The rapid growth of technology and automation has changed the way we seek our work and find fulfillment—money, meaning and freedom. Those who don't adapt are being trapped in the downward spiral of career stagnation, working harder and earning less, or losing their jobs altogether. People who understood how to win out over intelligent machines have found their dream jobs and career fulfillment. In this book you'll learn: —Why your job is more at risk than you think. —Why being productive at your workplace does not help you succeed, and what you can do about it. —Why today's capitalistic industry structure is going to get rid of most of the traditional jobs. —How to win the race against the intelligent machines that are taking our jobs. —How the Big 3 Technologies are opening up millions of dream jobs. —Why you are not an outsider to this party and how you can find your dream job irrespective of your current skills and experience. —The proven step-by-step method through which you can find your career fulfillment. Who should read this book? Technology professionals in their 20s & 30s: Are you wondering why you are not able to grow your career as much as you thought you could? Professionals in business support functions (HR, Sales & Marketing, Procurement, Finance etc.): Do you feel like you are stuck in a company that is not growing enough and you don't know how to get into a fast-growing company? In chapter 8, you'll learn how to find your dream job in any fast-growing technology company or any traditional company that exploits the Big 3 Technologies. Students: Are you considering getting another degree, as opposed to finding your dream job? Before you invest hundreds of thousands of dollars, read Chapter 12 to understand why credentials are becoming less valuable, even as degrees get more expensive. Read Chapter 13 to find your next job that transforms their career. Entrepreneurs: are you wondering if you made the right choice in developing your business idea? In chapters 2, 3, 6 and 7, you'll find out whether your current business idea is worth pursuing or not. Death Race against the Patriarchy, 2016-10-18 Genie and Cassie gear up in this homage to the fast paced dime store novelettes of yesterday. The two girls, as they are want to be called, make their way from a Chicagoan breakout to some dangerous snow machine racing and finally to New York City. They'll have to be smart and fast on the clutch to prove themselves in the mad world of hot rodding...it's even tougher for these feminine fugitives. They'll have to deal with their own hang ups, avoid the authorities, keep their rod on the road, and pull off a big heist to get back the mysterious dosh from the eccentric Campy Carol. If they can, they should be set for life. Some come join our leading ladies, sorry, girls, as they take on the Death Race against the Patriarchy.

Against Automation Mythologies J. Jesse Ramirez, 2020-06-02 Inspired by Roland Barthes's practice of semiotics in Mythologies, this book offers a technoclasm; a cultural critique of US narratives, discourses, images, and objects that have transformed the politics of automation into statements of fact about the rise of the robots. Treating automation as an ensemble of technologies and science fictions, this book foregrounds automation's ideologies, exaggerations, failures, and mystifications of the social value of human labor in order to question accepted and prolific automation mythologies. Jesse Ramirez offers a study of automation that recognizes automation as a technosocial project, that uses the tools of cultural studies and history to investigate the narratives and ideologies that often implicitly frame the automation debate, and that concretely and soberly assesses the technologies that have made the headlines. The case studies featured include some of the most widely cited and celebrated automatic technologies, such as the Baxter industrial robot, the self-driving car, and the Watson AI system. An ideal resource for anyone interested in or studying emerging technology and society, automation, Marxist cultural theory, cultural studies, science fiction studies, and the cultural history of technology.

Trees on Mars Hal Niedzviecki, 2015-10-20 The future is big right now—for perhaps the first time, our society is more focused on what is going to happen in the future than what is happening right now. In *Trees on Mars: Our Obsession with the Future*, cultural critic and indie entrepreneur Hal Niedzviecki asks how and when we started believing we could and should “create the future.” What is it like to live in a society utterly focused on what is going to happen next? Through visits to colleges, corporations, tech conferences, factories and more, Niedzviecki traces the story of how owning the future has become irresistible to us. In deep conversation with both the beneficiaries and victims of our relentless obsession with the future, Niedzviecki asks crucial questions: Where are we actually heading? How will we get there? And whom may we be leaving behind?
