**Peter Fonagy,Gyorgy Gergely,Elliot Jurist,Mary Target**

*The Role of Self in Teacher Development* Richard P. Lipka,Thomas M. Brinthaupt,1999-01-01 Reflects some of the major transition points in becoming a teacher and focuses explicitly on how issues of self and identity bear on these different points.

*The Construction of the Self* Susan Harter,2012-03-06 An important work from a leading scholar, this book explores self-development from early childhood to adulthood. Susan Harter traces the normative stages that define the emergence of many self-processes, including self-esteem. Restructured and significantly revised, the second edition reflects over a decade of conceptual, empirical, and methodological advances. It provides a broader sociocultural framework for understanding self-development and gives increased attention to the liabilities of our contemporary preoccupation with the self. Initial chapters describe how children, adolescents, and emerging adults assess their own competencies and overall worth and form a core, enduring sense of self. Harter examines the ways in which self-evaluative judgments at distinct developmental stages are shaped by both individual differences and societal influences. She shows that increasingly mature features of the self pose both benefits and risks for psychological adjustment. Subsequent chapters delve into particular characteristics and contexts of the self. Compelling topics include the links between self-esteem and physical appearance; the nature and functions of self-conscious emotions, with expanded coverage of humiliation; self-processes and motivation in the classroom; and cross-cultural research. Throughout, the book highlights the causes and consequences of different types of self-representations, including those that are unrealistically negative or positive. The integrative concluding chapter focuses on the ubiquity of false-self behavior--particularly narcissism--in today's society, identifying promising pathways for promoting authentic self-worth. Combining state-of-the-art theory and research with rich clinical insights, this authoritative volume will be read with interest by developmental, personality/social, and educational psychologists, as well as child clinical psychologists and other mental health professionals.

**Social and Ethical Interpretations in Mental Development** James Mark Baldwin,1902

**The Structure and Development of Self-Consciousness** Dan Zahavi,Thor Grünbaum,Josef Parnas,2004-09-23 Self-consciousness is a topic of considerable importance to a variety of empirical and theoretical disciplines such as developmental and social psychology, cognitive neuroscience, psychiatry, and philosophy. This volume presents essays on self-consciousness by prominent psychologists, cognitive neurologists, and philosophers. Some of the topics included are the

infants' sense of self and others, theory of mind, phenomenology of embodiment, neural mechanisms of action attribution, and hermeneutics of the self. A number of these essays argue in turn that empirical findings in developmental psychology, phenomenological analyses of embodiment, or studies of pathological self-experiences point to the existence of a type of self-consciousness that does not require any explicit I —thought or self-observation, but is more adequately described as a pre-reflective, embodied form of self-familiarity. The different contributions in the volume amply demonstrate that self-consciousness is a complex multifaceted phenomenon that calls for an integration of different complementary interdisciplinary perspectives. *Mental development in the child and the race* James Mark Baldwin, 1894 This text proposes a theory of mental development in the child, which incorporates the stance that no consistent view of mental development in the individual could possibly be reached without a doctrine of the race development of consciousness--ie., the great problem of the evolution of mind. The earliest chapters (1-6) are devoted to the statement of the genetic problem, with reports of the facts of infant life and the methods of investigating them, and the mere teasing out of the strings of law on which the facts are beaded--the principles of Suggestion, Habit, Accommodation, etc. Chapter 5 gives a detailed analysis of one voluntary function, Handwriting. Then follows the theory of adaptation, stated in general terms in Chapters 7 and 8; and afterwards comes a genetic view in detail (Chaps. 9 to 16) of the progress of mental development in its great stages, Memory, Association, Attention, Thought, Self-consciousness, and Volition. **Affect Regulation, Mentalization, and the Development of the Self** Peter Fonagy, Gyorgy Gergely, Elliot Jurist, Mary Target, 2010-09-07 Winner of the 2003 Gradiva Award and the 2003 Goethe Award for Psychoanalytic Scholarship Arguing for the importance of attachment and emotionality in the developing human consciousness, four prominent analysts explore and refine the concepts of mentalization and affect regulation. Their bold, energetic, and encouraging vision for

psychoanalytic treatment combines elements of developmental psychology, attachment theory, and psychoanalytic technique. Drawing extensively on case studies and recent analytic literature to illustrate their ideas, Fonagy, Gergely, Jurist, and Target offer models of psychotherapy practice that can enable the gradual development of mentalization and affect regulation even in patients with long histories of violence or neglect.
