Piero Mella

Management By Walking Around ,2020-10-08 Management By Walking Around is a style of management that involves the manager often visiting employees informally where they are working in order to see what they are doing and to discuss their work. (MBWA) refers to a style of business management which involves managers wandering around, in an unstructured manner, through the workplace(s) to check with employees about the status of ongoing work. The concept explores the benefits and drawbacks of this practice in organizations.

Out of the Crisis, reissue W. Edwards Deming,2018-10-16 The classic and deeply influential work on business management, leadership, problem solving, and quality control—based on Denning’s famous 14 Points for Management. Now reissued for the managers and leaders of today! Translated into 12 languages and continuously in print since its original publication in 1982, this highly influential framework presents the foundations for a completely transformational way to lead and manage people, processes, and resources. According to Deming, American company management’s failure to plan for the future brings about loss of market, which brings about loss of jobs. Management must be judged not only by the quarterly dividend, but by innovative plans to: • Stay in business • Protect investment • Ensure future dividends • Provide more jobs through improved product and service In simple, direct language, Deming explains the principles of management transformation and how to apply them. This edition includes a foreword by Deming’s grandson, Kevin Edwards Cahill, and Kelly Allan, business consultant and Deming expert.

Out of the Crisis William Edwards Deming,2000 Deming offers a theory of management based on his famous 14 Points for Management.

The Magic Ring Piero Mella,2021-04-01 This book presents a new understanding on how control systems truly operate,

and explains how to recognize, simulate, and improve control systems in all fields of activity. It also reveals the pervasive, ubiquitous and indispensable role of control processes in our life and the need to develop a “control-oriented thinking”—based on uncomplicated but effective models derived from systems thinking—that is, a true “discipline of control.” Over the book’s thirteen chapters, Piero Mella shows that there are simple control systems (rather than complex ones) that can easily help us to manage complexity without drawing upon more sophisticated control systems. It begins by reviewing the basic language of systems thinking and the models it allows users to create. It then introduces the control process, presenting the theoretical structure of three simple control systems we all can observe in order to gain fundamental knowledge from them about the basic structure of a control system. Then, it presents the anatomy of the simplest “magic ring” and the general theoretical model of any control system. This is followed by an introduction to a general typology of control systems and a broader view of control systems by investigating multi-lever control systems and multi-objective systems. The book undertakes the concepts through various environments, increasingly broader in scope to suggest to readers how to recognize therein control systems manifestations in everyday life and in natural phenomena. Updated for the 2nd edition, new chapters explore control systems regulating the biological environment and the organizations, with an in-depth study of the control of quality, productivity, production, stocks and costs. Finally, it concludes by dealing with the learning process, problem-solving, and designing the logical structure of control systems.

The Effectiveness of Management-by-walking-around Anita L. Tucker, Sara J. Singer, Harvard Business School, 2013
Management-By-Walking-Around (MBWA) is a widely adopted technique in hospitals that involves senior managers directly observing frontline work. However, few studies have rigorously examined its impact on organizational outcomes. This paper examines an improvement program based on MBWA in which senior managers observe frontline employees, solicit ideas about improvement opportunities, and work with staff to resolve the issues. We randomly selected 19 hospitals to implement the 18-month long MBWA-based improvement program; 56 work areas participated. We find that the program, on average, had a negative impact on performance. To explain this surprising finding, we use mixed methods to examine the impact of the work area's problem solving approach. Results suggest that prioritizing easy-to-solve problems was associated with improved performance. We believe this was because it resulted in greater action-taking. A different approach was characterized by prioritizing high value problems, which was not successful in our study. We also find that assigning to senior managers responsibility for ensuring that identified problems get resolved resulted in better performance. Overall, our study suggests that senior managers' physical presence on their organizations' frontlines was not helpful unless it enabled active problem solving.
