EDUCACIÓN EN FÍSICA Fernando Flores,2003-07-03 La enseñanza de las ciencias exactas es un campo pletórico de retos y de problemas, pero también de oportunidades y posibilidades. La física, en este ámbito, se convierte en un excelente ejemplo para mostrar temas como los modelos conceptuales, las ideas previas, los errores en los libros de texto y cómo valerse de esos errores para la enseñanza. Los autores, reconocidos investigadores de esta área, se dirigen a docentes y a todo aquel interesado en la enseñanza de las ciencias, aportando importantes conocimientos de este tema, y siembran líneas de investigación por explorar. El libro ofrece una visión panorámica de proyectos de estudio acerca de la enseñanza de la Física que van desde la formación de docentes hasta las propuestas de enseñanza, pasando por las investigaciones de naturaleza más teórica como los aspectos históricos y la propia construcción del conocimiento.

Formación y actualización del Profesorado de Educación Física y del Entrenador Deportivo Miguel Ángel Delgado Noguera,2017-08-01 El libro recoge trabajos o temas sobre los que están especializados e investigan los profesores/as que participan en este manual. La experiencia de cada uno de ellos les avala y permite que estemos ante trabajos de una gran profundidad e interés. Estos trabajos han sido clasificados en cinco bloques temáticos: I: Formación inicial del profesorado de Educación Física, con siete trabajos; II: Formación permanente del profesorado de E.F., con cuatro; III: Didácticas especiales, con tres; IV: Área deportiva, con cuatro y V: Interdisciplinariedad, con cuatro trabajos. La temática tiene un eje central y común sobre el que gira este libro: la formación y actualización del profesorado de Educación Física y Deportiva. Cada Bloque temático recoge, bajo la coordinación de uno de los miembros del Grupo, los temas de mayor interés en ese ámbito concreto. El bloque I: Formación inicial del profesorado de Educación Física, parte de la formación del docente, haciendo una revisión sobre la evolución de la formación inicial del maestro y maestra, especialista en EF.; a

continuación es importante conocer cuáles son las dificultades con que se encuentran los principiantes a maestros o profesores, ésto guiará la actuación de los formadores de formadores; le sigue un trabajo sobre el pensamiento del profesor para conocer cómo evoluciona y se genera el conocimiento práctico de los profesores principiantes; continúan tres trabajos sobre la intervención en la formación inicial como son la utilización del trabajo en grupo durante la formación inicial que cree hábitos de trabajo en equipo; la importancia de la comunicación en la formación de los docentes, aspecto éste muy olvidado; la autoscopia o el visionado de nuestras clases como medio de reflexión práctica y crítica sobre nuestra actuación como docentes; se finaliza con un estudio sobre las perspectivas laborales de los licenciados en ciencias de la actividad física, para conocer cuál puede ser el futuro mercado laboral de nuestros licenciados y licenciadas. El bloque II: Formación permanente del profesorado de EF. Entronca la formación inicial con la actualización, formación en servicio, y profesionalización de los profesores de EF. Aquí se aborda, en primer lugar, el papel del asesor de área como figura de una gran importancia en la formación permanente, así como los medios de perfeccionamiento del profesorado; el libro de texto es analizado con sus implicaciones didácticas, así como la forma y medio que dispone el profesorado para transmitir sus contenidos; un tema novedoso se aborda en el siguiente trabajo: el pensamiento del alumno de Bachillerato en Educación Física y el alumnado como núcleo de la formación permanente del profesorado de EF, sus paradigmas y orientaciones. También aborda cómo el alumno puede ser objeto de estudio para conocer y comprender mejor cómo incide la actuación del profesorado en sus actuaciones y cómo media nuestro contenido de la EF en su formación. Para finalizar este bloque se analiza la evaluación de la formación permanente, evaluación necesaria para poder enfocar la mejora en futuras actuaciones en la formación en ejercicio, proporcionando al profesorado y a la Administración de un instrumento útil de evaluación de las diferentes actividades de formación. En el bloque III: Didácticas especiales. se recogen tres estudios de sumo interés: las adaptaciones curriculares como manera de atender a la diversidad; un caso concreto de cómo tratar el ritmo con los deficientes auditivos; y una manera de adecuar el deporte a las personas con minusvalías. Todos estos temas son sugerentes para el profesorado que tiene ahora la obligación de realizar las adaptaciones curriculares y para cuyo cometido no se le ha preparado en los Centros de Formación. El bloque IV: Área deportiva, presenta una manera de encauzar el proceso de formación técnico-táctico en la iniciación del deporte. Además se concreta cuál debe ser la formación básica del entrenador/a en la edad escolar. Se ofrece, para finalizar, un enfoque para abordar los deportes socio-praxiológicos en relación a la estructuración espacio-temporal. El Bloque V: Interdisciplinariedad, recoge tópicos de gran interés como los contenidos transversales, la manera de enfocar la interdisciplinariedad en la etapa primaria a través de la globalización, las relaciones interpersonales como medio de educación y un caso de interdisciplinariedad muy importante como la educación artística y física. Se presenta una propuesta para llevar a cabo la interdisciplinariedad, estableciendo posibles relaciones entre los contenidos del área de la EF con otras áreas de la Educación Primaria. Por otro lado, existe también otra propuesta que va a desarrollar los

diferentes temas transversales desde el área de la EF.
