Interprofessional Approaches for the Management of Chronic Diseases Alberto Marcos Heredia-Rizo, Maria Jesus Casuso-Holgado, Javier Martinez-Calderon , Emma K. Ho, 2024-09-30 Chronic diseases represent the leading causes of death and disability worldwide, with a subsequent enormous socioeconomic burden. The clinical management of these conditions often requires a multidisciplinary approach to treat the complex symptoms related to the disease and the associated problems. Different healthcare systems have been experimenting with interprofessional collaboration to enhance professional effectiveness and quality of practice among professionals, in an environment often constrained by resources. The optimum use of resources is made possible by interprofessional collaboration, which is described as an integrative cooperation of many health professions in different health disciplines, including medicine, nursing, physical therapy, psychology, and occupational therapy. It has been demonstrated that interprofessional care improves patient outcomes by lowering the rate of preventable adverse drug reactions, morbidity, and mortality, and optimising prescription dosages. However, despite the increasing evidence on the positive impact of integrative multidisciplinary programs for people with chronic diseases, there are still gaps and challenges in how to translate evidence-based knowledge into well-informed clinical practice. The aim of this Research Topic is to explore the current status and future direction of interprofessional care teams. We are open to receiving articles that explore interprofessional collaboration in the context of various clinical diagnoses, including; chronic pain, cancer, neurological ailments, psychiatric problems, or cardiorespiratory conditions. Also, the effects of new health technologies on interprofessional collaboration, such as virtual reality, mobile health apps, or telecare.

The Handbook of Chronic Pain ,2007 The objective of this book is to promote and enable closer co-operation between different health professionals in treating pain, by introducing psychosocially oriented team members to the medical aspects of pain, and medically oriented team members to the psychosocial aspects. The structure of the book completely mirrors this objective. The book has nine parts, arranged according to a balanced plan. Parts I and II deal with theoretical (basic science) approaches to pain, whereby Part I focuses on the medical approaches and Part II on the psychosocial ones. Part III is devoted to pain evaluation and assessment, whereby chapter 9 deals with the medical aspects, chapter 10 with the

psychophysiological and psychiatric aspects, and chapter 11 with the psychological psychometric approach, describing different commonly used questionnaires for assessing various aspects of pain. Parts IV to Part VII are devoted to treatment of pain. Part IV focuses on medical treatments, Part V on psychological treatments, Part VI on palliative approaches, and Part VII on complementary approaches (mainly those supported by enough research and evidence). Part VIII focuses on particular pain syndromes, those that are most frequent in the practice of pain, emphasising both medical and psychological aspects in each chapter. Finally, Part IX deals with the practice of treating pain -- in chapter 29 with the facilities and pain centres, namely, the locations where the integration of the described approaches to pain is expected to take place, and in chapter 30 with the problems of the health professional that treats pain.

Adult Audiologic Rehabilitation, Third Edition Joseph J. Montano, Jaclyn B. Spitzer, 2020-01-20 Adult Audiologic Rehabilitation, Third Edition is an advanced textbook for doctoral level audiology students that focuses solely on adults with a completely international perspective. It is the only advanced text to meet the need for the high level of preparation required for doctoral level training. It is also an essential resource for practicing clinicians looking for a complete reference on the latest techniques and technologies. With ever changing technology and new methodologies in client care, the third edition of Adult Audiologic Rehabilitation is a critical resource to audiology education. The book covers definitions of audiologic rehabilitation, an overview of the area, psychosocial impact of hearing loss, assessment strategies, current technologies, treatment methodologies, e-technologies, research needs, and special issues in audiologic rehabilitation. It has been deliberately structured to move the reader from introduction, to specific details of the specialty of audiologic rehabilitation, to providing insights into characteristics of this patient population, and thence to a framework for assessment and treatment of the impact of hearing loss. New to the Third Edition: Thoroughly updated, this edition includes eight new chapters and revisions to nineteen chapters that include updated content, references, figures and tables. New topics include: * Hearing Health-Seeking Behavior * Social Factors in Hearing Aids * Improving Patient Adherence * Multimedia Educational Resources * Family-Centered Care * Patient Narratives in Audiology * E-health and M-health for Audiologic Rehabilitation * Community Outreach This edition welcomes contributions from new authors including: Abbey L. Berg, Melanie Ferguson, Stefan Launer, Alessia Paglialonga, Gabrielle Saunders, Nerina Scarinci, Gurjit Singh, Nancy Tye- Murray, Barbra Timmer, Emilie Zaslow, and a foreword by Arthur Boothroyd. Disclaimer: Please note that ancillary content (such as documents, audio, and video, etc.) may not be included as published in the original print version of this book.

Mechanisms and Management of Pain for the Physical Therapist - E-BOOK Kathleen A. Sluka, 2025-05-24 Deepen your knowledge of the mechanisms of pain and redefine your approach to pain management with this essential resource! Mechanisms and Management of Pain for the Physical Therapist, Third Edition, is the only textbook that addresses the growing significance of rehabilitation and non-pharmaceutical treatments in pain care. Dr. Kathleen Sluka leads a team of

more than 20 international contributors in providing a practical, evidence-based framework for understanding pain mechanisms and management using a multidisciplinary approach. Completely updated content covers the basics of pain neurobiology and reviews evidence on the mechanisms of action of physical therapy treatments, as well as their clinical effectiveness in specific pain syndromes. This edition features new chapters on chronic pain predictors, psychological interventions, and managing pain in special populations, ensuring you are equipped with the latest advancements in the field.

- Comprehensive coverage of physical therapy pain management with a review of the latest evidence and case studies
- Overview of the science of acute and chronic pain
- Interdisciplinary approach to pain management
- Focus on pain syndromes commonly seen in physical therapy practice, including the underlying pathology and interdisciplinary management as well as the medicine, psychology, and physical therapy approaches

Dispositionalism in Musculoskeletal Care Michael Vianin, 2021-10-11 “The experts in pain are the patients.” Chiropractor, lecturer, expert federal chiropractic examiner, and supervising clinician, Michael Vianin (MSc, DC), is committed to ensuring clinicians and other healthcare professionals involved in the management of musculoskeletal disorders and pain syndromes have access to practical tools allowing them to apply a dispositionalism model of musculoskeletal care. In this book, Michael discusses the components of the model, their significance, and how to address them with patients. Topics covered include: - the clinical encounter - pain catastrophizing - depression - sleep quality - self-efficacy - clinician disposition - communication. In-depth and evidence-based, Michael advocates for a patient-centered and collaborative approach to pain management and treatment. *Dispositionalism in Musculoskeletal Care* provides a comprehensive understanding of the dispositionalism model of care and the tools that can be readily applied in the implementation of the model.

Pain E-Book Hubert van Griensven, Jenny Strong, Anita M. Unruh, 2013-12-06 The highly anticipated new edition of *Pain: a textbook for health professionals* (previous subtitle *a textbook for therapists*) has undergone a major rewrite in order to reflect the rapid developments in the field of pain management. It highlights an effective and evidence-based method, providing the theoretical basis to help with the assessment and management of persistent pain, while also discussing in depth a range of specific approaches. *Pain: a textbook for health professionals* is written emphatically from a biopsychosocial perspective. In order to set the scene, the introductory section includes chapters on the patient's voice and social determinants of pain. This ensures that the deeply personal and social aspects of pain are not lost among the more technical and biological commentary. These aspects provide an overall context, and are revisited in chapters on participation of life roles, work rehabilitation and psychology. The basic science section includes key chapters on the psychology, neuroanatomy and neurophysiology of pain. This provides a basis for subsequent chapters on specific approaches such as pharmacology, physical therapy and complementary medicine. Pain in specific patient groups, including children, the elderly and those with

cancer, are dealt with in separate chapters, as are pain problems such as complex regional pain syndrome and chronic spinal pain. Although the emphasis of the book is on long term pain, acute pain is discussed as a possible precursor and determinant of chronicity. - Patient-centred approach to care – advocates listening to the patient's voice - Covers social determinants of pain - Guides the reader from pain psychology to the practical application of psychological interventions - Learning aids – chapter objectives, reflective exercises, case examples, and revision questions - Emphasizes an evidence-based perspective - Written by an international team of experts - topics such as pain in children and the elderly, pain education for professionals, disability and medico-legal aspects - expanded focus on complex regional pain syndrome, acupuncture and psychology - improved layout for a better learning and studying experience

Exercise to Prevent and Manage Chronic Disease Across the Lifespan Jack Feehan, Nicholas Tripodi, Vasso Apostolopoulos, 2022-04-30 Exercise to Prevent and Manage Chronic Disease Across the Lifespan provides evidence-based insights into the clinical utility of exercise in the management of disease across a broad range of specialties and diseases. The book offers research informed strategies for the integration of exercise into standard practice in fields such as neurology, endocrinology, psychiatry and oncology, as well as decision-making pathways and clinical scenarios to advance patient care. The book is divided by specialty and includes clinical scenarios to allow for the integration of information within practice. The book's synthesized research evidence allows practitioners to safely and effectively begin to capitalize on the benefits of exercise in their patients. - Provides broad insights into the evidence-based underpinnings of the use of exercise in a range of common diseases - Coverage includes the immune system, musculoskeletal disease, oncology, endocrinology, cardiology, respiratory diseases, and more - Includes a glossary, bibliography and summary figures for quick reference of information

Common Issues in Breast Cancer Survivors Gretchen G. Kimmick, Rebecca A. Shelby, Linda M. Sutton, 2021-08-23 This book provides a clinically useful resource for evaluation and management of the symptoms and issues that burden survivors of breast cancer. Improvements to breast cancer screening and treatment have resulted in more patients than ever before having been cured after local definitive and systemic therapies. Primary care providers and specialists must be increasingly familiar with the issues that breast cancer survivors routinely face. This is the first book to provide a single resource for common issues faced by breast cancer survivors from a truly multidisciplinary perspective; each chapter of this text is coauthored by at least one oncologist and one specialist outside the field of oncology in order to include the perspectives of relevant disciplines. User-friendly and clinically applicable to all specialties, individual chapters also include tables and figures that describe how best to conduct initial evaluation of the given symptom as well as an algorithm, where applicable, outlining the optimal management approach. Common Issues in Breast Cancer Survivors: A Practical Guide to Evaluation and

Management empowers non-cancer specialists and practitioners who care for breast cancer survivors to address common issues that impact patient quality of life.

Measurement Tools in Patient Education, Second Edition Barbara Klug Redman, 2003 Provides a compendium of patient teaching tools that can be used for such things as assessment of patient's educational needs, evaluation of effectiveness of patient education, tracking effectiveness of patient care, and improving quality of care by using outcomes to improve interventions.
