances. Tradition and change are two sides of the same coin which Serbia, in its many different incarnations, has experienced over the centuries, protecting its national heritage while borrowing and adapting intellectual and other trends from Byzantine, Ottoman and Western sources. Outside influences have been imposed as a direct result of foreign rule or through more friendly channels of communication, leading to a complex relationship between autochthonous and alien elements in Serbian society and culture. This book argues that the division between the national and international frameworks has often been a false dichotomy, with outside features embedded in domestic symbolic capital and Serbian culture simultaneously determined on local, national, regional and global levels. David A. Norris's approach offers a new perspective to students, academics and general readers interested in the history of Serbia's participation in the broad networks of cultural exchange.

Metropolitan Belgrade Jovana Babović, 2018-06-12 Metropolitan Belgrade presents a sociocultural history of the city as an entertainment mecca during the 1920s and 1930s. It unearths the ordinary and extraordinary leisure activities that captured the attention of urban residents and considers the broader role of popular culture in interwar society. As the capital of the newly unified Yugoslavia, Belgrade became increasingly linked to transnational networks after World War I, as jazz, film, and cabaret streamed into the city from abroad during the early 1920s. Belgrade's middle class residents readily consumed foreign popular culture as a symbol of their participation in European metropolitan modernity. The pleasures they derived from entertainment, however, stood at odds with their civic duty of promoting highbrow culture and nurturing the Serbian nation within the Yugoslav state. Ultimately, middle-class Belgraders learned to reconcile their leisured indulgences by defining them as bourgeois refinement. But as they endowed foreign entertainment with higher cultural value, they

marginalized Yugoslav performers and their lower-class patrons from urban life. Metropolitan Belgrade tells the story of the Europeanization of the capital's middle class and how it led to spatial segregation, cultural stratification, and the destruction of the Yugoslav entertainment industry during the interwar years.

Contemporary European Cinema Betty Kaklamanidou, Ana Corbalán, 2018-12-07 This book offers a range of accounts of the state of European Cinema in a specific sociopolitical era: that of the global economic crisis that began in 2008 and the more recent refugee and humanitarian crisis. With the recession having become a popular theme of economic, demographic, and sociological research in recent years, this volume examines representations of the crisis and its attendant market instability and mistrust of neoliberal political systems in film. It thus sheds light on the mediation, reimagination, and reformulation of recent history in the depiction of personal, cultural, and political memories, and raises new questions about crisis narratives in European film, asking whether the theoretical notion of national cinema is less or more powerful during moments of sociopolitical turbulence, and investigating the kinds of cultural representations and themes that characterize the narratives of European documentary and fictional films from both small and large national markets.

This America We Dream of Gustavo San Román, 2001 Jose Enrique Rodo (1871-1917) is a key figure in the history of Latin American culture. His best known work is 'Ariel', an influential essay published a hundred years ago in his native Montevideo. Partly inspired by Spain's defeat over Cuba and Puerto Rico two years earlier, 'Ariel' is the subcontinent's foremost call for a concerted Latin Americanism to counter the cultural impact of the United States, and has influenced later interpretations of that relationship. The essays gathered in this volume provide a complex view of Rodo and make a significant contribution to the current renewal of interest in the work of a writer whose message is likely to need further reinterpreting efforts well into the second centenary of 'Ariel'. contributors include: Iain A.D. Stewart, University of St. Andrews; Jason Wison, University College, London; Gordon Brotherston, Stanford University; Stephen M. Hart, University College, London; Stephen G.H. Roberts, University of Nottingham.
