

Sons Of The Pope

Homer

Sons of the Pope Daniel O'Connor, 2015-03-05 This is a very visual novel and the attention to detail is so rich that I could smell the dirty water dogs from the NYC street vendors. Bravo! Romeo Tirone, Director of True Blood, Dexter, and Red Widow Daniel O'Connor's Sons of the Pope reveals an interesting new talent with a snappy style. This is someone's career to watch. Andrew Neiderman, Author of The Devil's Advocate and several V.C. Andrews novels A rich, epic chronicle of murder, the mob, and miracles... Kevin O'Brien, NY Times Bestselling Author *** In Brooklyn, before the murders, before the miracle, before the 1940s were gone forever, there was a tree. If only they let that tree alone. If that sycamore tree had been allowed to stand, then maybe Biaggio Falcone never would have been the head of the Campigotto crime family. Perhaps little Joey Salerno would not have been born like that. Joey's father, Sal - just home from World War II - probably would never have gotten involved with the New York underworld, and his wife Mary wouldn't have spent her entire life caring for an eternal child. There may have been no reason, four decades later, for that desperate pilgrimage to Lourdes, France. And no need for anyone to call upon the one known only as The Diabolist. Experience the richness of a story that spans half a century. Love and hatred. Devotion and betrayal. Murder and miracles. If only they let that tree alone.

A Raphael Madonna and Child Oil Painting: A Forensic Analytical Evaluation Howell G. M. Edwards, 2024-10-22

This book presents a comprehensive forensic analysis of an oil painting depicting a Madonna and Child in a tondo format, previously thought to be a Victorian copy. Detailed historical and scientific studies confirm that this painting was, in fact, created by Raphael around 1512 as a study for his renowned Sistine Madonna, commissioned by Pope Julius II as an altarpiece for the monastic church of San Sisto in Piacenza. The painting underwent rigorous forensic examination,

combining historical research with both invasive and non-invasive scientific imaging techniques. The analysis utilized advanced physical and chemical instrumentation to determine the painting's authenticity and accurate chronological placement. A comparative review of published chemical analyses of pigments, dyes, and substrates used in Raphael's works from collections worldwide is included. Additionally, this study explores the innovative use of artificial intelligence (AI) for facial comparison between the figures in the tondo painting, the Sistine Madonna, and other Raphael artworks. These AI-generated insights provide novel information about the identities of Raphael's models and shed light on his working techniques, as well as those of his associates.
