**Samuel J. Umland**

Fahrenheit 451 Ray Bradbury, 1993 The hauntingly prophetic classic novel set in a not-too-distant future where books are burned by a special task force of firemen. Over 1 million copies sold in the UK. Guy Montag is a fireman. His job is to burn books, which are forbidden, being the source of all discord and unhappiness. Even so, Montag is unhappy; there is discord in his marriage. Are books hidden in his house? The Mechanical Hound of the Fire Department, armed with a lethal hypodermic, escorted by helicopters, is ready to track down those dissidents who defy society to preserve and read books. The classic novel of a post-literate future, 'Fahrenheit 451' stands alongside Orwell's '1984' and Huxley's 'Brave New World' as a prophetic account of Western civilization's enslavement by the media, drugs and conformity. Bradbury's powerful and poetic prose combines with uncanny insight into the potential of technology to create a novel which over fifty years from first publication, still has the power to dazzle and shock.

Game Theory and Postwar American Literature Michael Wainwright, 2017-02-14 If game theory, the mathematical simulation of rational decision-making first axiomatically established by the Hungarian-born American mathematician John von Neumann, is to prove worthy of literary hermeneutics, then critics must be able to apply its models to texts written without a working knowledge of von Neumann's discipline in mind. Reading such iconic novels as Fahrenheit 451, In Cold Blood, and Kiss Tomorrow Goodbye from the perspective of the four most frequently encountered coordination problems - the Stag Hunt, the Prisoner's Dilemma, Chicken, and Deadlock, Game Theory and Postwar American Literature illustrates the significant contribution of mathematical models to literary interpretation. The interdisciplinary approach of this book contributes to an understanding of the historical, political, and social contexts that surround the texts produced in the post-Cold War years, as well as providing a comprehensive model of joining game theory and literary criticism.

**Fahrenheit 451 Ray Bradbury** Ray Bradbury,2020-03-08 Fahrenheit 451 is a dystopian novel by American writer Ray Bradbury. Fahrenheit 451 is the temperature at which book paper spontaneously catches fire and burns. It is a futuristic novel describing a time when the government has ordered that all books be burned. This may seem to be ridiculous and could never be happening, but it is starting to happen in real life now, today. Now we have a president who accuses everything in the press of being fake news. He tells his followers who constitute a near majority never to believe the news media. He has ordered the arrest and criminal prosecution of the leading law enforcement officers including the Director of the FBI and the

Director of the Central Intelligence Agency. He has accused most of his political opponents of corruption and crime. Nobody knows what is the truth and what is false any more. He says that decisions of the highest courts of the United States are almost all fake. He openly attacks and criticizes the highest judges of the Supreme Court. He says the truth is false and the false is true. The result is we the people do not know who or what to believe. All the great scientists have found that climate change is real and our time on this earth may be limited, but he says climate change is a hoax and we should ignore the works of the scientists. This is not the first time this has happened. In China, Chairman Mao declared his Cultural Revolution and the Great Leap Forwards. China has the oldest civilization in the world, going back to before Confucius in 551-479 BC. Yet, during the Cultural Revolution, Chairman Mao ordered all the old books burned and destroyed and even ordered the people to destroy their old household furniture. I found this out myself in 2011 when I toured China after the World Memory Championships in Guangzhou China. As a book publisher, I wanted to reprint some old classical works. I was shocked to discover that no books were available dated before 1949 and few after that. Everything earlier than that had been destroyed. I am still hoping that some older Chinese books have been preserved in Taiwan. I consider a book dated 1949 to be a relatively new book. I usually do not bother with such recent books. The destruction of all books in China dated before 1949 is not reported on any website that I have found but I saw with my own eyes that all such books were gone.

**Fahrenheit 451** Ray Bradbury, 2011-11-29 Nearly seventy years after its original publication, Ray Bradbury's internationally acclaimed novel *Fahrenheit 451* stands as a classic of world literature set in a bleak, dystopian future. Today its message has grown more relevant than ever before. Guy Montag is a fireman. His job is to destroy the most illegal of commodities, the printed book, along with the houses in which they are hidden. Montag never questions the destruction and ruin his actions produce, returning each day to his bland life and wife, Mildred, who spends all day with her television "family." But when he meets an eccentric young neighbor, Clarisse, who introduces him to a past where people didn't live in fear and to a present where one sees the world through the ideas in books instead of the mindless chatter of television, Montag begins to question everything he has ever known.
