Integrated Management Robert Sroufe, 2025-04-09 Building on the award-winning success of the first edition, *Integrated Management* offers Initiatives we would want to achieve regardless of their proven positive impacts on a single bottom line, as they are practices that benefit the environment and society in dynamic ways that for too long have been overlooked.

Enterprise Java for SAP Austin Sincock, 2008-01-01 Enterprise Java for SAP is designed as an introduction to the Java 2 Platform, Enterprise Edition (J2EE) for the SAP developer. After providing a general introduction to Java, author Austin Sincock explores how to open the typically closed SAP environment to the world of Java. Utilizing SAP's Java connector, JCo, Sincock details an end-to-end web application that connects directly to SAP, including the deployment and implementation of both a web server and an external database. He explores communicating with an SAP environment through such Java and J2EE technologies as JavaServer Pages (JSP) and the Java Standard Tag Library, and database connectivity through JDBC. Wherever possible, open-source technologies are employed to enable flexible Java connectivity to SAP—atypical for the SAP environment, in which tools are often proprietary.

Parlay / OSA Musa Unmehopa, Kumar Vemuri, Andy Bennett, 2006-03-06 Parlay will enable rapid and cost-effective delivery of services based on telecommunications networks, and will be an essential part of the 3G future. We live in an exciting time. 3G networks are taking off, and as greater bandwidth and communication speeds become available, people are seeking new means by which to increase their interaction potential. Newer and more exciting services are being developed to drive more revenues and to enhance end-user experiences. New technologies are being designed and implemented to supplement and leverage the new capabilities being built into core networks. Parlay/OSA: From Standards to Reality is an accessible primer on network ecosystems and operations today, discussing the need for Parlay, the details of standards, aspects of network evolution and support for legacy systems, and advanced topics from an implementation perspective. The authors examine the potential of the Parlay/OSA (Open Service Access) solution from a number of points of view: business need, service development and service deployment. Parlay/OSA: From Standards to Reality: Provides a comprehensive account and examination of the Parlay technology. Covers standards capabilities and directions, and the twelve Service Capability Features, including call control, mobility management, data session control, generic messaging service and

content based charging and policy management. Addresses architectural alternatives and advanced architecture patterns. Provides use cases, architecture, deployment scenarios and advanced topics for further reading. This invaluable resource will provide product managers, software developers, application developers, network architects and engineers, as well as advanced students and researchers in academia and industry with an in-depth understanding of Parlay.

Camels, Tigers & Unicorns: Re-thinking Science And Technology-enabled Innovation Uday Phadke,Shailendra Vyakarnam,2017-02-27 The commercialisation of science and technology enabled innovation is a serious topic of interest for a wide range of global audiences who share one common objective: to understand how science and technology based ideas can be turned into commercial value more effectively. Despite the vast number of publications addressing entrepreneurship, innovation and strategy there is relatively little in the literature which systematically addresses the structures, processes and mechanisms involved in turning ideas into commercially valuable propositions: this book is intended to directly address this gap.The approach in Camels, Tigers & Unicorns consists of three fundamental strands:The contents of this book should be of interest to a wide range of audiences including entrepreneurs; leaders and managers in technology firms; scientists and technologists engaged in innovation in academic institutions and corporate environments; lone inventors; groups of scientific entrepreneurs operating outside recognised structures; business and strategy consultants; managers of public and private 'intervention agencies' such as incubators and accelerators; investors; and, policy makers.

Dissolved Air Flotation For Water Clarification James Edzwald,Johannes Haarhoff,2011-10-04 The definitive work on Dissolved Air Flotation Systems (DAF) for clarification of drinking water Dissolved Air Flotation for Water Clarification is a complete design and application source for the water industry divided into three parts: The first develops a fundamental

basis for understanding how the process works, and might be adapted to work better. The second provides a reference for design engineers, water operators, and water managers regarding applications where DAF might be incorporated in an overall treatment scheme. The third develops the necessary DAF design concepts and to illustrate them by description of practical applications. Using DAF to remove particles is not only an important process for conventional drinking water plants, but may also be used as a pre-treatment process in membrane plants including reverse osmosis for water desalinization, and in water reuse applications. Dissolved Air Flotation for Water Clarification offers: Information on new applications of DAF in advanced water treatment, desalinization, water reuse, and industrial treatment in food, waste, and pulp and paper Detailed examples, including the world's largest new DAF plant ever built – Croton, NY water treatment plant A single volume entirely devoted to DAF for drinking water clarification Coverage of conventional and pre-treatment processes SI and conventional units throughout
