An Analysis of Pierre Bourdieu's Outline of a Theory of Practice Rodolfo Maggio, 2018-02-21 In Outline of a Theory of Practice, Bourdieu questions the preeminent ideas of social anthropologists such as Levi-Strauss who stressed the structural principles governing human action rather than the actions themselves and, Bourdieu asserts, doesn't account for all observable nuances of behaviour. Drawing on his fieldwork in Algeria, he expresses the need for a theory of practice focusing on the dynamic flow of human actions in the social world. Bourdieu coins the term 'habitus'- a relational concept linking structures to the practice of agents. Outline is a significant and original contribution, providing an account of many of the issues Bourdieu continued to develop through his career.

Ritual Theory, Ritual Practice Catherine Bell, 1992-01-30 Ritual studies today figures as a central element of religious discourse for many scholars around the world. Ritual Theory, Ritual Practice, Catherine Bell's sweeping and seminal work on the subject, helped legitimize the field. In this volume, Bell re-examines the issues, methods, and ramifications of our interest in ritual by concentrating on anthropology, sociology, and the history of religions. Now with a new foreword by Diane Jonte-Pace, Bell's work is a must-read for understanding the evolution of the field of ritual studies and its current state.

The Conundrum of Human Behavior in the Social Environment Marvin D Feit, John S Wodarski, 2016-05-06 Get the new educational standard under the Council of Social Work Education for human behavior and social environment studies! Critical thinking skills are an indispensable component of any educational program, but especially the HBSE curriculum. The Conundrum of Human Behavior in the Social Environment shows ways to spark those needed skills while providing a comprehensive framework on the social environment impact and human behavior theory crucial for graduate and undergraduate courses. Macro, mezzo, and micro forces are examined in depth, along with considerations for redesigning the content in HBSE curricula in accordance with current educational standards. Noted authorities detail evidence-based practices and present extensive referencing along with offering Web site listings and syllabi for coursework. The Conundrum of Human Behavior in the Social Environment presents theories of behavioral change that can be facilitated by practitioners to eliminate or modify undesirable behaviors, as well as provides a framework useful for understanding how a macro-system consisting of four societal forces (social justice, social problems, social policy, and the political economy) works to influence a micro-system of community, organizational, and group dynamic. Four types of HB and SE course outlines are presented and discussed with an eye toward strengthening foundation courses, along with an analysis of fourteen frequently used Human Behavior and Social Environment textbooks based on the Council on Social Work Education's 2001 guidelines that also offers a framework for integrating content. The application of the transtheoretical model of behavioral change to the welfare to work transition with public housing residents is presented using both quantitative and qualitative data that has been closely analyzed. The Conundrum of Human Behavior in the Social Environment provides: extensive references clear and helpful figures and tables of data numerous appendices of useful detailed outlines and descriptions of textbooks lists of Web sites a syllabi and course sequence description for micro/macro/mezzo issues The Conundrum of Human Behavior in the Social Environment is valuable reading for students, educators, social workers, health professionals, psychologists, sociologists, and other human services professionals interested in staying on top of the shifts of focus in human behavior and social environmental curriculums.

Literacy Practices of the Laboring Poor in France, 1800-1860 Steven Edward Rowe, 2002

Post-theory Martin McQuillan, 1999 The first part of this work addresses the current state of critical theory, and questions the post-ness of the epistemological space after the event of theory as an institutional practice. The second part contains examples of the type of work theory has made possible, demonstrating the new directions opening up both within theory itself and in cross-disciplinary study as a result of theory. In this sense, post can be understood to be in dialogue with issues relating to postmodernism, post-Marxism and post-feminism.
