

Si Fueras T Dove Vederlo

J Spring

Grammatica diacronica del napoletano Adam Ledgeway, 2009-03-26 A rich and long literary tradition (dating back as early as the late 13th century), coupled with an abundance of diachronic and synchronic variation, affords Neapolitan a privileged position amongst the Romance languages, offering the Romance linguist a rare opportunity to explore the structural evolution of one of the lesser known Romance varieties. Yet, while evidence from other Romance languages and dialects has had a profound influence on the development of theoretical issues relating to language structure, variation and change, references to Neapolitan are conspicuous by their absence, simply because the relevant facts are not widely known or have not been analysed in sufficient detail for their theoretical significance to be assessed. As a consequence, the potential significance of Neapolitan for both Romance linguistics and linguistic theory in general has been largely overlooked in the literature. The present volume aims to rectify this situation by providing an extensive documentation and in-depth diachronic description of Neapolitan phonology, morphology and syntax which is comprehensive enough to qualify as a reference grammar but which is formulated within a conceptual frame-work which allows individual facts to be studied as part of a coherent system and compared with other Romance languages. In this respect, the results of the investigations offer a valuable insight into the little studied structure of Neapolitan, while making a significant contribution towards cataloguing the linguistic typology of dialects within the Italian peninsula and, at the same time, bridging the gap between the familiar data of standard Romance and those of lesser known Romance varieties.

La divina commedia Dante Alighieri, Giuseppe Vandelli, 1985 Digterværk, som skildrer Dantes vandring sammen med digteren Vergil, fra Helvede gennem Skærsilden til Himlen, hvor han genser sin elskede Beatrice

Rudolph Schevill Cervantes collection , 1916

Sífilis Girolamo Fracastoro, 2025-06-29 A caballo entre el Cuatrocento y el Cinquecento una insólita y mortífera enfermedad se propagó veloz por toda Europa, y una repentina sensación de angustia y desconcierto, una ola de impotencia y desesperación invadió el Viejo Continente. En el norte de Italia un médico veronés, Girolamo Fracastoro, devastado por las prematuras muertes de tantos familiares y amigos cercanos, encontró refugio en el campo y consuelo en los versos componiendo un hermoso poema, al que tituló Sífilis, que, a su vez, dio nombre a la cruel enfermedad, y divulgó la buena nueva del remedio del guayaco o palo santo para alivio y esperanza de los afligidos mortales. Por su doctrina del contagio

Fracastoro dejó impresa una huella indeleble en la Historia de la Medicina, donde está considerado el padre de la epidemiología moderna y científica. Por su poema Sífilis el galeno veronés ocupa un lugar preeminente en la Historia de la Literatura como el gran revitalizador de la alicaída poesía didáctica. Y aún cabe otro timbre de gloria: la Columbeida del libro III de la Sífilis puede considerarse con razón la piedra fundacional de la épica neolatina americanista, y poetas posteriores la tomaron por modelo de sus epopeyas colombinas. Se ofrece una edición crítica del poema neolatino; se acompaña, por primera vez, de una traducción filológica al castellano con las pertinentes notas aclaratorias a pié de página y un comentario final exhaustivo, así como de un estudio preliminar que ahonda en los recursos retóricos y estilísticos, y en las fuentes literarias e históricas.
