**Confidence Culture** Shani Orgad,Rosalind Gill,2021-12-06 In Confidence Culture, Shani Orgad and Rosalind Gill argue that imperatives directed at women to “love your body” and “believe in yourself” imply that psychological blocks rather than entrenched social injustices hold women back. Interrogating the prominence of confidence in contemporary discourse about body image, workplace, relationships, motherhood, and international development, Orgad and Gill draw on Foucault’s notion of technologies of self to demonstrate how “confidence culture” demands of women near-constant introspection and vigilance in the service of self-improvement. They argue that while confidence messaging may feel good, it does not address structural and systemic oppression. Rather, confidence culture suggests that women—along with people of color, the disabled, and other marginalized groups—are responsible for their own conditions. Rejecting confidence culture’s remaking of feminism along individualistic and neoliberal lines, Orgad and Gill explore alternative articulations of feminism that go beyond the confidence imperative.

Despite all of her accomplishments, however, she struggled with the issue of confidence. After conducting extensive research, she found that she was far from alone: Many women experience the paradox of enjoying success in their business and personal lives while lacking confidence in themselves. *The Confident Woman* focuses on the issues that women face in growing up as girls in this society. Using a series of seven steps, complete with techniques and questions, Shaevitz presents an accessible and proven program that helps women regain their confidence.
